

▶ VX25 – simple assembly: Focussing on the advantages

Section/frame

- All-round 25 mm pitch pattern on all sections, horizontal and vertical
- Mounting level accessible from the outside
- Accurate counting holes for quick orientation when attaching rail systems

Base assembly

- Stable base assembly with larger opening
- Ergonomic and secure screw connection to the floor or base/plinth from the inside

Door/lock

- Fast door mounting and removal without tools
- Door catch side can also be switched on double-door enclosures
- 180° hinges can be mounted without mechanical machining
- Handle mounting without tools

Panels

- Simpler fastening and ergonomic assembly
- Contacting claws face inwards, no risk of injury
- Simple one-person assembly of panels thanks to positioning aid
- Clip-in flat panel holder for quick, tool-free installation
- Inwardly pointing contacting claws to create potential equalisation

SOFTWARE & SERVICES

➤ VX25 – simple assembly: Main benefits

Baying

- Fewer parts for the same functionality
- Easy positioning of the baying seal due to new method of attachment
- Faster baying thanks to baying connectors with screw connections in the baying direction

Mounting plate

- An optional 20 mm extra installation space in depth thanks to accessories
- Up to three standard mounting plates possible in one enclosure
- The mounting plate can be installed from the front or the rear

Accessories

- Accessories are ideally adapted to the enclosure system
- 40% fewer punched sections and rails without loss of function
- Reduced complexity for the same functionality
- The new VX base/plinth system combines all the benefits of the Flex Block and the TS sheet steel base/plinth in one system
