

LIGHT. POWER. SOUND

KITCHEN & BEDROOM ADDITIONS 2015

sensio[®]
furniture lighting solutions

A new way of living... Cook. Dine. Entertain

The purpose of the kitchen has changed dramatically in recent years. No longer just the room in which you cook your meals, the kitchen is now the hub of the home for many.

The kitchen's role has evolved, making it one of the most important rooms in the house, its functionality must therefore evolve to match how the space is being used. Now often used not only for cooking, but, dining, entertaining and socialising, enhance your kitchen, not only with light, but with unique power and sound solutions.

This new way of living opens up new possibilities for kitchen design. The versatility of the kitchen is key and the integration of new technology and multi-functional products can truly transform your kitchen into a space that fulfils all of your needs.

Light Meets Sound...

Introducing SensioSound

Introducing the latest LED innovation from Sensio...

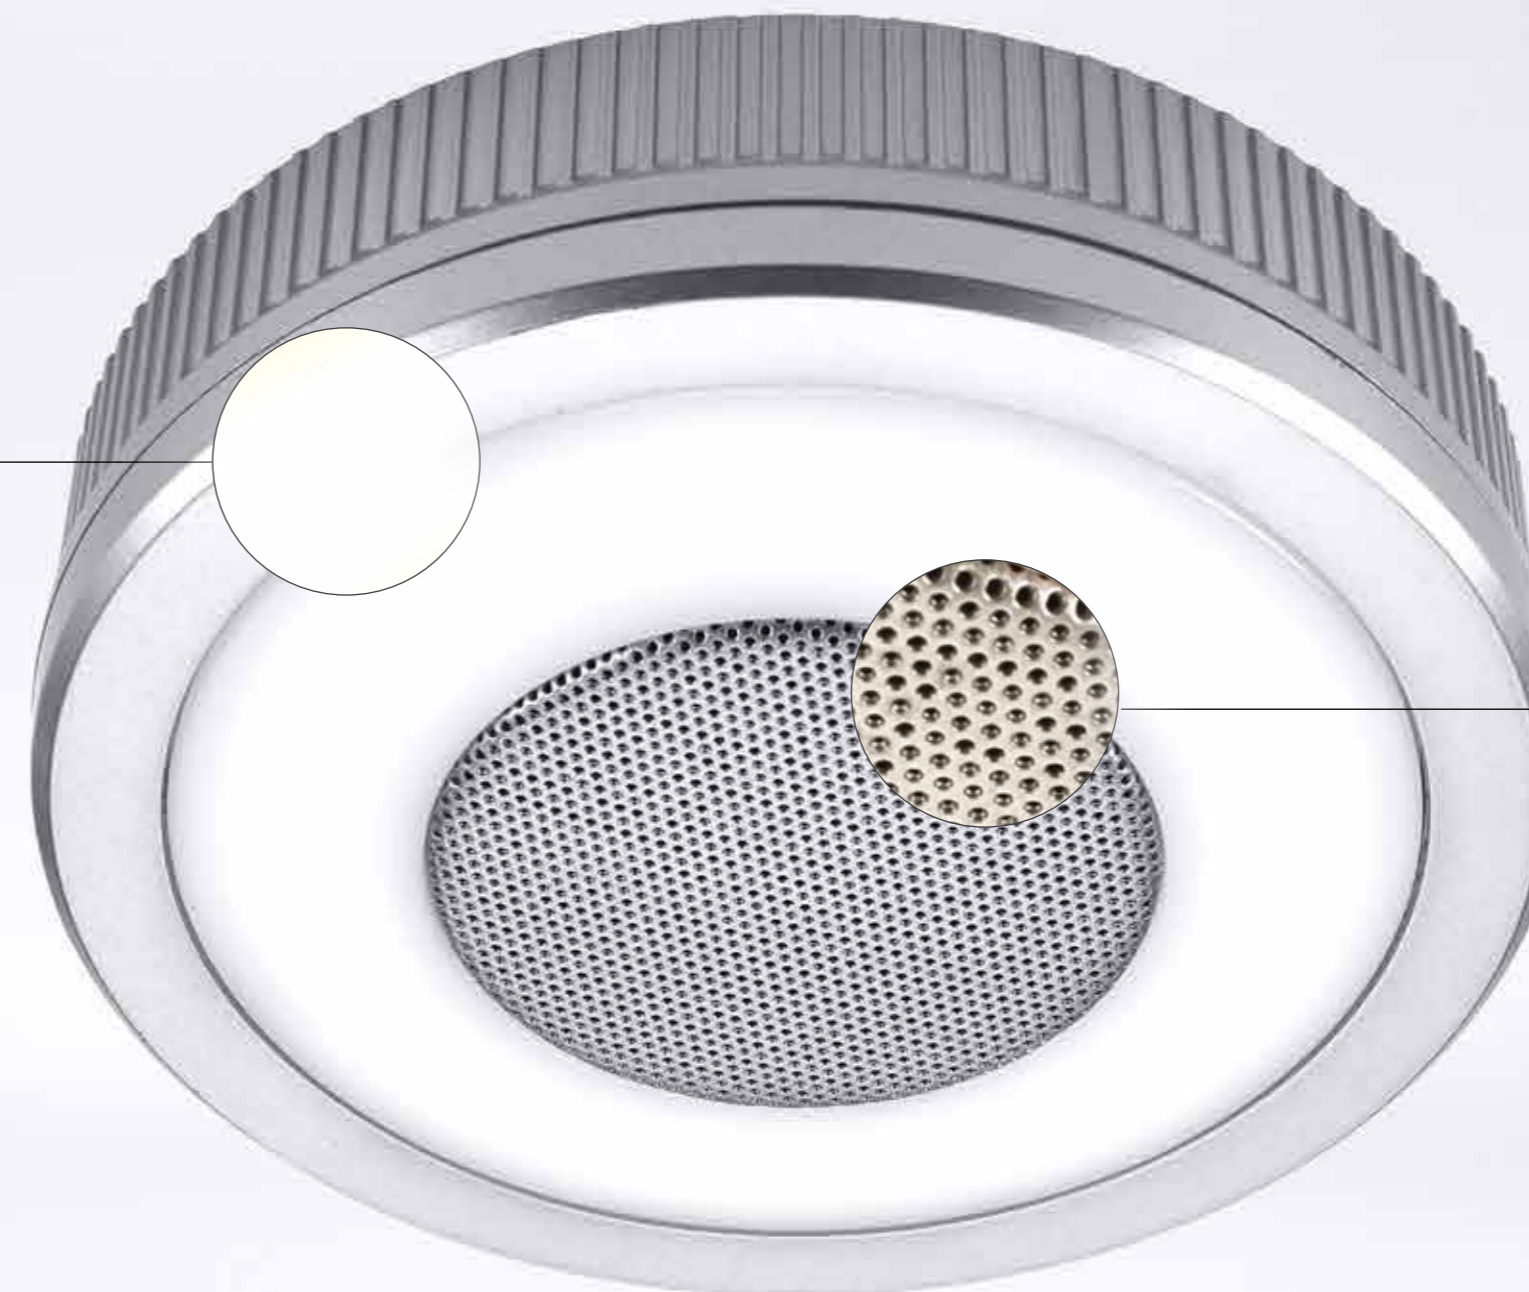

The first under cabinet kitchen light with an integrated Bluetooth speaker. Perfect for those who love to cook, dine, entertain and spend time with family in the kitchen.

- Features an in-built Bluetooth RF wireless module. Simply connect your mobile device to the light via Bluetooth. When paired, all music selected on your mobile device will be played via the SensioSound.
- No visible diodes for a streamlined and attractive appearance.
- One fixture provides task lighting and allows you to play your music. The perfect 'all round' kitchen accessory.
- Keep your kitchen counters tidy as no other devices are required to play your music.
- Bluetooth operational range of up to 10m from your mobile device.
- Low power consumption, only 8W for the product overall.

We have also added two new power solutions with Bluetooth speaker integration, see pages 8-11 for more information.

HIGH OUTPUT, DIFFUSED LED

Featuring no visible diodes, this high power fitting has a light output of a whopping 334 lm.

BLUETOOTH SPEAKER INTEGRATION

Keep your kitchen tidy from additional devices by playing your music through your under cabinet lighting!

The first LED under cabinet light with Bluetooth audio speaker integration in the UK. If your kitchen is used for dining, entertaining and socialising as well as cooking, this is the perfect accessory. Not only does this fitting provide a brighter output than any other current Sensio under cabinet spot light, as well as having no visible LED points, it has an integrated Bluetooth audio speaker. Provides key task lighting where you need it and keeps surfaces clear from additional devices.

SensioSound LED Bluetooth Speaker Light

FINISH: stainless steel
LED COLOUR: cool
LAMP LIFE: 13 years
RECOMMENDED LOCATION: 
BEAM ANGLE: 120° 

'kitchen lighting you can play your music through'

- > High output LED light with built-in Bluetooth RF wireless module to support the latest mobile devices with Bluetooth function.
- > Steel finish with integrated heat-sync and frosted lens for a diffused light output.
- > One device provides task lighting and allows you to play your music, perfect for when you're cooking or entertaining.
- > Surface mounted fitting with an extremely high output.
- > Keep your kitchen tidy as no other devices are required to play your music.
- > Two of these fittings can be used in sync with one another (they must be powered by an individual driver - SE40526).
- > Quick and extremely simple to use, all you need is a SensioSound fitting, 12V driver and a mobile device with Bluetooth. No receivers, wireless boxes or additional wiring required.
- > Wireless connection to your mobile device.
- > Operational range of up to 10m.

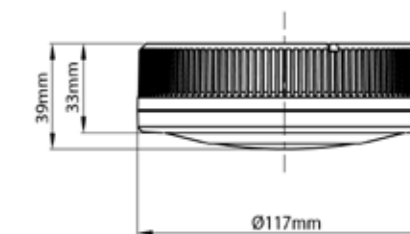

Code	Wattage	LED Colour	Lumen's	Cable	Driver	RRP
SE21090C0	8W	Cool White (5000K)	334 lm	1.8m	■	£82.92
SE21090W0	8W	Warm White (3000K)	228 lm	1.8m	■	£82.92

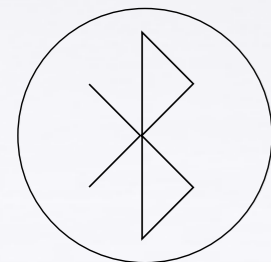

Search for 'SensioSound' via your Bluetooth device. Connect.

Once connected, select the song, album or playlist you'd like to play. Sit back, listen and relax.

Power Solutions The Next Generation...

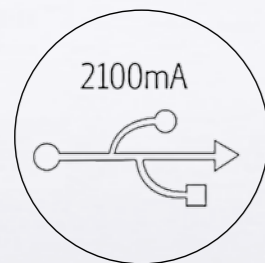

Bluetooth

Connect your mobile device wirelessly via Bluetooth to play music.

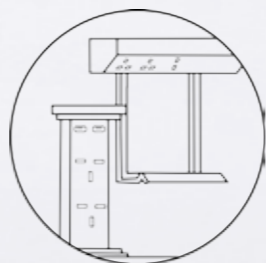

Sound

Integrated 2W audio speaker.
L/R380MV, > 80db, 280Hz - 16KHz

2100mA USB Allowance

The combined allowance of the two USB ports on each SensioPod product is 2100mA, guaranteed to be one of the highest you'll find (like-for-like).

All Those Features

Two power sockets, two USB ports, Bluetooth speaker, hanging shelf option or hidden pull-up option.

Stainless steel top.

Two USB Ports with a combined allowance of 2100mA.

Integrated Bluetooth speaker. Simply connect your mobile device to play your music through the speaker integrated into this stunning upgrade to the SensioPod range.

The SensioPower U

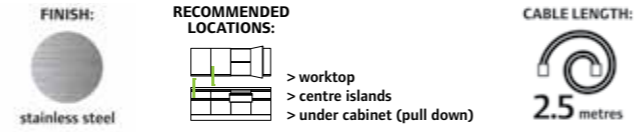

Integrated Bluetooth speaker. Simply connect your mobile device to the SensioPower U and play your music as loud as you like!

Use the hanging shelf to mount an iPad or cookery book to keep surfaces clear when cooking or baking.

SensioPod Bluetooth

SensioPod Bluetooth Pull up Socket

'perfect for the modern living kitchen'

- > The first SensioPod pull up socket with an in-built Bluetooth speaker.
- > Add a touch of luxury to your kitchen designs with this exclusive product.
- > Perfect for an open plan living space which is used for cooking, dining, entertaining and spending time with family.
- > Multi-functional product; power, Bluetooth audio and USB.
- > Two USB ports (with a combined max. allowance of 2100mA) for charging the latest mobile devices.
- > Aluminium casing, slim profile and steel finish top to give a high end look.
- > Specially designed handle makes it simple to pull the fitting up.
- > IP54 rated with inbuilt water channels so can be fitted in close proximity to a sink.
- > Quick release catch to guarantee the unit will always close securely.
- > Neon green switch provides a simple means of checking appliances have been turned off when not in use to save on energy bills.
- > Visible plugs and unsightly cables will no longer be seen as the SensioPod can be retracted fully whilst products are still plugged in.

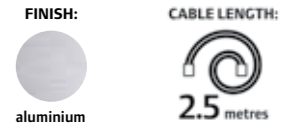

Code	Connection	Features	RRP
SE890920	13A plug included	2 x power sockets, Bluetooth speaker & 2 x USB ports	£124.80

Audio specifications:

- > 2W miniature audio speaker
- > Sensitivity at L/R380MV
- > SNR > 80db
- > Frequency range: 280Hz-16KHz
- > Suitable for use with any Bluetooth enabled audio device and 3.5mm headphone jack (including MP3, MP4, Android Smart phones, iPhone's and iPad).

SensioPower U Bluetooth Power System with Shelf

'everything you need for today's kitchen'

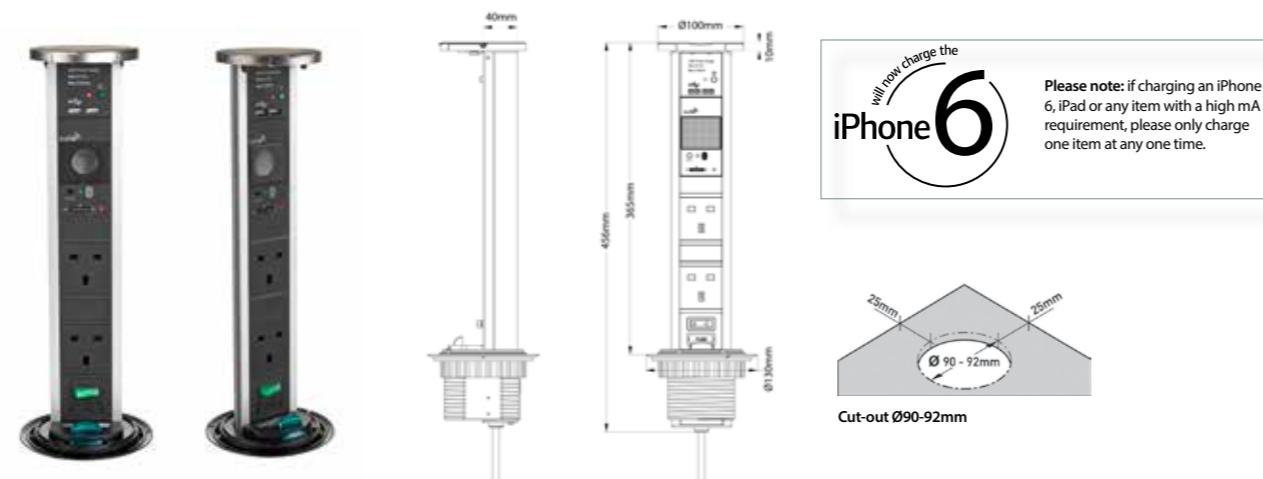

- > Add a touch of luxury to your kitchen designs with this exclusive product.
- > Multi-functional product; power, Bluetooth audio, hanging rail and USB.
- > Mount under kitchen wall units.
- > Place your iPad or cookbook on the aluminium hanging shelf when cooking or baking.
- > Two power sockets and Bluetooth audio; plug your appliances in and play your music whilst cooking or entertaining through a single device.
- > Perfect for an open plan living space which is used for cooking, dining, entertaining and spending time with family.
- > Two USB ports (with a combined max. allowance of 2100mA) for charging the latest mobile devices.
- > Aluminium finish of the power unit and hanging rail for a high end look.
- > IP54 rated so the product is not affected by splashing water or steam.
- > Neon green switch provides a simple means of checking appliances have been turned off when not in use to save on energy bills.

Enhanced, upgraded, unique. Our Quadra range has had a makeover.

SLS Quadra Range

Vs.

The Original Quadra Range

Key benefits of the SLS Quadra

- The lens over the LED's on the SLS version completely diffuse the LED points
- Contains an increased number of LED's for higher light output (brighter than the original)
- Elongated lighting panel to allow a better spread of light across the worktop
- Significantly improved installation method
- More attractive in appearance
- Upgrade from touch sensor to IR sensor

SIMPLE TO INSTALL

Take a look at our specially designed bracket, making installation both simpler and safer.

BRIGHTER

The lumen output of the SLS Quadra is 57 lm higher than the original Quadra equivalent.

MORE LIGHT ON THE WORKTOP

The elongated light panel on the SLS Quadra means you achieve a greater cast of light across the worktop.

IR SENSOR

A single swipe of the hand past the sensor will switch all connected lights on/off. Much more hygienic than a touch switch.

SLS LED

Several high power LED's covered by a frosted diffuser for a stunning appearance.

UNIQUE DESIGN

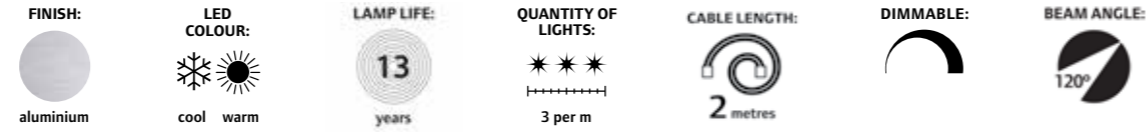

UK product design. Designed by Sensio, exclusive to Sensio in the UK.

Designed in the UK

SLS Quadra LED Under/Over Cabinet Light

'multi-functional UK product design'

- > An upgrade from the original Quadra under and over cabinet lights. Designed by Sensio in the UK this is a unique product design. **Design right number**
- > Transform this product into an over cabinet light by purchasing a bracket.
- > The specialised lens on this product diffuses the LED's to create the appearance of invisible diodes.
- > Featuring a higher number of LED's than the original Quadra range for an improved light output.
- > The sensor has been upgraded to IR to maintain hygiene levels in the kitchen.
- > The fittings daisy chain together (run 6 from a 15W driver). Daisy chain non-sensor fittings into one sensor fitting for synchronised switching of all lighting in the run via the integrated IR sensor switch.
- > Specially designed mounting brackets for simple installation. The over cabinet bracket slides along the fitting for desired positioning of the light.
- > The new elongated design allows for an increased spread of light across the worktop.

SLS
surface light source

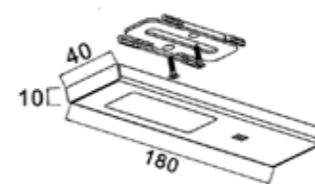

The non-sensor fitting can also be used with the Sensio range of switches and controllers.

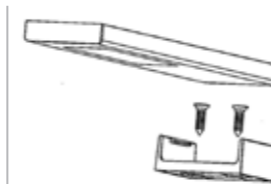

Buy the mounting bracket separately to transform the under cabinet light (without sensor) into an over cabinet light.

SE240920 - Mounting Bracket for Quadra SLS - £1.08

Under cabinet mounting (bracket provided with each fitting).

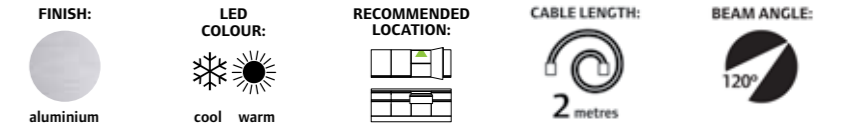

Over cabinet mounting (each bracket to be bought separately)

Optional accessories

Aluminium Cable Channel (SE7003AL) - £3.72
2.5m Extension Cable (SE9009) - £2.16

SLS Quadra LED In Cabinet Light

'improved design, unique to Sensio in the UK'

- > An upgrade from the original Quadra PLUS-I. Designed by Sensio in the UK this is a unique product design. **Design right number**
- > The specialised lens on this product diffuses the LED's to create the appearance of invisible diodes.
- > The integrated IR sensor operates the light as the cabinet door is opened/closed. With light coloured doors the fitting can be placed 50mm from the door. With dark coloured doors the distance is 25mm.
- > Featuring a higher number of LED's than the original Quadra range for an improved light output.
- > Specially designed mounting bracket for simple installation.
- > The new elongated design allows for an increased spread of light across the worktop.

SLS
surface light source

The latest LED technology COB LED Lighting...

HIGHER LIGHT OUTPUT

The lumen output achieved from COB is considerably higher than the HD and SLS equivalent products in the range.

ENHANCED EFFICIENCY

A low wattage of 3W is maintained per fitting, despite the considerably higher light output achieved.

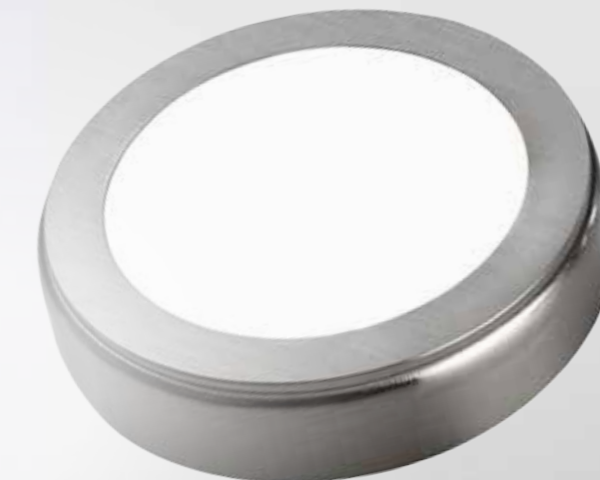

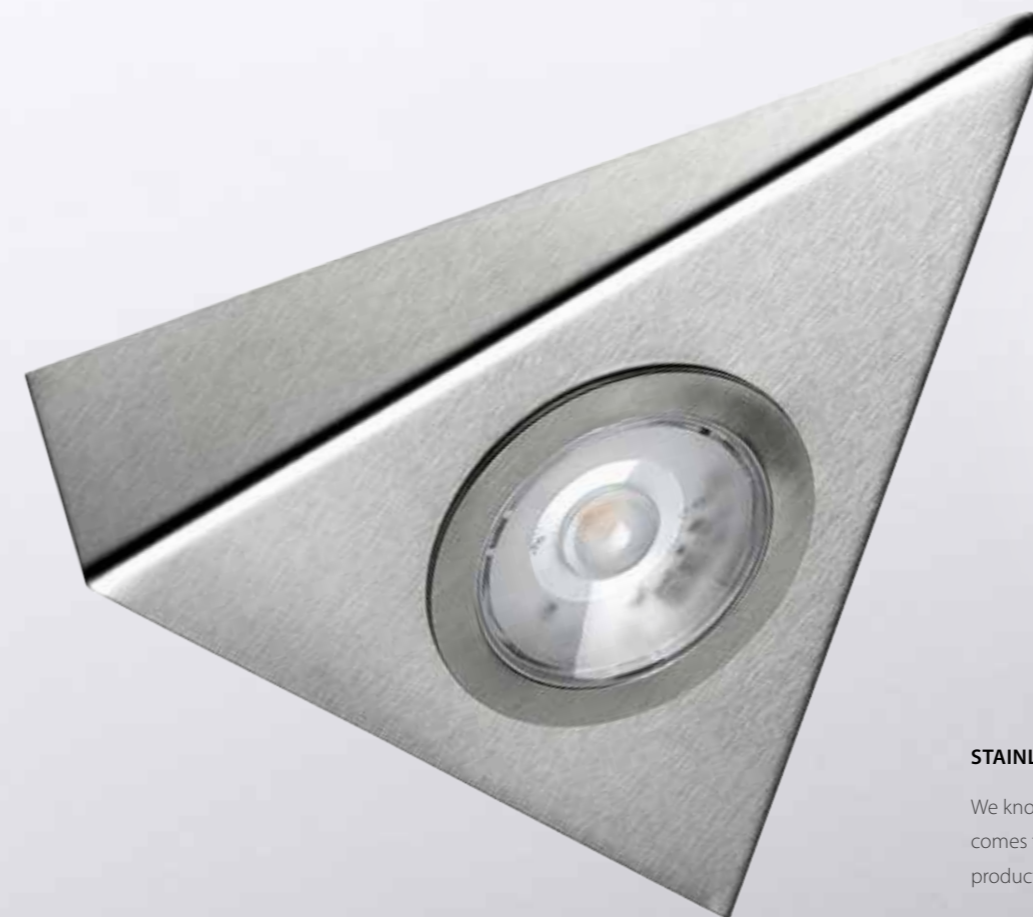

UNIFORM APPEARANCE

A single chip containing a tightly compact array of LED's.

We've perfected our introductory COB LED range

COB is the very latest in LED technology. Our introductory kitchen COB lighting range boasts a certain few distinct benefits over others on the market...

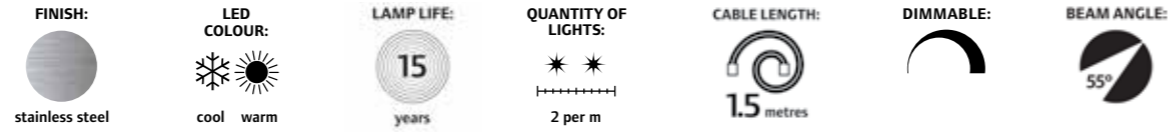

- Enhanced efficiency. Our COB fittings have a maximum efficacy of 95 lm/W.
- A higher light output. The lumen value of our cool white COB light is 285 lm.
- We know you prefer under cabinet spot lights in a stainless steel finish, so the products in our COB lighting range are only available in a stainless steel finish.
- Despite the high output of our fittings, we have maintained a low wattage of only 3W per fitting.
- Long lifespan of 35,000 hours.
- Uniform appearance. COB (chip on board) technology tightly compacts a high number of small LED chips, creating the effect of one lighting module as oppose to visible dots from individual diodes.

STAINLESS STEEL FINISH

We know this is your preferred finish when it comes to under cabinet spot lights. Our COB products are available in a stainless steel finish.

Venus COB LED Recess/Surface Light

'COB LED - the latest LED technology'

- > Guaranteed to provide a higher light output than other like-for-like products currently on the market*
- > COB LED is a unique configuration of closely compacted LED's. It provides enhanced efficiency, a higher light output and a more uniform appearance.
- > The fitting is supplied with the collar. Can be either surface or recess mounted.
- > This fitting has a maximum luminous efficacy of 95 lm/W.
- > Stainless Steel fitting available with either cool white or warm white LED, great for both contemporary and traditional kitchens.
- > Despite the high output of this fitting, a low wattage of 3W is maintained.
- > IP43 rated - suitable for use close to a sink (protected against direct sprays or splashes of water).
- > Switch/dim using Sensio sensors and controllers.

Plug & play 240V lighting. Anyone can install.

Using the simple connection method below, anyone can install the Nico under cabinet lights without the need for a Part P qualification.

SE21190C0/W0
Nico SLS LED Under Cabinet Light
-with male connector

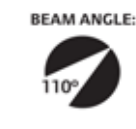

SE211750
Nico 1.5m Extension Lead
(optional)

SE211570
Nico 6 Way Distribution Block
- with 13A 3 pin plug top for
connection directly to the
mains supply.

Nico 240V LED Surface/Recessed Light

'anyone can install - our first 240V SLS fitting'

- > Surface Light Source (SLS) products are LED fittings with no visible LED points.
- > This fitting runs at 240V so no driver is required.
- > Extremely simple to install if you use the 6 way distribution block. Simply connect up to 6 of the Nico fittings into the ports on the distributor block and connect this directly to the mains supply (13A plug pre-wired to the SE211570).
- > When using the distribution block anyone can install these fittings - no need for Part P as it is all plug and play.
- > This fitting can be dimmed when used with a trailing edge dimmer.
- > Use as task lighting under cabinets or to illuminate cabinet interiors in glass fronted wall units.
- > Spacer included, fitting can be surface mounted or recessed.
- > Extremely long lamp life. This fitting will more than likely outlive your kitchen.
- > A much smaller and neater fitting than GX53.

Our first illuminated glass base shelf With more to come...

Here at Sensio, having our very own Product Design & Development department based in our UK office means that we can act quickly when we find something which is required.

The Nara is our first illuminated LED glass base shelf. This version has been designed to suit a particular cabinet specification. However, this is only phase one, we are already working hard on the next set of designs for alternative cabinet sizes.

Here are the benefits of the Nara Illuminated LED Glass Base Shelf;

High power LED strip on the front edge to provide high output task lighting.

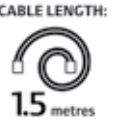

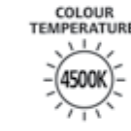

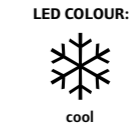

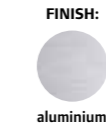

The illuminated glass creates a soft mood light.

The mounting brackets act as runners to slide the shelf into the cabinet. Makes the unit easy to replace if required.

Large range of lengths available.

Integrated Solutions >

Nara Illuminated LED Glass Base Shelf

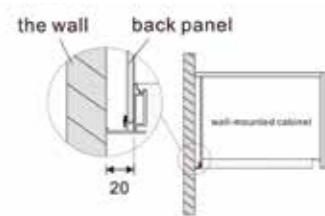

'integrated to create the most stunning effect'

- > Each fitting contains a high power LED strip on the front edge of the fitting, this throws a beam of light onto the worktop just where you need it for cooking etc.
- > The illuminated glass creates a diffused panel of mood lighting in the shelf on top of the high power task lighting.
- > Features a sliding mechanism which makes the fitting simple to replace should this be required down the line.
- > Each fitting contains a quick connect cable for simple installation.
- > A large range of lengths are available to suit different size cabinets.
- > Unlike other products on the market, you are not restricted to switching each shelf individually via an integrated sensor. With the Nara, integrate an IR sensor into the side panel of the cabinet to switch the full run of lighting with a single swipe.
- > Each shelf has a maximum weight load of 10kg.
