GAME CHANGER IN SOLAR LIGHTING

MARAMA SOL OFF GRID STREET LIGHT SYSTEM is designed specifically for outdoor off-grid applications where electricity from the grid is not available or is very unreliable.

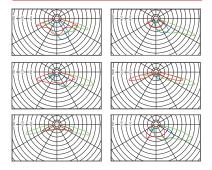

- MARAMA SOL luminaries are compact, easy to transport, easy to assemble, and easy to transform or upgrade using a system of modular components.
- Because it is an autonomous, self-managing, it requires little to no maintenance.
- MARAMA SOL functions on light-on-demand principle, turning light on when necessary, changing light intensity when appropriate, and optimising energy consumption when possible.
- The users have the option to intervene and change the system's plan. The lighting regime can be altered by just a couple clicks on a remote control.
- Photovoltaic panels are mounted vertically which optimises the collection of solar power and prevents the gathering of dirt, snow and bird droppings.
- The use of cutting-edge components and dimming functionality makes this solar system effective even in Northern countries lacking sunshine.

Good to know: MARAMA SOL is a future proof system, ready for ECOLIGHT's smart solar solution based on IoT (Internet of things) technology -ECOMAS.
