

NORTHCLIFFE

MAKING LIFE BRIGHTER

2019 CATALOG

ABOUT COMPANY

NORTHCLIFFE
MAKING LIFE BRIGHTER

NORTHCLIFFE LIGHTING is a customer focused, innovative solutions-driven company, which manufactures industrial lighting fixtures as well as provides lighting design and technical consulting services to customers worldwide. The company was established in 1993 with the business units in the UK, Ireland, Lithuania, Russia and Ukraine and since then it has become one of the largest independent lighting manufacturer in Central and Eastern Europe. Rapid growth has been achieved over the last 25 years with the current production capacity reaching 3.5 million lighting fixtures annually.

We constantly expand our distribution network and have business partners in more than 40 countries from all over the world.

Our mission is to make life brighter with the lighting solutions that are easy to install, and which are innovative, reliable and affordable with unsurpassed customer service. Present product range exceeds 5200 kinds of lighting fixtures for office, education and retail facilities, as well as for medical, industrial and outdoor environments. Our knowledge about lighting combined with a wide range of latest technology, energy-efficient and environmentally friendly solutions makes us the reliable partner for any project.

UK

LT

UK

EE

R&D plays an important role in our innovation process. As a result, we can cope with the most specific requirements and even create customised products. Working closely with customers there is a strong commitment to invest in technology, training and R&D activities to develop better products, services and more efficient lighting solutions.

One of our other advantages is the highest level of technical support. Our technical team is always ready to assist with the process of selecting the most suitable product for a specific application, as well as with designing, calculating and visualising lighting scenes for single rooms, whole floors or buildings and outdoor areas. Photometric data for NORTHCLIFFE LIGHTING fixtures can be downloaded from our website. These files enable lighting designers to create appropriate lighting layouts and scenes to meet their customers' preferences and regulatory requirements.

All our products are made using high quality components from reputable European suppliers. NORTHCLIFFE LIGHTING uses the most advanced technologies, some of them are unique and patented, to produce efficient products for easy installation, as well as for effective storage and transportation. 100% of our products are individually tested before leaving our factories and comply with provisions of EC Directives, harmonized standards, RoHS, technical regulation TR CU of the EurAsEC Customs Union and UkrSEPRO requirements.

NORTHCLIFFE LIGHTING is improving customer service and product quality using Quality Management System which is a management strategy aimed at awareness of quality in all organisational processes. QMS has been widely used in manufacturing, quality control, R&D department, education programs and customer service.

Quality Management System provides an umbrella under which everyone within the organization can strive and create customer satisfaction at constantly lower real costs. It is recognized that customer satisfaction can only be obtained by providing a high-quality product. Continuous improvement of the quality of the product is seen as the only way to maintain a high level of customer satisfaction.

ISO 9001

NORTHCLIFFE LIGHTING has accreditation for **ISO 9001** Quality Assurance Standards - a comprehensive evaluation that is concerned not just with quality, but with every aspect of company operations. It is a key feature of our constant effort to maintain exceptional standards of quality and service.

ISO 14001

NORTHCLIFFE LIGHTING cares about nature and is always looking for environmentally friendly solutions. **ISO 14001** is an environmental management system that exists to help organizations minimize how their operations affect the environment and comply with applicable laws, regulations, and other environmentally oriented requirements.

OHSAS 18001

The most crucial part of **NORTHCLIFFE LIGHTING** is our human resources. **OHSAS 18001** is a British Standard for occupational health and safety management systems. It exists to help all kinds of organizations put in place demonstrably sound occupational health and safety performance.

To make it easier for our potential customers to make the best informed choices we present our most popular products, which are offered at very competitive prices. We believe that this catalogue will help you to identify the best solutions and to make NORTHCLIFFE your reliable business partner for the future.

For further and most up-to-date information please visit www.northcliffe.org or send us an email to info@northcliffe.org

HOW TO USE THIS CATALOG?

Sarma LED 1x 3100 D739 T930 R40 DALI RAL9005

Family name: Sarma LED

Quantity of modules: 1x

Luminaire light output: 3100lm
Note: rounded luminaire output divided by number of modules, if quantity of modules higher than one

Factory code: D739

Light source: T930- Colour temperature 3000K, CRI 90+

Options:
R40 Reflector with 40° light beam angle
DALI Driver with DALI interface
RAL9005 Black colour body and adaptor
...

TECHNICAL DATA SHEET

SARMA LED

Product Group: Spotlights

Images for the product family and options:

Description: A cylindrical LED track light with symmetrical faceted reflector designed for the accent lighting
Reflector: faceted aluminum, 40° (standard), 24° and 60° beam angles
Diffuser: clear, 90/90

General data: Fixing voltage: 220-240V, 0/30-60Hz
Power factor: >0.95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime: In: 50000(L00850) (75000(L00850 low power versions))
Operating temperature range: °C: ta 0...+35
Protection class: IEC: I
Ingress protection code: IP20
Mechanical impact resistance: IK02
ES: I++

Installation: Surface luminaire is designed to be fixed into 4/8-conductors surface/recessed tracks. Track adaptor (3-phase + N) with phase selector
Environment: Indoor
Application: Retail, showroom, museum, exhibition, public place

LED IS THE TECHNOLOGY OF THE FUTURE

LED technology

LED (Light-emitting diode) technology is becoming more and more important in the world market of illumination, thanks to the numerous features which make it superior to other traditional light sources allowing savings of up to 80% of electricity for the same amount of emitted light.

The luminous efficiency of LEDs continues to reach higher values and already theoretical border of 300 Lumens per Watt is reached in laboratory conditions. LED are semi-conductor diodes which, when electricity passes through them, emit a monochromatic light. The Colour of the light depends on the type of impurity purposely inserted into the chip.

Efficiency table of different light sources

Long life time

A fundamental feature of LED is their long life as they can work above 100'000 hours as long as two fundamental requisites are respected: work temperature and voltage.

LED technology also offers other advantages:

- high mechanical resistance to stress and vibrations
- working in safe low voltage
- very high brightness efficiency and ongoing development
- extremely versatile in design and making of illuminating bodies
- no UV and IR emissions

Energy saving

Using LED technology substantial savings in electrical energy can be made keeping same illuminance level.

Test results in laboratory proves savings in energy consumptions switching from traditional lighting sources to LED technology

T8 luminaire 4x18W with magnetic ballasts consumes **88.2W**

LED luminaire **28,8W**

Note: up to 16,2 EUR can be saved every year, if used 9 hours per day (based on 0,12 EUR/kWh)

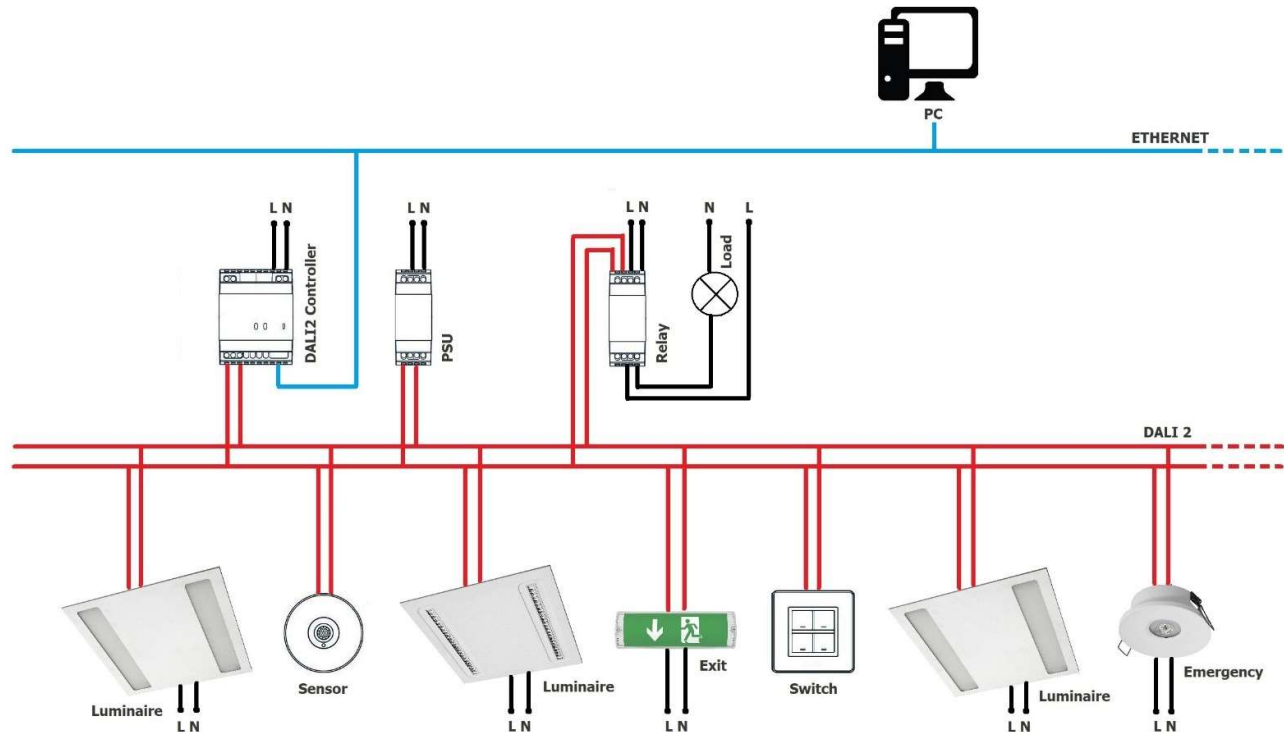

ILLUMINATION CONTROL SYSTEMS

Light plays a huge role in today's world and it goes far beyond the limits of simple illumination. However, it seems rather difficult to control such miracles as multifunctional illumination or light atmosphere changes in accordance with the situation. This problem could be solved by implementation of an illumination control system. Northcliffe offers illumination control systems, designed and developed by the leading European companies.

Illumination control system unites all the light sources in the building and gives an opportunity to control each of them individually from any location. Such system allows controlling illumination as much as possible, starting from illumination control in one room and extending to its control in as many premises as necessary, even having difficult configurations.

Illumination control system could be integrated into the general control scheme of other components, such as an alarm system, media etc., in such way improving the efficiency of service.

The cost-effectiveness and possibility of illumination sources self-adjustments seems to be one more obvious benefit of the system.

The range of illumination control systems is quite wide. The simplest one is a standard combination of several light scenarios, preprogrammed in the central control unit. This option is the best solution for small premises, such as cafes, separate rooms in the apartments, cottages, offices, director's rooms, presentation rooms, bars, saunas, restaurants, cinemas, boutiques etc.

Upon the requests of a client, the system could be adjusted to a more sophisticated one. In such case, a special illumination design is drawn. Such individual complex designs are realized through the adoption of multiple control units corresponding between each other. The more difficult project is, the easier solution with the help of illumination control system can be provided.

Energy savings with illumination control systems

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

SDIM SOLUTION

SDIM, also known as a touch control with a push button, is a system that enables the simple and economic dimming of luminous flux. It uses the mains voltage as a control signal, applying it with a standard push button on a control line, without any need for specific controllers. SDIM enables you to perform the basic functions of a regulation system with a power-free pushbutton. It is possible to switch the luminaires on or off or dim them, depending on how long the button is pressed. Switching the light on or off is done by short, sharp pressing or "click". If the button is pressed for a longer time it is possible to dim the luminous flux between the maximum and minimum levels alternately.

Cost effective meeting room

INDEPENDENT DETECTORS

RECESSED PIR VERSIONS

RPIR3m is a compact PIR detector for flush ceiling mounting. Having a detection field of 7m at a mounting height of 2.8m, this sensor is ideal where automatic turning on when a room is occupied, and off when the room is vacated. Lux level and timer can be simply set up via push button operation (P).

Key features:

- Lux level sensing
- Presence detection switching
- Adjustable timer
- Maintained illuminance (daylight harvesting) system (D variants only)

General data:

Mains voltage: 230V+/-10%, 50Hz
 Switching load: 3A
 Operating temperature range, °C: ta -10...+35
 Protection class IEC: II
 Ingress protection code: IP40 or IP54
 Dimensions: 76x76x65
 Mounting hole: Ø64mm
 Weight: 0.15kg

Products:

- RPIR3m Integrated presence and lux level sensing sensor (PIR) with on-off control
- RPIR3mP Integrated premium presence and lux level sensing sensor (PIR) with on-off control
- RPIR3mD Integrated premium presence and lux level sensing sensor (PIR) with DALI control
- RPIR3mIP Integrated IP54 premium presence and lux level sensing sensor (PIR) with on-off control
- RPIR3mIPD Integrated IP54 premium presence and lux level sensing sensor (PIR) with DALI control

Detection diagram

Height 2.8m
 Detection range 7x7m

Sensor functionality

Lux level switching

The RPIR3m has a built-in adjustable lux sensor which will keep the lighting switched off if there is sufficient natural light. The Lux level is set using the Lux Button on the front of the sensor.

No presence detected, daylight, lights off

Presence detected, sufficient daylight, lights off

Presence detected, insufficient daylight, all lights on

No presence detected, lights off

Switch Level On/Off-P and D variants only

Occupancy detection can be made dependant on the ambient light level using the Lux On Level and Lux Off Level parameters.

TECHNICAL DATA SHEET

Explanation of presence and absence

The Detection Mode can be set to behave in Presence or Absence mode:

-Presence When movement is detected the load will automatically turn on. When the area is no longer occupied the load will automatically switch off after an adjustable time period.

-Absence The load is manually switched on. When the area is no longer occupied the load will automatically switch off after the adjustable time period has elapsed. In either case, sensitivity to movement of the PIR sensor can be adjusted using the Sensitivity parameter.

Note: To assist in setting the Sensitivity, turn on the Walk Test LED which will flash red when movement is detected.

The choice between presence and absence detection for different spaces can make a big difference in user-friendliness and the amount of energy saved.

Presence Detection: Detectors will switch on lighting automatically when a person enters the room and switch off lighting automatically when no movement is detected.

Absence Detection: Upon entering the room the person switches on the light as normal, when no movement is detected the detector switches off the lighting automatically. Lights can also be switched off manually.

Maintained Illuminance (daylight harvesting) - D and IPD variants only

The detector measures the overall light level in the detection area and calculates the correct output for the luminaires, to achieve a pre-set lux level (maintained illuminance or daylight harvesting)

Basic programming – RPIR3mP and RPIR3mD variants

The functionality of the RPIR3mP, RPIR3mD are controlled by a number of parameters which can be changed or programmed by any of the following devices: infrared PIR handset or infrared PIR handset with LCD. For most basic programming operations the infrared HBPIR handset can be used and the following procedures are based on using this device. Point the handset at the Sensor and send the required programming commands to the unit.

Note:

For optimum operation of the lux sensor, the lens must shielded as much as possible from the light source.

Avoid direct sunlight entering the sensor.

Do not site within 1m of forced air heating or ventilation.

Do not fix to a vibrating surface

Applications:

TECHNICAL DATA SHEET

SURFACE PIR VERSIONS

SPiR3m is a surface mounted presence detector with easy push button set up, that provides auto on/auto off switching. Having a detection field of 7m at a mounting height of 2.8m, this sensor detects movement using PIR sensor and turns the load on. When an area is no longer occupied the load will switch off after an adjustable time out period. An adjustable internal light sensor provides additional energy saving in lighting applications. When an area is occupied, lighting is only switched on when the level of natural light falls below a pre-set level.

Key features:

- Lux level sensing
- Presence detection switching
- Adjustable timer
- Maintained illuminance (daylight harvesting) system (D variants only)

General data:

Mains voltage: 230V+/-10%, 50Hz
 Switching load: 3A
 Operating temperature range, °C: ta -10...+35
 Protection class IEC: II
 Ingress protection code: IP54
 Dimensions: 96.5x96.5x50
 Weight: 0.15kg

Products:

SPiR3m Integrated presence and lux level sensing sensor (PIR) with on-off control
 SPiR3mP Integrated premium presence and lux level sensing sensor (PIR) with on-off control
 SPiR3mD Integrated premium presence and lux level sensing sensor (PIR) with DALI control

BUILD-IN MW SENSOR

The motion detector can turn on the light based on movement. With this detector built in, light is automatically on when needed and off when not.

- Key settings:**
- Sensitivity
 - Hold-time
 - Daylight sensor

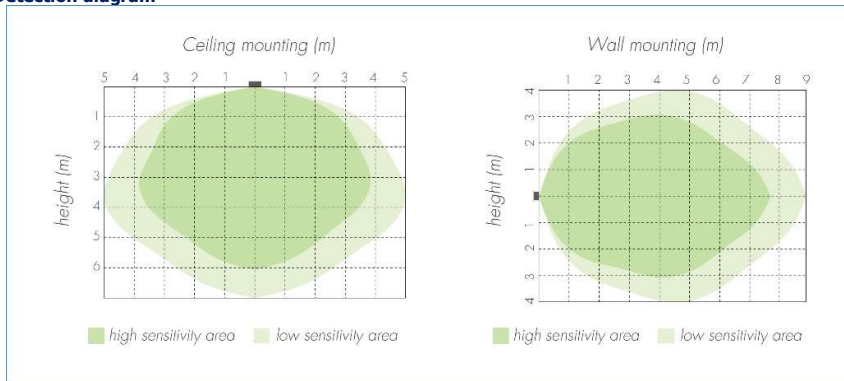

General data:

Mains voltage: 220-240V, 50/60Hz
 Switching load: 3A
 Operating temperature range, °C: ta -20...+60
 Protection class IEC: II
 Ingress protection code: IP20
 Dimensions: 80.4x36.5x23.5mm
 Weight: 0.15kg

Products:

MW Integrated microwave (MW) motion sensor with on-off control

Detection diagram

Height 3m
 Detection range 10x10m

Sensor functionality

Lux level switching

The motion detector can turn on the light based on movement. With this detector built in, light is automatically on when needed and off when not.

The light keeps off during daytime even when movement is detected. (Ambient lux level is above pre-set daylight threshold)

With movement and insufficient ambient lux level, the light is triggered on by the detector

If there is no more movement, the light turns off automatically after hold-time pre-set

Applications:

TECHNICAL DATA SHEET

BUILD-IN MW SENSOR WITH INTERGRATED RF COMMUNICATION

This is a combination of motion sensor and RF radio wave wireless transmission. The motion detected by 1 sensor (the master unit) can pass onto other pre-defined individuals (the slave units) through RF transmission. Thanks to fixed address code technology, it's easy to set up transmission groups. By using the rotary coding switch, up to 16 different groups can be created. With both 1-10V output signal and 220-240V signal, it can switch on/off and dim the luminaire in different applications. Digital receiving and transmitting method, high anti-interference capability.

Key features:

- 24-hour daylight monitoring dawn/dusk sensor
- Tri-level dimming control based upon occupancy (also known as corridor function)
- 1-10V dimming control method
- Fast and simple commissioning/grouping of wireless sensor by the rotary switch

General data:

Mains voltage: 220-240V, 50/60Hz
 Switching load: 5A
 Operating temperature range, °C: ta -35...+70
 RF transmission distance: 30m indoor, 50m outdoor
 Protection class IEC: II
 Ingress protection code: IP20
 Dimensions: 102x54x28mm
 Weight: 0.15kg

Products:

- MWRFM+** Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave.
Functions: Staircase, Corridor, dimming control
- MWRFM+off** Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave.
Functions: Staircase, Corridor, (no dimming control)
- MWRFM** Integrated microwave (MW) motion sensor with integrated RF (radio wave) transmitter. Sensor can serve as master.
Functions: Staircase, Corridor, dimming control
- MWRFS+** Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave.
Functions: Staircase, Corridor, dimming control
- MWRFS+off** Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave.
Functions: Staircase, Corridor (no dimming control)
- MWRFS** Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave.
Functions: Staircase, Corridor, (no dimming control)

Detection diagram

Function and Options

This is a combination of motion sensor and RF wireless transmission, which is the perfect solution for retrofit projects, easy installation and free of wiring. The transmission can reach 30 meters indoor and 50 meters in the open area. Up to 16 different groups can be easily created by the rotary coding switch. Once there is motion detected, the master can trigger unlimited number of slaves as long as they are within the transmission range. The slave unit can respond to one or two group(s) of master(s) respectively.

Sensor functionality

Lux level switching

The motion detector can turn on the light based on movement. With this detector built in, light is automatically on when needed and off when not.

The light keeps off during daytime even when movement is detected. (Ambient lux level is above pre-set daylight threshold)

With movement and insufficient ambient lux level, the light is triggered on by the detector

If there is no more movement, the light turns off automatically after hold-time pre-set

TECHNICAL DATA SHEET

24h Daylight Monitoring Function (for master only)

The innovative software enables sensor's antenna with built-in daylight sensor to provide a "smart photocell" function. This function is activated when stand-by period is set to "+∞".

Settings on this demonstration:
 Hold-time: 10min
 Daylight threshold: 50lux
 Stand-by dimming level: 10%
 Stand-by period: +∞

The light switches on at 100% when there is movement detected

The light dims to stand-by level after the hold-time

The light remains in dimming level at night

① ↔ ③ goes in cycle at night ...
 100% on when movement detected, and dims to 10% in long absence.

The light turns off completely when natural light lux exceeds daylight threshold pre-set

The light automatically turns on at 10% when natural light is insufficient (no motion)

Staircase application (MWRFM+ serves as both master and slave)

While the 1st sensor detects motion, it switches on 100%, and the 2nd one goes to stand-by brightness.

The person walks to the 2nd floor, the 2nd sensor at 100% and the 3rd sensor goes to stand-by brightness.

The person walks to the 3rd floor, the 3rd sensor switch on 100% and the 4th goes to stand-by brightness. At the same time, the 1st sensor dims to stand-by brightness after hold time.

The person walks to the 4th floor, the 4th sensor is 100% on and the next goes to stand-by brightness. At the same time, the 1st sensor goes off after stand-by period and the 2nd sensor dims to stand-by brightness.

Note: By selecting the brightness DIP switch, the slave can either be 100% on or go to stand-by dimming level upon receiving the RF signal from the master.

Staircase and corridor application (MWRFM+ as both master and slave, MWRFS+ as slave)

While the 1st sensor detects motion on the 1st floor, it switches the light on 100% and sends signal to all slave units. All MWRFS+ on the 1st floor turn on 100% and the MWRFM+ on the 2nd floor goes to stand-by level

The person walks to the 2nd floor, the 2nd MWRFM+ switches the light on 100%. All MWRFS+ on the 2nd floor turn the light on 100% and the MWRFM+ on the 3rd floor goes to stand-by level

When walks to the 3rd floor, the 3rd MWRFM+ switches the light on 100%. All MWRFS+ on the 3rd floor turn the light on 100% and the MWRFM+ on the 4th floor goes to stand-by level. Meanwhile, the lights on the 1st floor are dimmed to stand-by level after hold-time

The person walks to the 4th floor, the 4th MWRFM+ switches the light on 100%. All MWRFS+ on the 4th floor turn the light on 100% and the next MWRFM+ goes to stand-by level. Meanwhile, all sensors on the 1st floor turn the light off after stand-by period, and all lights on the 2nd floor dim to stand-by level after hold-time

Note: the lights in the corridor go off directly after hold-time if controlled by MWRFS+off

TECHNICAL DATA SHEET

Carpark application (MWRFM as master and MWRFS+ as slave)

With sufficient natural light, the sensor is not triggered by motion

With insufficient natural light, the sensor is triggered by motion, the master switches on the light and send RF signal to all slaves

After the hold-time, the whole group of lamps dim to pre-defined dimming level when no movement detected
Note: the lights go off directly after hold-time when controlled by MWRFS+off

The whole group of lamps switch off automatically after the stand-by period

Applications:

EAIR SENSOR WITH WIRELESS COMMUNICATION AND GROUPING POSSIBILITIES

EAIR is the ideal solution for per-luminaire control of new luminaires. It combines occupancy sensing, daylight harvesting and task tuning in a single, compact package for easy luminaire assembly. An intuitive app makes configuration and commissioning during and after installation fast and easy. EAIR with advanced grouping functionality enables addition of qualified wireless switches. Up to 40 sensors can be grouped to a switch using Apps. In addition to easily adding user control to a space, the grouping feature facilitates auto-off/manual-on use cases. Furthermore, advanced grouping allows scene setting (e.g., presentation mode for a conference room) as well as occupancy sharing (i.e., luminaires within a group can be programmed to remain at prescribed light levels so long as occupancy is detected anywhere in the group)

General data:

Operating temperature range, °C: ta 0...+55
 Protection class IEC: II
 Ingress protection code: IP20
 Dimensions: 50x19x24
 Mounting hole: 43.5x16mm
 Weight: 0.02kg

Products:

EAIR Integrated smart sensor and driver with wireless communication and grouping possibilities for lighting control

Detection diagram

The detection area for the movement sensor can be roughly divided into two parts:

- Minor movement (person moving ≤ 0.9 m/s)
- Major movement (person moving ≥ 0.9 m/s)

Height	Minor Movement		Major Movement	
h	Y1	X1	Y2	X2
2.4 m	2.9 m	2.7 m	4.5 m	2.9 m
3 m	3.6 m	3.4 m	5.4 m	3.6 m

Note: Longer dimension of detection area (Y1, Y2) is parallel to longer dimension of EAIR sensor

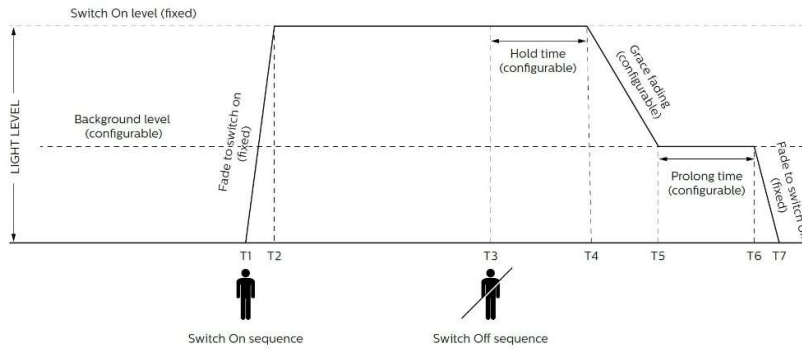

The switch from conventional to LED lighting already brings considerable energy savings. Incorporating EAIR wireless sensors into luminaires takes the potential savings to an even higher level. Sensors enable presence detection and sunlight harvesting, which when used in combination, can generate savings of up to 50%. By providing presence and daylight sensing in a single unit, EAIR are perfect for connected lighting. Offices, meeting rooms, corridors and open-plan spaces can benefit from the energy-saving and enhanced operational efficiency of connected lighting

Sensor functionality

All parameters are stored in the sensor, and most of the parameters can be configured through NFC or IR.

- **Fade to switch-on/off time.** Fade to switch-on time is the time (T1 to T2) from the point at which occupancy is detected until the lights dim up to the max light output. This timer is set to 0.7 sec and is not configurable.
- **Hold time.** Hold time is the time (T3 to T4) from the point at which the last movement has been detected (e.g., occupant left the room) until grace time starts. This timer is set to 15 minutes by default and can be configured from 1 – 120 minutes.
- **Grace fading time.** Grace fading time is the time from T4 to T5 during which the lights are being dimmed down from the current light level to the background level. By default, grace fading time is 10 sec and can be configured to 0 – 25 seconds.
- **Prolong time.** Prolong time is the time from T5 to T6 at which the background level is maintained at a fixed level. Default prolong time is 15 minutes and can be configured from 0 – infinity.
- **Fade to switch-off time:** Fade to switch-off time is the time (T6 to T7) for the lights to fade from background level to off after prolong time is expired. This timer is set to 0.7 sec and is not configurable.
- **Field task level:** Field task level is used to configure the required light level on the task plane. Setting this to 100% enables the installed maximum light level. A lower percentage level can be configured to set the new maximum light level of the luminaire through the app.
- **Background level:** Background level is a light level significantly lower than 100%, used to save energy when space is not occupied.
- **Occupancy mode selection:** Occupancy mode selection can be configured to meet energy code and maximize control flexibility with adding wireless switches. The mode options are auto-on/auto-off, manual-on/manual-off and manual-on/auto-off.
- **Eco-on level:** Eco-on level is a configurable switch-on light level. This parameter also enables partial-on occupancy based control to meet energy code. Eco-on level should be a percentage level between the field task level and background light level.
- **Group occupancy sharing:** Group occupancy sharing is a configurable feature to allow EasySense to share its local occupancy detection status and control lights accordingly. As long as presence is detected within the group, the luminaires stay on at the background light level/field task light level (configurable) in non-occupied areas.
- **Group light behavior:** Group light behavior is a configurable light level for the luminaires in non-occupied areas while there is occupancy detected elsewhere in the group.

TECHNICAL DATA SHEET

Group occupancy sharing

EAIR includes a unique feature that enhances energy savings while maintaining aesthetics of the space. Through use of group occupancy sharing, luminaires provide full light output at occupied workstations and lower background light level at unoccupied workstations. The sensors in a defined group know if there is occupancy elsewhere in the group and will not turn off until the entire group is unoccupied. The group occupancy sharing feature can be enabled (default)/disabled through the EAIR field apps. The group lighting behavior can also be configured to background light level or task light level. With the group occupancy sharing disabled, the luminaire does not share its occupancy status with other luminaires or respond to the occupancy detection from the rest of the group. After installation, a group of up to 40 luminaires can be created easily and quickly using the EAIR field apps.
Note: During the group occupancy sharing, daylight harvesting still occurs automatically if enabled.

An open office application

Here is an example of the group occupancy sharing behavior in an open office application.

1. Empty office. Light are off.

2. As people enter, lighting in their area dims up to "task level." Others in the group dim up to "background level."

3. As additional people enter, lights in their area dim up to "task level."

4. As more workers enter, the lights dim up accordingly.

5. When the space is fully occupied, all lights are on "task level."

6. As people go to lunch or meetings, lights gently dim down to a configured "background level."

TECHNICAL DATA SHEET

7. As people begin leaving for the day, additional lights dim down.

8. As the space empties, more lights dim down to the background.

9. After the last worker leaves, lights turn off after a configured "prolong time."

10. Lights turn off after a configured "prolong time."

Scene setting

Light settings for meeting and conference rooms need to be flexible to fulfill a variety situational requirements. For example, audiovisual presentations may require lower light levels near the screen versus a regular meeting requiring uniform lighting on the task level. EAIR together with wireless switches and the EAIR field apps enables easy lighting configuration remotely for two scenes after the installation.

The wireless switch comes with four buttons:

- Top left button: On/Dim-up
- Bottom left button: Off/Dim-down
- Top right button: Scene 1
- Bottom right button: Scene 2

Once a scene button is pressed, the group of lights goes to the preset light level and does not respond to daylight variation any longer.

A conference room for presentations

1. Empty conference room. Lights are off.

2. Pressing "On" brings lights to "task level."

3. Pressing "Scene 1" takes lighting to pre-defined "presentation level."

EAIR supported app

EAIR sensors can be easily configured using app via IR dongle or NFC (Near Field Communication):

- Configuration of parameters;

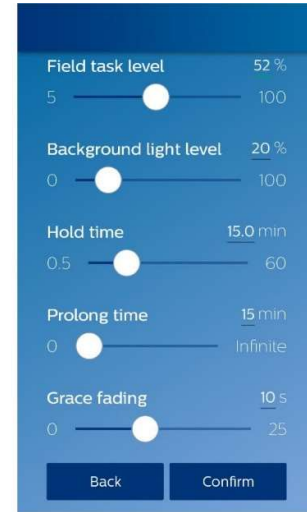

- Energy reporting:

- *Total consumed energy;*
- Accumulated consumption reported by the driver connected to the sensor through the entire lifetime of the driver;
- *Average power consumption:* Total consumed energy / System on time;
- *Percentage time the light has been on:* (Luminaire on time / System on time) * 100;
- *System on time:* Time the driver was powered on through the entire lifetime of the driver;
- *Lamp on time:* Time the LED strip connected to the driver was on (any dim level other than off) through the entire lifetime of the driver.

-Grouping options: Multiple luminaires can be added in the groups. For proper grouping it is recommended to limit the number of luminaires (sensors) in a group to 40;

-Configuration of scenes: It is possible to store scenes on a 4-button wireless switch. A scene is a light level setting of the luminaires that can be saved on the switch;

-Maintenance of the system: Installer test, reset of network settings, reset of the parameters, change of luminaire channel.

The IR dongle must be plugged in the headphones jack of the smartphone for easier commissioning of luminaires
Maximum mounting height: 16m
Ambient temperature range: -30...50°

Applications:

ACT + SELF-LEARNING SOLUTION FOR LED LIGHTING

ACT+ is an out-of-the-box standalone solution consisting of an LED driver and small sensor, already built into the luminaire. Luminaires fitted with ACT+ solution are ideal for refurbishment projects, as well as for new offices, corridors, open plan areas and storage areas. Allows to renew office lighting by using existing wires and switches, to make it more energy efficient without any programming. As a standalone solution, ACT+ has no need in physical or electrical connection to any other external lighting components such as control panels, dimmers or common sensors.

Key features:

- Stand-alone, inbuilt lighting control solution for LED luminaires
- Fully automatic setup through smart learning function
- Optimized occupancy detection for different situations
- Light level compensation over entire life cycle (CLO)
- Automatic daylight harvesting
- No programming, configuration or external control wiring

General data:

Operating temperature range, °C: ta -20...+50

Control range: 5...5000lux

Protection class IEC: III

Ingress protection code: IP30

Dimensions: 32.4x1.5x14.5mm

Weight: 0.02kg

Note: The temperature difference between the detection target and the background must be at least 4 °C

Products:

ACT+ Integrated self-learning sensor and driver for lighting control

Detection diagram

Light sensor viewing angle: 60°
Presence sensor viewing angle: 80°

Height	Detection range
3.0m	5x5m

If the area becomes vacant, human presence isn't detected and the lighting isn't needed in the environment the ACT+ sensor send signals to the luminaire to go into energy saving mode. It dims the light smoothly so the change of lighting level doesn't disturb other people sitting or working nearby. In areas with windows energy additionally is saved by daylight harvesting. The ACT+ functionality also prevents daylight sensors in luminaires in close proximity to each other from interacting and starting to malfunction (so called waving effect). Constant lumen output (CLO) functionality reduces initial over-illumination, and ensures that the light output level can be guaranteed during the whole life time of the LED module. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals.

Energy saving

ACT+ sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%.

Constant light output

Energy saving is achieved when the daylight harvesting and the occupancy detection are activated. The initial light level is set at approximately 85-90 % to avoid over-illumination of new luminaires (CLO). This is close to the designed luminaire light level, which will be maintained over the entire life cycle generating further energy saving. The sensor fade down time is made slow enough (3.5 min) to make reduction in light level invisible for the eye.

Self-learning

Utilising 60-100 hours of automatic learning, ACT+ learns about the surrounding environment and detects changes in lighting conditions from other luminaires and light sources. Or ACT+ Mobile app, can be used to set desired parameters for each single fitting by the end user, Android supported mobile device which has a flashlight, would do the work.

Advantages of Active+

Simple installation: Luminaire fitted with ACT+ is as easy to install as a simple switched luminaire. No control wiring, programming or configuration is needed.

Self-learning: ACT+ sensor uses 60-100 hours to learn about its environment - external daylight conditions, and other luminaires around it.

OR

Via-flashlight: parameters transferred to system using Android phone flashlight.

Smart energy savings: Compared to a simple switched luminaire, ACT+ brings added features - presence detection, daylight harvesting and seamless and comfortable dimming.

Note: If there is a need to restart the learning process, i.e. during a layout change of an office, the luminaires can be reset to start the learning period. You can reset either a single luminaire or an entire electrical circuitry with multiple luminaires.

Applications:

DAYLIGHT SENSOR DLIGHT FOR SIMPLE SETTING OF CONSTANT LIGHT LEVEL

DLIGHT is a very small light sensor that enables simple, automatic constant light control. Significant energy savings can be achieved in various applications such as offices, schools, factories, airports and shopping centres.

- Key features:**
- Very small profile
 - Simple setting of the constant light level
 - Start up at full level
 - Smooth dimming operation, 1.5 minutes setting time

General data:

Control voltage: 1-10VDC
 Operating temperature range, °C: ta 5...+55
 Control range: 200...600lux +/-50lux
 Protection class IEC: III
 Ingress protection code: IP20
 Dimensions: 23x23x19
 Mounting hole: Ø24x22mm
 Weight: 0.01kg

Products:

DLIGHT Integrated daylight sensor and dimming driver for simple setting of constant light level

Detection diagram

Position DLIGHT sensor so that it sees both natural and artificial light, but neither should be dominant. Do not position DLIGHT where a direct light source (lamp, sun, reflection etc.) is within the DLIGHT viewing angle 45°. Viewing angle: 45° average, 42-52° depending on aperture Mounting height: max. 5m

DLIGHT will monitor both natural and artificial light, adjust the rotary top shell to set the desired constant overall light level.

Keeps constant light level combining daylight and artificial light. Using DLIGHT sensor and 1-10V controllable drivers, fittings could be arranged in groups or act as individual units depending on illumination requirements. Substantial savings could be achieved.

Simple classroom application

Applications:

HUMAN CENTRIC LIGHTING

Human Centric Lighting (HCL), which can also be called human factors in lighting, biophilia or other terms, is becoming the next big step in lighting. It may become more significant than Edison creating the light bulb, because not only can HCL provide good visual lighting quality, energy efficiency and sustainability at a reasonable cost, it can also improve circadian rhythms, short- and long-term alertness, sleep, mood, visual acuity, perception and performance–productivity. HCL provides both visual acuity and biologic benefits.

In addition to daylight, specialized fixed spectral content and tunable (dimming and Kelvin or Colour changing) LED products with advanced controls are already available and cost effective and should become standard for business, education, hospital, residential and most other applications much sooner than most people think. Within five years, and maybe as little as three, people will probably look back and wonder how they lived with that old lighting. Remember how it was before you had a smart phone! The wellbeing and performance–productivity benefits, which may be called 'soft' savings, usually dwarf the typical 'hard' savings of lower electrical bills and reduced maintenance costs. What is very important is that HCL provides both 'hard' and 'soft' savings. HCL shows the real value of lighting and makes lighting much more than a commodity, which is how most people have been considering it for decades. So now is a perfect time for HCL, and it can be considered a wasted opportunity not to.

TW Integrated light source and driver for Tuneable white control 2700-6500 K

Harmony with the Earth’s natural lighting cycle

Claiming that better lighting can improve health is a big supposition. That said, it is not outlandish to state that carefully designed lighting can aid, even correct, circadian rhythms in human beings. Over time, people have evolved in harmony with the Earth’s natural lighting cycle, which has low light levels and low correlated Colour temperatures (CCT) in the early morning, high light levels and high CCTs at mid-day, low light levels and low CCTs during evening, and extremely low light levels and a medium CCT under moonlight. These varying light levels are at the heart of a human being’s 24-hour internal clock, otherwise defined as circadian rhythm. Until 200 years ago, 90% of our waking time was spent outside. Now most of us spend 90% of our time indoors with electric lighting. While we’re at work, our lighting is usually set at one light level with a constant CCT—this is not consistent with circadian rhythms. Without regular and direct exposure to such dynamic lighting, the circadian rhythm can be disrupted, which could lead to health issues. Specifically, light and darkness control hormone production. During the day, with a natural circadian rhythm, appropriate amounts of dopamine are secreted for pleasure, alertness and muscle coordination; serotonin for impulse control and carbohydrate cravings; and cortisol for stress response. During the night, melatonin allows for sleep, and refreshes our body. Recent research, specifically, the discovery of intrinsically photosensitive retinal ganglion cells (ipRGC) in our bodies, has been found to be very important in setting one’s internal clock, so to speak. They are especially responsive to light that is rich in blue content, the mid-day sky, for example, which can be up to 10,000K. This is particularly notable in that blue light content suppresses melatonin and encourages dopamine, serotonin, and cortisol production, meaning greater exposure to it during the day can lead people to be more alert and productive at work, or even during night shifts. At the same time, at night, such melatonin disruption can create sleep issues.

CCT change using LED light sources can be obtained, mixing warm and cool light by adjusting opposite sides intensity. It also can be obtained mixing some specific colours LED’s, getting better results, but at much higher costs.

Benefits and merit of HCL

- Individual, human centered illumination
- Natural light simulation
- Better comfort, health, productivity and sleep
- Supports circadian circle.
- HCL can be implemented as standalone, as well as bigger systems solution

Human Centric Lighting control options

- There are two simple ways to control dimming and Kelvin or Colour changing:
- Using a smart device like smartphone or a tablet;
 - Using a push button (switch dimming)

Two-Colour temperature (2700K or 6500K) light source possible coordinate change of range and deviation from Planckian curve

WIRELESS CONTROL OF LUMINAIRES

BLT is a wireless control unit for LED luminaires DALI dimming interface and acts both as a controller and as a power supply making it possible to connect directly with DALI interface without the need for an external DALI power supply. This so-called Standalone DALI makes it possible to implement multi-channel lighting systems with adjustable color (RGB) or color temperature, while keeping the wiring and number of components at their minimum.

BLT is controlled wirelessly with BLT smartphone and tablet applications using Bluetooth 4.0 protocol. Devices form automatically a secure wireless mesh network so that a large number of fixtures can be controlled from any point. No external gateway module is needed. BLT can be controlled also from a standard on/o wall switch.

Key features:

- Wirelessly controllable
- No need for an external gateway device
- Forms automatically a fast-wireless mesh network
- Digital output: Standalone DALI
- Easily implemented RGB and color temperature controls
- Controllable switched mains output
- Dimming from standard on/off wall switches
- Device firmware can be updated over-the-air
- BLT cloud service enhances user experience

General data:

Mains voltage: 220-240V, 50Hz
 Switching load: 0.6A
 Operating temperature range, °C: ta -20...+40/50
 Transmission distance: 30m indoor, 50m outdoor
 Protection class IEC: II
 Ingress protection code: IP20
 Dimensions: 56.5x35.8x22.3mm
 Weight: 0.05kg

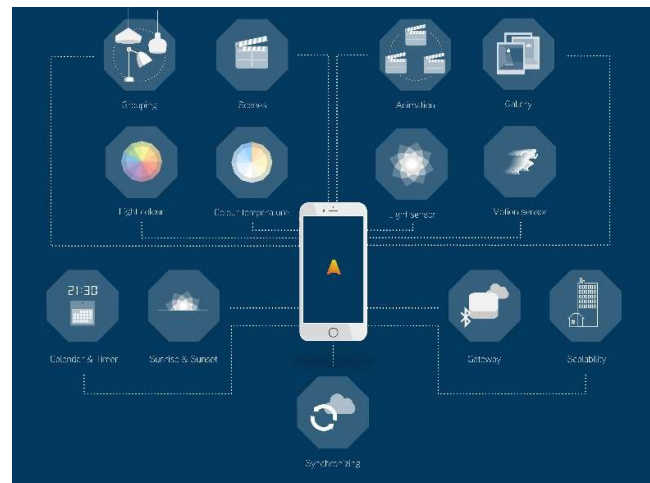

Products:

BLT Integrated wireless control unit and driver for lighting control via mobile device (via Bluetooth)
 BLT TW Integrated light source, wireless control unit and driver for Tuneable white control 2700-6500 K via mobile device (via Bluetooth)

Funcionality

The BLT lighting control solution provides for all the control options that are expected from a full featured professional lighting control solution:

- **Grouping:** Grouping luminaires in the BLT app is very easy. Grouping works with the same gestures as grouping apps in your smart device. After grouping, all the luminaires in the group can be controlled all together or the group can be opened for individual control
- **Scenes:** Different lighting situations for different occasions can be created. It is possible to control multiple luminaires with one tap to create the perfect ambience for different occasions and needs. One luminaire can be used in several scenes
- **Animations:** Animations are dynamic scenes, where it is possible for the lighting to fade from one scene to another scene. Animations can be recalled to cycle through different lighting situations once or they can be set on repeat. The duration of each scene and the fade times between scenes can be set
- **Gallery:** BLT's unique gallery feature makes control more intuitive than ever. Users simply take photos of a space, or upload a floor plan to the app, and mark the positions of the luminaires. The images then appear in a gallery in the app, with luminaires shown, and users simply tap the one they want to control
- **Light colour:** BLT offers a comprehensive colour controlling possibility. A luminaire manufacturer can define the limits of the BLT Ready luminaire's colour range beforehand. A user can change the colour in a simple manner from the app and also save his/her favorite colours in a colour palette
- **Colour temperature:** BLT offers a comprehensive colour temperature control. A luminaire manufacturer can define the limits of the BLT ready Tunable White luminaire beforehand so it appears with the correct levels in the BLT App. A user can change in a simple manner the colour temperature for the luminaire just by sliding the finger on top of a luminaire icon

- **Daylight sensor:** The control solution allows dimming of artificial lighting when daylight is available for achieving maximum lighting quality and reduced energy consumption. Daylight sensors measure the illuminance and report the lux values to the network. Sensors may be standalone or integrated into luminaires
- **Occupancy sensors:** The BLT lighting control system supports movement sensors, also overlapping movement sensor information. Motion sensors can be used to save energy and only to have lighting on when it is actually needed
- **Control hierarchy:** The BLT "Control hierarchy" allows a co-operation between manual lighting controls (the app, switches and push buttons) and automated lighting controls (sensors and timers) allowing different kinds of overrides and modifying the lighting control solution to fit all needed control logics
- **Calendar & Timer:** With the calendar and timer functionality scenes and animations can be turned on and off based on a convenient time, date or certain weekdays to fit users' needs, seasons and different activities. All the BLT units keeps track of time
- **Sunset & Sunrise:** BLT units are able to calculate the local sunrise and sunset times, provided that the network's time zone and location are set. When the location is requested the application is temporarily using GPS to retrieve the current location of the mobile device
- **Gateway:** With the gateway functionality a BLT network can be accessed remotely. It is possible to control BLT enabled luminaires remotely as well as change network settings (requires administrator rights). To enable the remote access functionality an iOS or an Android device needs to be working in the BLT network as a gateway
- **Scalability:** The BLT system is scalable and is suited equally well for small one room solutions as for big building complexes. The BLT solution is based on networks and an unlimited number of networks can be created. BLT also offers possibilities to turn on and off several networks at the same time or scenes that combines luminaires across networks
- **Synchronization:** The BLT devices are smart on their own. All the intelligence is replicated in each node leaving no single point of failure. The system itself is self-organizing and in constant synchronization. In this kind of fully distributed and symmetric architecture any unit can go offline and catch up from others when they return back online

TECHNICAL DATA SHEET

Solution

Lighting as experience

It is more than just a light switch. With a tap on your smartphone you can set the ambience for study, watching a movie, or a romantic dinner

Practical daily use

You can still use your existing wall switches. They will have a new life: use them as dimmers and control many lamps with one switch

Easy to install

You don't need any new wiring, switches, devices or networks. Plug in the lighting fixture and pair it with your phone or tablet. No other configurations needed

Delightful to use

You can control your lights with an intuitive and visual user interface on your smartphone or tablet

Bluetooth Low Energy:

The BLT solution is based on Bluetooth Low Energy, the state-of-the-art wireless technology and the only low power wireless technology in all modern smartphones, tablets and even smart watches, making it the only mainstream and future proof low power radio technology in the world

Wireless Mesh Network:

On top of Bluetooth Low Energy, the BLT technology provides a mesh network where all the intelligence of the system is replicated in every node and, in such a way, creates a system with no single points of failure. Such self-organizing wireless mesh network can control a large number of fixtures from any point. It also allows for firmware updates over the network, allowing any kind of changes to be made over-the-air. In this kind of fully distributed and symmetric architecture, any unit can go offline and catch up from others when they return back online. The BLT devices are smart on their own and only connected when needed. An Internet connection is not necessary for normal operation, it is just needed for user interface configurations to be sent or recalled from the cloud service

App:

The BLT app works as one of the user interfaces in a BLT lighting control solution, as the commissioning tool and as well as a remote gateway. The BLT app works with iOS as well as Android devices, like smartphones, tablets and smartwatches. The app is free to download by any end user.

The BLT app is made by user interface experts and in a way, that anyone- regardless of technical proficiency- can use it. Therefore, the BLT app is equally well suitable for the professional lighting market as well as the residential field.

User Interfaces:

BLT offers a big variety of possibilities for a user to interact with the lighting depending on the user's individual requirements. The app for smartphones, tablets and smartwatches is the most elaborated user interface. Besides the app, traditional wall switches, push buttons, BLT's own scene controllers and many other control points can be used.

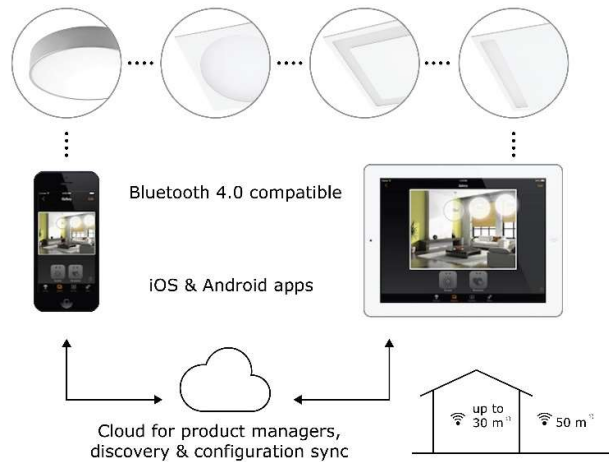

Luminaires:

BLT technology works with number of Northcliffe luminaires, creating an optimal solution in terms of ease of installation and functionality with minimal additional hardware and deployment costs. See list of available options in end of description

Applications:

Solution Architecture

HIGHBAY HBPIR7m SENSOR

The HBPIR7m series of miniature PIR (passive infrared) presence detectors provide automatic control of lighting loads with optional manual control using an infrared handset. It is specifically designed for mounting onto a batten or waterproof style luminaire. Two models are available: on/off and DALI all of which will switch incandescent, fluorescent, compact fluorescent and LED lighting. The unit detects movement using a PIR sensor and turns the load on. When an area is no longer occupied the load will switch off after an adjustable time out period. The units are IP65 rated as standard and are therefore suitable for outdoor use as well as wet and wash-down areas. A selection of fixing washers are supplied to aid fixing to a variety of luminaires. All functionality is fully programmable using an IR handset.

General data:

Mains voltage: 230V+/-10%, 50Hz
 Switching load: 2A
 Operating temperature range, °C: ta -10...+35 (tmin-30C version with ta -30...+35 optional)
 Protection class IEC: II
 Ingress protection code: IP65
 Dimensions: 123x33x28
 Mounting hole: Ø20x17mm
 Weight: 0.10kg

Products:

HBPIR7m Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
 HBPIR7mD Integrated PIR sensor for high ceiling (up to 7 meters) with DALI control
 HBPIR7mtmin-30C Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control suitable for low ambient temperatures up to -30°C
 HBPIR7mDtmin-30C Integrated PIR sensor for high ceiling (up to 7 meters) with DALI control suitable for low ambient temperatures up to -30°C

Detection diagram

Height 2.8m 7m
 Detection range 9x9m 16x16m

Sensor functionality

Detection mode

Presence. When movement is detected the load will automatically turn on. When the area is no longer occupied the load will automatically switch off after an adjustable time period.

Sensitivity to movement of the PIR sensor can be adjusted using the Sensitivity parameter.

Note: To assist in setting the Sensitivity, turn on the Walk Test LED which will flash red when movement is detected.

Switch Level On/Off

Occupancy detection can be made dependant on the ambient light level using the Lux On Level and Lux Off Level parameters.

Maintained Illuminance (daylight harvesting) - DD and AD variants only

The detector measures the overall light level in the detection area and calculates the correct output for the luminaires, to achieve a preset lux level (maintained illuminance or daylight harvesting).

Basic programming – HBPIR7m and HBPIR7mD variants

The functionality of the HBPIR7m, HBPIR7mD are controlled by a number of parameters which can be changed or programmed by any of the following devices: infrared HBPIR handset or infrared HBPIR handset with LCD. For most basic programming operations the infrared HBPIR handset can be used and the following procedures are based on using this device. Point the handset at the Sensor and send the required programming commands to the unit.

Note:
 For optimum operation of the lux sensor, the lens must shielded as much as possible from the light source.
 Avoid direct sunlight entering the sensor.
 Do not site within 1m of forced air heating or ventilation.
 Do not fix to a vibrating surface
 Special order versions that can be used down to -30°C (tmin-30C)

HIGHBAY HBPIR12m SENSOR

The HBPIR12m high-bay occupancy sensor is specifically designed for high mounted areas such as warehouses, manufacturing and other high ceiling applications. It is a self-contained sensor and relay that turns individual light fixtures on/off based on occupancy in the detection zone. It comes with three interchangeable lenses for use in either a 360° high-bay or 360° low-bay general area or an aisle way. The HBPIR12m provides reliable coverage up to 12,2m mounting heights.

- Fast, easy time delay setting: can be set at any time without requiring power to the sensor; time delay is variable from 30s-30m
- Auto temperature calibration: automatically adjusts the PIR sensitivity as ambient temperature rises to increase detection of heat movement through the field-of-view
- Return to last state: for safety and energy savings, the sensor contains a latching relay so that in the event power is lost to the device, the device will return to the last known state of the relay

General data:

Mains voltage: 230V+/-10%, 50/60Hz
 Switching load: 4A
 Operating temperature range, °C: ta -10...+65
 Protection class IEC: II
 Ingress protection code: IP65
 Dimensions: 89x89x32
 Mounting hole: 22x19mm (rounded corners)
 Weight: 0.15kg

Products:

HBPIR12m Integrated PIR sensor for high ceiling (up to 12 meters) with on-off control
 SHBPIR12m Surface-mounted PIR sensor for high ceiling (up to 12 meters) with on-off control

Detection diagram

Height	Aisle range	High-bay range	Lowbay range
3m	4x8m	8x8m	12x12m
6m	6x12m	12x12m	20x20m
9m	6x16m	16x16m	
12m	6x20m	20x20m	

Definition

PIR

MW

Passive Infrared (PIR): A line of sight beam that reacts to heated motion across a field of view. It is a type of sensor technology, where no energy is emitted from the sensor.

Microwave (MW): It is a type of sensor technology, which sends out microwave pulses (active) and measures the reflection off a moving object. Similar to a police radar gun.

A warehouse aisle application

Here is an example of the luminaires with HBPIR12m sensor behavior in a warehouse application, when each fitting is switched on/off individually.

Surface Mount SHBPIR12m Occupancy Sensor is designed simply to automatically turn lights on/off. The sensor utilizes Passive Infrared Technology (PIR) combined with lenses to determine when an area is occupied. This is determined when a heat source is detected and moves from one facet in the lens to another. The sensor recognizes this as a motion and provides power to the light fixture. Simultaneously a timer is started and restarts with each motion, once expired, the lights will turn OFF. The SHBPIR12m sensor maximizes energy savings, incorporating false detection algorithms to eliminate false ONs by nuisance tripping or background environmental conditions. The sensor also optimizes energy savings and safety concerns during power loss scenarios by assuming a return to last known state of operation.

A warehouse aisle application

Here is an example of the luminaires behavior in a warehouse application, when group is power by one of three SHBPIR12m sensor located in beginning, middle and end of the aisle

HIGHBAY HBPIR15m SENSOR

The HBPIR15m PIR (passive infrared) presence detector provides automatic control of lighting loads with optional manual control. The HBPIR15m is a high sensitivity PIR detector suitable for high bay applications, such as warehouses and factories, and where high detection sensitivity is needed. It is specifically designed for mounting onto a high-bay style luminaire. Two models are available: on/off and DALI. The unit detects movement using a PIR sensor and turns the load on. When an area is no longer occupied the load will switch off after an adjustable time out period. The units are IP65 rated as standard and are therefore suitable for outdoor use as well as wet and wash-down areas. All functionality is fully programmable using an IR handset.

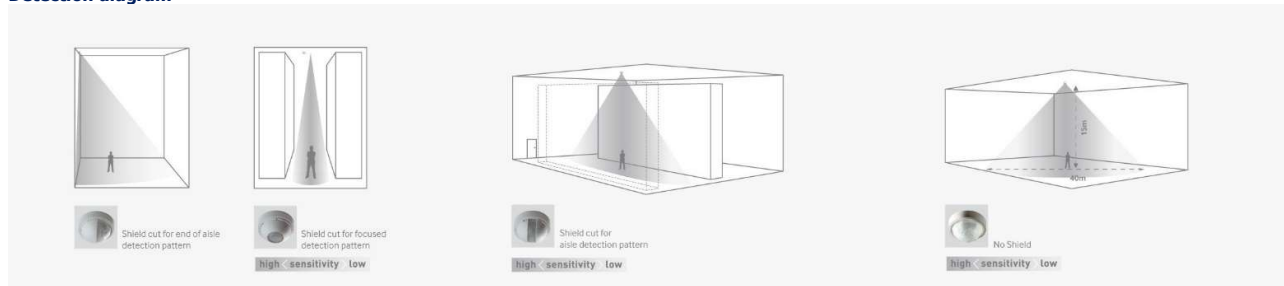

General data:

Mains voltage: 230V+/-10%, 50Hz
 Switching load: 2A
 Operating temperature range, °C: ta -10...+35 (tmin-30C version with ta -30...+35 optional)
 Protection class IEC: II
 Ingress protection code: IP65
 Dimensions: 151x80x74
 Mounting hole: Ø20x17mm
 Weight: 0.15kg

Products:

HBPIR15m Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control
 HBPIR15mD Integrated PIR sensor for high ceiling (up to 15 meters) with DALI control
 HBPIR15mtmin-30C Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control suitable for low ambient temperatures up to -30°C
 HBPIR15mDtmin-30C Integrated PIR sensor for high ceiling (up to 15 meters) with DALI control suitable for low ambient temperatures up to -30°C

Detection diagram

Note: maximum mounting height 20m

Height	Detection range
3m	9x9m
6m	16x16m
10m	26x26m
15m	40x40m

The HBPIR15m includes two clip-on masking shields to allow for precise masking of the detection shape. The masks can be easily shaped to produce detection patterns suitable for applications such as aisles and corners and for narrowing the detection diameter.

Sensor functionality

Detection mode

Presence. When movement is detected the load will automatically turn on. When the area is no longer occupied the load will automatically switch off after an adjustable time period. Sensitivity to movement of the PIR sensor can be adjusted using the Sensitivity parameter.

Note: To assist in setting the Sensitivity, turn on the Walk Test LED which will flash red when movement is detected.

Switch Level On/Off

Occupancy detection can be made dependant on the ambient light level using the Lux On Level and Lux Off Level parameters.

Maintained Illuminance (daylight harvesting) - DD and AD variants only

The detector measures the overall light level in the detection area and calculates the correct output for the luminaires, to achieve a preset lux level (maintained illuminance or daylight harvesting).

Basic programming – HBPIR7m and HBPIR7mD variants

The functionality of the HBPIR7m, HBPIR7mD are controlled by a number of parameters which can be changed or programmed by any of the following devices: infrared HBPIR handset or infrared HBPIR handset with LCD. For most basic programming operations the infrared HBPIR handset can be used and the following procedures are based on using this device. Point the handset at the Sensor and send the required programming commands to the unit.

Note:

For optimum operation of the lux sensor, the lens must shielded as much as possible from the light source.

Avoid direct sunlight entering the sensor.

Do not site within 1m of forced air heating or ventilation.

Do not fix to a vibrating surface

Special order versions that can be used down to -30°C (tmin-30C)

HIGHBAY HBEAIR SENSOR WITH WIRELESS COMMUNICATION AND GROUPING POSSIBILITIES

Fixture mounted HBEAIR sensors ensure lighting is only on when and where it is needed. The sensors in combination with can bring huge benefits in terms of energy management as they provide occupancy detection and daylight sensing for heights up to 16 meters. Energy saving - typically between 30% and 50%. HBEAIR can be easily programmed via an Android smartphone, that offers immense flexibility to commission luminaires into groups and further divided in zones wirelessly. HBEAIR includes advanced grouping functionality which enables occupancy sharing and zoning capability. Up to 40 sensors can be operated together in a single group, and the group can then be divided into a maximum of 6 zones. With this advanced functionality, the group can be programmed such that a zone comes up to full light level upon motion detection while other zones dim up to a lower background light level. This enhances energy savings while still providing lighting in adjacent areas. Application: warehouses, assembly areas, cold rooms.

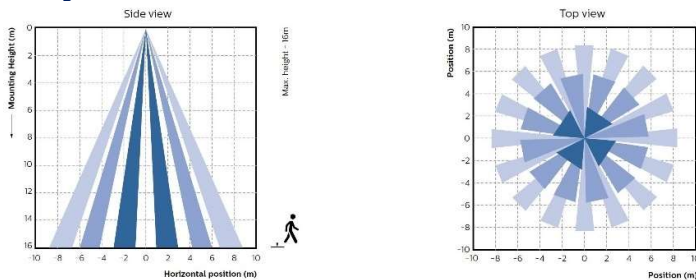

General data:

Mains voltage: 220-240V, 50/60Hz
 Operating temperature range, °C: ta -30...+65
 Protection class IEC: II
 Ingress protection code: IP65
 Dimensions: 121x115x43
 Mounting hole: Ø20mm
 Weight: 0.15kg

Products:

HBEAIR Integrated smart sensor for high ceiling (up to 16m) and driver with wireless communication and grouping possibilities for lighting control

Detection diagram

Height	Detection range
4m	3x3m
8m	8x8m
12m	12x12m
16m	16x16m

Group occupancy sharing

The traditional approach to energy savings is wattage reduction, which often results in light levels below recommended practice. Moreover, luminaires with standalone lighting controls create so-called checker board look on the ceiling. HBEAIR overcomes these problems with smart luminaires through grouping and zoning features; provide full light output at occupied aisles and lower background light levels at unoccupied aisles. The aesthetics of the space is maintained with a background light level that won't turn off luminaires until the entire group is unoccupied. The group occupancy sharing feature can be enabled (default)/disabled through the HBEAIR Field Apps. The group lighting behavior can also be configured to background light level or field task light level. With the group occupancy sharing disabled, the luminaire does not share its occupancy status with other luminaires or respond to the occupancy detection from the rest of the group. After installation, a large lighting group of up to 40 luminaires can be created easily and quickly using the HBEAIR Field Apps. With default settings, as long as occupancy is detected by any luminaire in the group, the luminaires are turned on at task light level while the rest of luminaries in non-occupied areas of the group stay on at the background light level.

Note: During the group occupancy sharing, daylight harvesting occurs automatically

Daylight harvesting

The daylight-based control is disabled by default in the HEAIR. When daylight control is enabled, the light sensor auto-calibrates when power to the driver is cycled. It takes at least 5 auto-calibration cycles (i.e. 5 power cycles) for the new calibration setpoint value to be effectuated. The light level of the luminaire is bound by the field task level (maximum light level) and the background level (minimum light level). If the background light level is set to be 20%, the light will only dim to 20% during daylight harvesting. When daylight-based control is disabled, the auto-calibration sequence will not occur. Daylight-based control is not active after the hold time of the occupancy sensor expires. Figures show examples of lighting control using both daylight and occupancy. When the daylight level is low and an occupant is present, the luminaire light level is inversely proportional to the daylight level. Assuming the incoming daylight level is constant, the luminaire light level remains the same until the hold time expires, after which the luminaire light level fades to the background light level, staying at that level for prolong time. When the daylight level is high, the luminaire light level is proportional to the daylight level. However, when there is an abundance of daylight, the luminaire light level does not dim lower than the background light level.

TECHNICAL DATA SHEET

Sensor functionality

Full-On Sequence (Default)
Eco-On Level = Task Level

Parameters for lighting control

All the lighting control parameters are stored in the sensor, and it is possible to configure most of these parameters through NFC or IR. Figure shows a pictorial representation of the occupancy based lighting control.

-**Fade to switch on/off time:** Fade to switch-on time is the time (T1 to T2) from the point at which occupancy is detected until the lights dim up to the max light output. This timer is set to 0.7 sec and is not configurable.

-**Hold time:** Hold time is the time (T3 to T4) from the point at which the last movement has been detected (e.g. occupant left the room) until grace time starts. This timer is set to 15 minutes by default and can be configured from 1 – 120 minutes.

-**Grace fading time:** Grace fading is the time from T4 to T5 during which the lights are being dimmed down from the current light level to the background level. By default, grace fading time is 10 sec and can be configured to 0 – 25 seconds.

-**Prolong time:** Prolong time is the time from T5 to T6 at which the background level is maintained at a fixed level. Default prolong time is 15 minutes and can be configured from 0 – infinity (This would ensure that the lights never switch off).

-**Fade to switch-off time:** Fade to switch-off time is the time (T6 to T7) for the lights to fade from background level to off after prolong time is expired. This timer is set to 0.7 sec and is not configurable.

-**Field task tuning level:** Field task tuning level is used to configure the required light level on the task plane. Setting this to 100% enables the installed maximum light level. A lower percentage level can be configured to set the new maximum light level of the luminaire through the app.

-**Background level:** Background level is a light level significantly lower than 100%, used to save energy when space is not occupied.

-**Group occupancy sharing:** Group occupancy sharing is a configurable feature to allow HBEAIR to share its local occupancy detection status and control lights accordingly. As long as presence is detected within the group, the luminaires stay on at the background light level in non-occupied areas.

-**Group light behavior:** Group Light Behavior is a configurable feature that allows to choose how the other luminaires in the group respond to occupancy detected by a luminaire in the group. The options are background light level and field task level.

-**Occupancy mode:** Occupancy mode is a configurable light level for the luminaires in non-occupied areas while there is occupancy detected elsewhere in the group, there are 3 options to choose from:

Auto-on/off mode: Lights are switched on and off automatically based on occupancy detection and time delay settings.

Manual-on/auto-off: Lights are turned on manually through a wireless switch and turned off automatically, as a vacancy sensor.

Manual-on/off: Lights are turned on and off manually through a wireless switch. This mode simply does not make use of the occupancy sensing functionality.

-**Daylight based control:** When daylight based control is enabled and if occupancy is detected, the luminaire(s) remains always switched on at the calibrated light level based on daylight harvesting as discussed above. In case enough daylight is available, this situation leads to higher energy costs.

-**Daylight dependent switching:** When daylight based control is enabled and as long as the occupancy is detected, the luminaire never switches off the light. Even at the brightest daylight levels, the luminaire dims down to background light level; this situation leads to higher energy costs. With Daylight dependent switching (DDS) functionality, if there is enough daylight the sensor switches off the luminaire leading to lower energy costs. The sensor switches off the light when:

the luminaire is already switched on and

an "Auto On/Off" occupancy mode has been configured and

the measured light level on the local sensor is above the threshold value (150% of the daylight regulation setpoint) for more than 15 minutes. The 15 minutes is reset as soon as one of the above conditions is not met. The fade time for turning off the light is ~30 seconds.

The sensor switches on the luminaire(s) when:

the light level on the local sensor is below the daylight regulation setpoint and

there is presence, either local or elsewhere, detected in the room. A "Manual On" request overrules DDS, the luminaire(s) switch on and the time period of 15 minutes is reset. This is because the user expects light control when pressing a button manually.

TECHNICAL DATA SHEET

-**Daylight dependent override:** With Daylight dependent override (DDO) functionality, in the presence of sufficient daylight along with occupancy detection, the luminaire(s) will not switch on until the daylight levels become insufficient i.e. below the daylight regulation setpoint. From that moment, the output light levels are switched on and adjusted to compensate the lack of daylight. In this way, energy costs are reduced. In other words, when DDO is enabled, the sensor keeps the lights switched off while maintaining enough light in the room for the end user when:

- the lights were initially switched off due to a vacant room and presence, either local or elsewhere in the group, was detected and an "Auto On/Off" occupancy mode has been configured and the measured light level is higher than 150% of the daylight regulation setpoint.

When the measured light level drops below the daylight regulation setpoint, the lights switch on again.

Grouping and Zoning

Grouping allows multiple luminaires to connect with each other using a Zigbee network and broadcast occupancy status. The grouped luminaires can be configured for desired behavior for presence detection based on installer settings, e.g. the light behavior of the rest of the luminaires can be configured for maximum brightness (called as 'field task level' in further documentation) or background light level.

Zoning allows sub-grouping of luminaires. In an industrial setup such as warehouses, it would be beneficial to have an aisle turn on to field task level while adjacent aisles switch on and go to background light level on presence detection. In another scenario, if a forklift truck enters a very long aisle, it would be beneficial to only bring the first 5 luminaires, for example, to maximum brightness/field task level and the rest of the luminaires in the aisle to background light level. This avoids the tunnel effect, driving or walking into a dark tunnel or lighting up the whole aisle unnecessarily.

A warehouse aisle application

Here is an example of the group occupancy sharing and zoning behavior in a warehouse application.

1. Luminaires can be grouped together or further divided into zones

2. Luminaires in top aisle dim up to task level by zones when motion is detected

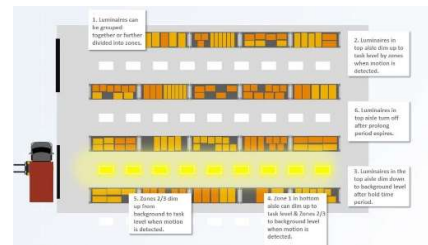

3. Luminaires in the top aisle dim down to background level after hold time period

4. Zone 1 in bottom aisle can dim up to task level and Zones 2/3 to background level when motion is detected

5. Zones 2/3 dim up from background to task level when motion is detected

6. Luminaires in top aisle turn off after prolonged period expires

Note:
Place heat radiating devices outside of the monitoring cone
Avoid drafts (e.g. from ventilators or heating systems)

CORRIDOR FUNCTION

Luminaires with built in corridor function are a very simple and highly efficient way of reducing energy consumption. Wherever light has to be provided 24-hours a day for statutory reasons, the corridor function helps provide the right light, combined with energy-efficient and cost-effective operation. Automatic switching is based on presence/motion with the time delay set on site to suit the customers' requirements, where no presence is detected the light level will fade from 100% down to 10% saving up to 60% of the energy usage. The corridor function does not abruptly switch off the lighting but dims it to a 10% level. Depending on the profile selected the device remains at this light level ("never off" profile) or switches off completely after the appropriate delay ("Switch off" profile). This economical form of 24-hour lighting is ideal for pedestrian underpasses, underground train stations, stairwells, ATM booths, telephone kiosks, hotels, public buildings and hospitals.

Product

COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min)
COR30min	Driver with Corridor function 30min (switch off after 30 min)
MW	Integrated microwave (MW) motion sensor with on-off control

Functionality

COR option:

Standard profile "Never OFF" (A...100 %, B...10 %, Fade time 32 s, never OFF).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached. This corresponds to the default parameters.

COR1min option:

Profile 2 "Switch off" (A...100 %, B...10 %, Fade time 32 s, switch off after 1 minute).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached and if presence is not detected in the next minute the ballast switches off completely.

COR30min option:

Profile 3 "Switch off" (A...100 %, B...10 %, Fade time 32 s, switch off after 30 minutes).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached and if presence is not detected in the next 30 minutes the ballast switches off completely.

Corridor application

The luminaires stay at 10% light output

When movement is detected by the in-built micro sensor, the luminaire increases its output to 100%

After a period of time when the micro sensor does not detect any further movement, the luminaire will revert to 10% light output as standard

The luminaires remain at 10% light output

Or go off, if switch off time was pre-programmed

EMERGENCY LIGHTING SOLUTIONS

The majority of Northcliffe Lighting luminaires can be equipped with various emergency kits for different markets and different applications.

Products

EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
EM3LER	Emergency version 3 hours, lens for escape route
EM3LOA	Emergency version 3 hours, lens for open areas

Emergency kit options

EM3 (NOVA LED): The emergency converter Nova LED is universal design for use with the majority of LED luminaires that work with constant power drivers. It is an emergency battery pack that uses electronic circuitry to convert energy stored in the battery into the DC voltage and current necessary to drive the LED load. The unit can be installed as maintained or non-maintained unit and it allows the same LED fixture to be used for both normal and emergency operation. Each unit includes the battery pack, LED charge indicator, a test switch and the emergency power module.

EM3B: The emergency converter using the best available technology in the market, designed for use with the majority of LED luminaires. Each unit includes the battery pack, LED charge indicator and the emergency power module. A test switch can be installed optional.

EM3A: The emergency converter with self-test function which is universal for use with the majority of LED luminaires. Luminaires with autonomous testing system includes automatic self-diagnostic at regular intervals. Every seven days the correct performance of the module, the light and the battery is tested. Once per year the capacity of the batteries is tested simulating a mains failure and making a performance test. Two-colour status display LED indicator signalizes mains power supply and battery charge. The luminaire with autonomous testing system also has a deep discharge protection.

EM3D: The emergency converter with DALI interface and automatic test function which is universal for use with most LED luminaires and compatible with all dimmable and non-dimmable systems. All emergency units are individually addressable. Individual programming option makes it possible to use functions which transcend the DALI standard. Once per year the capacity of the batteries is tested simulating a mains failure and making a performance test. Two-colour status display LED indicator signalizes mains power supply and battery charge. The luminaire with autonomous testing system also has a deep discharge protection.

Series of EM3LOA and EM3LER emergency kits is the newest line of options that combines highly efficient LED light sources and the latest optics, designed to illuminate open areas or escape routes. A high specification LED emergency version provides high performance emergency lighting in commercial buildings where aesthetics is of prime importance, such as offices, retail or hospitality and leisure facilities. Whereas typical escape route emergency luminaires need to be spaced at every 3 to 7 metres to achieve the required illumination level, EM3LOA and EM3LER optimised optics can provide spacing up to 17 metres along the escape routes and up to 9 metres in the open areas, depending on ceiling height, that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance.

EM3LOA: The emergency converter with additional source of light. This unit will provide 2W maximum output power at emergency mode. It is designed to be highly efficient and highly reliable. There are four functions on this unit: overcharge; over discharge; over temperature and reverse battery protection. This emergency kit works as a non-maintained, provides emergency lighting for open areas. When the mains fail, the spotlight will provide illumination for 3 hours. The emergency spotlight is simply installed in the body of the luminaire.

EM3LER: The emergency converter with additional source of light. This unit will provide 2W maximum output power at emergency mode. It is designed to be highly efficient and highly reliable. There are four functions on this unit: overcharge; over discharge; over temperature and reverse battery protection. This emergency kit works as a non-maintained, provides emergency lighting for escape route illumination. When the mains fail, the spotlight will provide illumination for 3 hours. The emergency spotlight is simply installed in the body of the luminaire.

Photometry of EM3LOA/EM3LER

L1- distance from the wall to the first fixture
L2- distance between fixtures
H- height of the ceiling

LER optic for corridor route illumination:

EM3LER- 2W/184lm min. 1lx		
H, m	L1, m	L2, m

3,00	8	18,5
3,50	8	20
4,00	8	20
4,50	7	20
5,00	5	20
6,00	3,5	15

LOA optic for open area illumination:

EM3LOA- 2W/118lm min. 0,5lx		
H, m	L1, m	L2, m
2,5	3,5	8
3	4	9
3,5	4,5	10
4	4,5	11
4,5	5	11,5
5	5	12
6	5	13

Applications:

NIGHT SWITCHES

WALL_MOUNTED NIGHT SWITCH

Night switch is a device with a built-in photo-sensor which measures ambient brightness and automatically switches on connected lighting fixtures when darkness falls and switches off again at the dawn. Other OFF settings are available like 2, 4, 6 or 8 hours after dusk. Switch-On Level can be set from 3 to 1000 lx.
Application: outdoor.

General data:

Mains voltage: 220-240V, 50Hz
Switching load: 5A
Operating temperature range, °C: ta -20...+50
Protection class IEC: II
Switching delay, s: 15-30
Response brightness: 3 – 1 000 lx
Additional Features: variable switching level „Delay Off“ - 2, 4, 6, 8 Hours
Colour: white
Ingress protection code: IP55
Dimensions: 105x79x36mm
Weight: 0.15kg

Products:

NIGHTSWITCH

IP55, photo-sensor measures ambient brightness and switches ON/OFF, white

Functionality:

Nightswitch measures ambient brightness and automatically switches on connected lighting fixtures when darkness falls and switches off again at the dawn.

Note: Make sure that the NIGHTSWITCH is not affected by light from light fixtures to which it is connected (by light shining directly on the sensor)

BUILT-IN NIGHT SWITCH

Mini-night switch PCA switches lighting fixture ON or OFF, at the same time it can be mounted into IP protected light fitting serving as standalone solution. The built-in photo-sensor records the brightness of the surroundings and switches the connected lighting fixture on at dusk and off again at dawn.
Application: outdoor, built-in solutions

General data:

Mains voltage: 220-240V, 50/60Hz
Switching load: 5A
Operating temperature range, °C: ta -20...+75
Protection class IEC: II
Switching delay, s: 15-30
Response brightness: 35 lx
Colour: transparent
Ingress protection code installed: IP66
Dimensions: 53.5x31.5x44mm
Weight: 0.06kg

Products:

PCA

Photocell 20mm miniature type, IP65, 35 lux; 1:05 ratio

Functionality:

The product is made up of a special lens arrangement developed to maximise acceptance angle, improving accuracy and consistency of switching. Additionally, the range uses superior quality components throughout and includes a predictive load transfer switching algorithm to minimise switching stresses

Applications:

DIMMING OF LED STREET LIGHTING

LED street lighting dimming feature helps to flexibly adapt street and outdoor lighting to the varied nightlife of cities and municipalities and enables big energy savings. It offers three different control and dimming functions in one electronic control gear:
 DALI – digital interface for bi-directional communication
 CDIM – dimming with the help of a control line
 ADIM – autonomous two-level dimming

Products:

- DALI Driver with DALI interface
- CDIM Driver dimming with the help of a control line
- ADIM Driver with autonomous two-level dimming

CDIM – midnight step-down switch is used in installations where a control line (switched phase) is available in addition to the power line. The switched phase is connected to the terminal board of street lighting fixture and an external actuator is used to start and end dimming. The dimming parameters (e.g. dim levels and fade times) are factory pre-set.

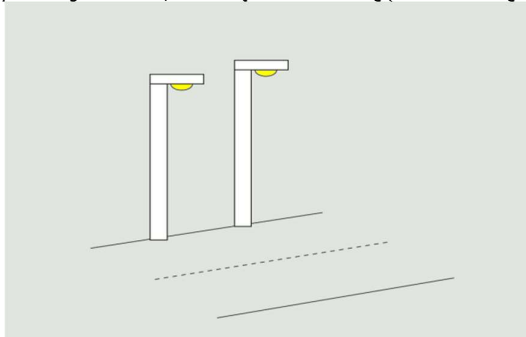

Installation with external control line for CDIM operation

CDIM operation – light output over time: one dim level.

ADIM – autonomous dimming is designed for dimming without any external control wiring and helps to save energy and reduce light pollution, even if only a power line is available. In ADIM operation, the street lighting fixtures executes a pre-set dimming profile, which can be factory programmed. The autonomous dimming is regulated by an integrated timer, which adjusts the dimming profile according to the previous night (operation from switch-on to switch-off).

Installation without external control line for ADIM operation

ADIM operation- light output over time: with one or two dim levels

Example: at 19 o'clock street lights are turned ON and at 6 o'clock turned OFF. In this case we have total of 11 hours long operation, middle point in this case is 5.5 hours which makes "natural midnight" at 00:30, so power goes down to 50% operation at 22:30 (00:30 – 2h), returns to 100% operation at 04:30 (00:30 + 4h). Power switch always takes average of last 4 operating times to calculate reference point. Energy savings about 70 percent. Higher energy savings can be achieved setting lower/longer operation level during night time or more power reduction steps. Please add this information by placing order.

Applications:

RECESSED LUMINAIRES

www.northcliffe.org

ERIDANUS R LED

Product Group: Recessed Luminaires

Images for the product family and options:

Description: A recessed LED luminaire with double parabolic reflector for a glare-free lighting effect
 Louvre: double parabolic, UGR<19 glare protection
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use recessed mounting kit S620x620 or S320x1220 (to be ordered separately). Cable, 0.3m, 2x0.75mm²

Environment: Indoor

Application: Office, education, corridor, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. Applications:

WING D LED

Product Group: Recessed Luminaires

Description: A recessed LED luminaire with direct and reflected light distribution to create comfortable lighting effect
 Diffuser: translucent micro-prismatic PMMA, UV stable
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct/Indirect
 LED lifetime, h: 100000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A+/A++

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use recessed mounting kit S620x620 (to be ordered separately). Push-in terminal, 3x2x2.5mm²

Environment: Indoor

Application: Office, education, corridor, retail, public place

 Ingress protection code: IP44
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use recessed mounting kit S620x620 or S320x1220 (to be ordered separately). Push-in terminal, 3x2x2.5mm²

Environment: Indoor

Application: Office, education, corridor, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable.
 Energy saving - typically between 30% and 50%.
 Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals
 For more information see the option list and energy saving solutions.

Series of EM3LOA and EM3LER emergency kits is the newest line of options that combines highly efficient LED light sources and the latest optics, designed to illuminate open areas or escape routes. A high specification LED emergency version provides high performance emergency lighting in commercial buildings where aesthetics is of prime importance, such as offices, retail or hospitality and leisure facilities. Whereas typical escape route emergency luminaires need to be spaced at every 3 to 7 metres to achieve the required illumination level, EM3LOA and EM3LER optimised optics can provide more than:
 up to 17m along the escape routes
 up to 9m in the open areas
 metre spacing, depending on ceiling height, that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance.

EM3LOA

EM3LER

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
EAIR	Integrated smart sensor and driver with wireless communication and grouping possibilities (not applicable for models: E801, E802, E803)
ACT+	Integrated self-learning sensor and driver for lighting control
BLT	Integrated wireless control unit and driver for lighting control via mobile device (via Bluetooth)
TW	Integrated light source and driver for Tunable white control 2700-6500 K
BLT TW	Integrated light source, wireless control unit and driver for Tunable white control 2700-6500 K via mobile device (via Bluetooth)
DLIGHT	Integrated daylight sensor and dimming driver for simple setting of constant light level
COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min)
COR30min	Driver with Corridor function 30min (switch off after 30 min)
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
EM3LER	Emergency version 3 hours, lens - escape route
EM3LOA	Emergency version 3 hours, lens - open areas
1G	Strain relief for power supply cable
WIE3	3-pole "Wieland - gesis classic" type or compatible connector
WIE5D	5-pole DALI "Wieland - gesis classic" type or compatible connector
Schuko-1.5m	3-pole "Schuko" type plug with 3x1.0mm ² 1.5m cable
Schuko-3.0m	3-pole "Schuko" type plug with 3x1.0mm ² 3.0m cable
W625	Designed for the German market to fit 625x625 suspended ceiling
RAL	RAL colour
MPRZ LT92	Translucent micro-prismatic diffuser with high light transmittance
DPRZ	De-glaring micro-prismatic diffuser
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

TECHNICAL DATA SHEET

Available accessories:

Product: Recessed MTG FRAME S620x620 RAL9003
Description: Frame for LED luminaire 595x595mm installation into plasterboard ceiling (1pcs), white steel

Product: Recessed MTG FRAME S320x1220 RAL9003
Short description: Frame for LED luminaire 1195x295mm installation into plasterboard ceiling (1pcs), white steel

Applications:

CORONA C LED

Product Group: Recessed Luminaires

Description: A decorative recessed LED luminaire with a circular opal diffuser for an outstanding working environment
 Diffuser: high transmission opal, PMMA, UV stable
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP40 (IP44 optional)
 Mechanical impact resistance: IK05
 EEC: A+

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use recessed mounting kit S620x620 (to be ordered separately). Push-in terminal, 2x1.5mm²

Environment: Indoor

Application: Office, education, corridor, retail, public place

- T840 Colour temperature 4000K, CRI 80+

CORONA S LED

Product Group: Recessed Luminaires

Description: A recessed LED luminaire with an opal diffuser for most commercial lighting applications
 Diffuser: high transmission opal, PMMA, UV stable
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40 (IP44 optional)
 Mechanical impact resistance: IK05
 EEC: A+

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use recessed mounting kit S620x620 (to be ordered separately). Push-in terminal, 3x2x2.5mm²

Environment: Indoor

Application: Office, education, corridor, retail, public place

Applications:

LYRA R LED

Product Group: Recessed Luminaires

Images for the product family and options:

Description: A decorative recessed LED luminaire in four sizes to fit wide range of applications
Diffuser: high transmission opal, PMMA, UV stable
Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 100000/L80B50
Operating temperature range, °C: ta 0...+35
Protection class IEC: I
Ingress protection code: IP20
EEC: A+

Installation: Suitable for plasterboard or similar type of ceiling, requires a cut-out. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Office, education, corridor, retail, public place

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

MPRZ LT92	Opal - micro prismatic diffuser with high light transmittance
DPRZ	De-glaring micro-prismatic diffuser
W625-	Designed for the German market to fit 625x625 suspended ceiling
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Applications:

LINE S LED

Product Group: Recessed Luminaires

Images for the product family and options:

Description: A curved recessed LED luminaire with translucent micro-prismatic diffuser and in-line connection possibility in T-Bar ceiling
 Diffuser: translucent micro-prismatic PMMA, UV stable
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Fits 24mm exposed T-Bar ceiling 600x600mm. Cable, 0.3m, 2x 1.5mm2

Environment: Indoor

Application: Office, education, corridor, retail, public place

Combination of Line R LED and Line S LED luminaires enables to create different patterns and animate working environment:

LEVANTO UGR LED

Product Group: Recessed Luminaires

Images for the product family and options:

Description:

A slim recessed LED panel with a micro-prismatic diffuser for glare-free light distribution
Diffuser: de-glaring micro-prismatic, UGR<19, edge lit
Body: aluminum profile, white finish

General data:

Mains voltage: 220-240V, 50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 40000/L70B50
Operating temperature range, °C: ta 0...+35
Protection class IEC: II
Ingress protection code: IP40 (IP44 optional)
Mechanical impact resistance: IK02
EEC: A+

Installation:

Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use support brackets (SB) or recessed mounting kit (to be ordered separately). Screw terminal, 2x1.5mm²

Environment:

Indoor

Application:

Office, education, corridor, retail, public place

Surface mounting box for Levanto PLN/UGR LED available on request. For more information check the accessories list

Applications:

POLARIS PAR LED

Product Group: Recessed Luminaires

Images for the product family and options:

Description:

A recessed LED luminaire with matt double parabolic reflector for a better glare control
 Louver: matt aluminum, double parabolic, matt aluminum, UGR<19, with four spring locks for maximum stability
 Diffuser: high transmission opal, PMMA, UV stable
 Body: steel sheet, white

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Indirect
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK02
 EEC: A+

Installation:

Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use support brackets (to be ordered separately). Push-in terminal, 3x2x2.5mm2

Environment:

Indoor

Application:

Office, education, corridor, retail, public place

* tolerance range for optical and electrical data: ±10 %. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- EAIR Integrated smart sensor and driver with wireless communication and grouping possibilities
- ACT+ Integrated self-learning sensor and driver for lighting control
- BLT Integrated wireless control unit and driver for lighting control via mobile device (via Bluetooth)
- EM3 Emergency version 3 hours
- EM3B Emergency version 3 hours (best available technology)
- EM3A Emergency version equipped with an autonomous testing system, 3 hours
- EM3D Emergency version 3 hours with DALI interface
- WIE3 3-pole "Wieland - gesis classic" type or compatible connector
- WIE5D 5-pole DALI "Wieland - gesis classic" type or compatible connector
- Schuko-1.5m 3-pole "Schuko" type plug with 3x1.0mm² 1.5m cable
- Schuko-3.0m 3-pole "Schuko" type plug with 3x1.0mm² 3.0m cable
- MAT Matted reflector
- SB Supports brackets (4 pcs)
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

Applications:

POLARIS R LED

Product Group: Recessed Luminaires

Description: A recessed LED luminaire with glossy double parabolic reflector for a glare free light distribution
 Louvre: glossy aluminum, double parabolic, UGR<19, with four spring locks for maximum stability
 Diffuser: opal PP film
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Indirect
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK02
 EEC: A+

Installation: Fits 15-24mm exposed T-Bar ceiling 600x600mm. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use support brackets (to be ordered separately). Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Office, education, corridor, retail, public place

SURFACE AND SUSPENDED LUMINAIRES

www.northcliffe.org

ETESIAN S LED

Product Group: Surface and Suspended Luminaires

Images for the product family and options:

Description: A surface LED luminaire with double parabolic reflector for a glare-free lighting effect
 Louvre: double parabolic, UGR<19 glare protection
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Surface luminaire is designed to be fixed to ceiling of any type. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, corridor, retail, public place

Luminaires fitted with ACT+ solution are ideal for refurbishment projects, as well as for new offices, corridors, open plan areas and storage areas. Simple installation: luminaire fitted with ACT+ is as easy to install as a simply switched luminaire. No control wiring, programming or configuration is needed. Self-learning: ACT+ uses 60-100 hours to learn about its environment - external daylight conditions and other luminaires around it. Smart energy savings: compared to a simple switched luminaire, ACT+ brings added features - presence detection, daylight harvesting, seamless and comfortable dimming.

HBEAIR sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

Series of EM3LOA and EM3LER emergency kits is the newest line of options that combines highly efficient LED light sources and the latest optics, designed to illuminate open areas or escape routes. A high specification LED emergency version provides high performance emergency lighting in commercial buildings where aesthetics is of prime importance, such as offices, retail or hospitality and leisure facilities. Whereas typical escape route emergency luminaires need to be spaced at every 3 to 7 metres to achieve the required illumination level, EM3LOA and EM3LER optimised optics can provide spacing up to 17 metres along the escape routes and up to 9 metres in the open areas, depending on ceiling height, that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

Series of EM3LOA and EM3LER emergency kits is the newest line of options that combines highly efficient LED light sources and the latest optics, designed to illuminate open areas or escape routes. A high specification LED emergency version provides high performance emergency lighting in commercial buildings where aesthetics is of prime importance, such as offices, retail or hospitality and leisure facilities. Whereas typical escape route emergency luminaires need to be spaced at every 3 to 7 metres to achieve the required illumination level, EM3LOA and EM3LER optimised optics can provide spacing up to 17 metres along the escape routes and up to 9 metres in the open areas, depending on ceiling height, that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

EM3LOA

EM3LER

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- EAIR Integrated smart sensor and driver with wireless communication and grouping possibilities for lighting control (not applicable for models: D962, D963, D970)
- ACT+ Integrated self-learning sensor and driver for lighting control (not applicable for models: D962, D963, D970)
- BLT Integrated wireless control unit and driver for lighting control via mobile device (via Bluetooth)
- TW Integrated light source and driver for Tunable white control 2700-6500 K
- BLT TW Integrated light source, wireless control unit and driver for Tunable white control 2700-6500 K via mobile device (via Bluetooth)
- DLIGHT Integrated daylight sensor and dimming driver for simple setting of constant light level
- COR Driver with Corridor function (never off)
- COR1min Driver with Corridor function 1min (switch off after 1 min)
- COR30min Driver with Corridor function 30min (switch off after 30 min)
- EM3 Emergency version 3 hours
- EM3B Emergency version 3 hours (best available technology)
- EM3A Emergency version equipped with an autonomous testing system, 3 hours
- EM3D Emergency version 3 hours with DALI interface
- EM3LER Emergency version 3 hours, lens - escape route
- EM3LOA Emergency version 3 hours, lens - open areas
- 1G Strain relief for power supply cable
- MPRZ LT92 Translucent micro-prismatic diffuser with high light transmittance
- DPRZ De-glaring micro-prismatic diffuser
- RAL RAL colour
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

Applications:

CALIMA U LED

Product Group: Surface and Suspended Luminaires

Images for the product family and options:

Description:	A suspended LED luminaire with translucent micro-prismatic diffuser and wide choice of options Diffuser: translucent micro-prismatic, PMMA Body: steel sheet, white finish
General data:	Mains voltage: 220-240V, 0/50-60Hz Power factor: >0,95 Light source: LED Light source included: Yes Light distribution type: Direct (Direct/Indirect LG3 versions) LED lifetime, h: 100000/L80B50 Operating temperature range, °C: ta 0...+35 Protection class IEC: I Ingress protection code: IP40 Mechanical impact resistance: IK05 EEC: A++
Installation:	Surface luminaire designed to be suspended. Wire suspension set and plastic cap with cable are available on request. Luminaire with an option LL and accessory I-JOIN MTG KIT Calima U LED/Etesian U LED RAL9003 is designed for in-line connection. Push-in terminal, 3x2x2.5mm ²
Environment:	Indoor
Application:	Office, education, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

Series of EM3LOA and EM3LER emergency kits is the newest line of options that combines highly efficient LED light sources and the latest optics, designed to illuminate open areas or escape routes. A high specification LED emergency version provides high performance emergency lighting in commercial buildings where aesthetics is of prime importance, such as offices, retail or hospitality and leisure facilities. Whereas typical escape route emergency luminaires need to be spaced at every 3 to 7 metres to achieve the required illumination level, EM3LOA and EM3LER optimised optics can provide spacing up to 17 metres along the escape routes and up to 9 metres in the open areas, depending on ceiling height, that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

Pull switch version (to switch on/off) available on request. For more information see the option list

LG3 – Luminaire fits to LG3 requirements with 30-40% light distribution to the ceiling and 70-60% to the floor. For more information see the option list

TECHNICAL DATA SHEET

Fitting for in-line connection can be ordered on request. Please add I-JOIN MTG KIT Calima U LED/Etesian U LED RAL9003 accessory and select L or LL options depending on luminaire's location in the line (first/ end/ intermediate). For more information see the option and accessories list

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

TECHNICAL DATA SHEET

Available accessories:

Product: I-JOIN MTG KIT Calima U LED/Etesian U LED RAL9003
Description: "I" type join kit for connecting luminaires in-line

Product: Suspension MTG KIT SUSY
Description: Suspension wire set "Y" type, 1.5m adjustable, 1pcs
**note - 2pcs MTG KIT SUSY for 1 luminaire required*

Product: CAP1 WHITE
Description: Plastic cap for hiding cable inlet into ceilings, white

Product: CAP1 CLEAR
Description: Plastic cap for hiding cable inlet into ceilings, clear

Product: CAP2 WHITE
Description: Plastic cap for hiding cable inlet into ceilings, white

Product: CAP2 CLEAR
Description: Plastic cap for hiding cable inlet into ceilings, clear

Product: CAP spiral cable 3x0.75 2.0m white
Description: Spiral cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m white
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m clear
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, transparent

Product: CAP cable clip D6,3mm SET, clear
Description: Cable and suspension wire clip set, 4pcs. For cable diameter up to 6,3mm and wire diameter 1mm

LODOS S LED

Product Group: Surface and Suspended Luminaires

Images for the product family and options:

Description: A decorative and modern LED luminaire in four sizes to fit wide range of applications
Diffuser: opal diffuser, PMMA, high light transmittance, UV stable
Body: steel sheet, white finish, with quick lock system

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 75000/L80B50
Operating temperature range, °C: ta 0...+35
Protection class IEC: I
Ingress protection code: IP40
Mechanical impact resistance: IK02
EEC: A+

Installation: Surface luminaire is designed to be fixed to ceiling of any type or suspended. Wire suspension set is ordered separately. Push-in terminal, 3x2x2.5mm²

Environment: Indoor

Application: Office, education, retail, public place

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

Wire suspension set "Suspension MTG KIT Lodos S LED" is available on request. For more information see the option list

* tolerance range for optical and electrical data: $\pm 10\%$. Values apply to an ambient temperature of 25°C

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
BLT (Bluetooth)	Integrated wireless control unit and driver for lighting control via mobile device
TW	Integrated light source and driver for Tuneable white control 2700-6500 K
BLT TW	Integrated light source, wireless control unit and driver for Tuneable white control 2700-6500 K via mobile device (Bluetooth)
MW	Integrated microwave (MW) motion sensor with on-off control
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
1G	Strain relief for power supply cable
RAL	RAL colour
OP LT80	Opal diffuser with high light transmittance
DPRZ	De-glaring micro-prismatic diffuser
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available accessories:

Product: Suspension MTG KIT Lodos S LED
Description: Suspension wire set with cap 3x3" type, 1.5m adjustable, 1pcs

Product: CAP spiral cable 3x0.75 2.0m white
Description: Spiral cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m white
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m clear
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, transparent

Product: CAP cable clip D6,3mm SET, clear
Description: Cable and suspension wire clip set, 4pcs. For cable diameter up to 6,3mm and wire diameter 1mm

Applications:

TUCANA PAR LED

Product Group: Surface and Suspended Luminaires

Description: A surface or suspended mounted LED luminaire with double parabolic reflector for good efficiency and quality of light
 Reflector: matt aluminium, double parabolic, with six spring locks for maximum stability
 Diffuser: opal diffuser, PMMA, high light transmittance, UV stable
 Body: steel sheet, white finish, with thermoplastic end caps

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK02
 EEC: A+

Installation: Surface luminaire is designed to be fixed to ceiling of any type or suspended. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, retail, public place

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
 - DALI Driver with DALI interface
 - EAIR Integrated smart sensor and driver with wireless communication and grouping possibilities for lighting control
 - ACT+ Integrated self-learning sensor and driver for lighting control
 - BLT Integrated wireless control unit and driver for lighting control via mobile device (via Bluetooth)
 - DLIGHT Integrated daylight sensor and dimming driver for simple setting of constant light level
 - PULL Pull switch device, on/off
 - EM3 Emergency version 3 hours
 - EM3B Emergency version 3 hours (best available technology)
 - EM3A Emergency version equipped with an autonomous testing system, 3 hours
 - EM3D Emergency version 3 hours with DALI interface
 - EM3LER Emergency version 3 hours, lens - escape route
 - EM3LOA Emergency version 3 hours, lens - open areas
 - 1G Strain relief for power supply cable
 - CBF3-2.0m spiral white- Spiral cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white
 - CBF3-2.0m white Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white
 - CBF3-2.0m clear Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, transparent
- *note - for suspended luminaires it is recommended to use one of CBF3 option for easier mounting
- RAL RAL colour
 - T830 Colour temperature 3000K, CRI 80+
 - T840 Colour temperature 4000K, CRI 80+

Applications:

BARBER S LED

Product Group: Surface and Suspended Luminaires

Images for the product family and options:

Description: A surface LED luminaire with asymmetric light distribution for uniform illumination of walls, shelves and panels
 Reflector: matt aluminium, asymmetrical
 Diffuser: opal diffuser, PMMA, UV stable, with high light transmittance
 Body: steel sheet, white finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes

ALUMINIUM PROFILE LUMINAIRES

www.northcliffe.org

SERPENS S LED

Product Group: Aluminum Profile Luminaires

Description: A recessed LED luminaire with opal difuser and ultra slim design for in-line connection without gaps
 Diffuser: opal polycarbonate, UV stabilized
 Body: extruded aluminium profile, white (RAL 9010) finish with sandpaper texture

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/ L90B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 Glow wire test, °C: 650
 EEC: A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out. Supplied with supports brackets (SB). Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, retail, public place

SERPENS LED

Product Group: Aluminum Profile Luminaires

Images for the product family and options:

Description: A recessed LED luminaire with opal or micro-linear prismatic diffuser for in-line connection without gaps
 Diffuser: opal (OP LT80) or micro-linear prismatic (PRZ) polycarbonate, UV stabilized
 Body: extruded aluminium profile, white (RAL 9010) finish with sandpaper texture

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/ L90B50
 Operating temperature range, °C: ta -15...+35
 Protection class IEC: I
 Ingress protection code: IP40 (IP44 optional)
 Mechanical impact resistance: IK05
 Glow wire test, °C: 650
 EEC: A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out. Supplied with supports brackets (SB). Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, retail, public place

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

ENEC - Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
5TB	5-pole terminal block in middle of luminaire for easy through wiring
1LIN	Through wiring 3x1.5 mm ² with two push-in terminal blocks (for luminaire up to 1700mm)
3LIN	Through wiring 5x1.5 mm ² with two push-in terminal blocks (for luminaire up to 1700mm)
1LIN	Through wiring 3x1.5 mm ² with two push-in terminal blocks (for luminaire lengths 1701-3000mm)
3LIN	Through wiring 5x1.5 mm ² with two push-in terminal blocks (for luminaire lengths 1701-3000mm)
*note - LIN options applicable for models longer than 800mm, for shorter models 5TB option	
1G	Strain relief for power supply cable
*note - 1G option included for models marked with ENEC	
L	for in-line connection end/first luminaire (lengths: 602/ 895/ 1187/ 1421/ 1655mm)
LL	for in-line connection intermediate luminaire (lengths: 585/ 878/ 1170/ 1404/ 1638mm)
L	for in-line connection end/first luminaire (lengths: 1772/ 1945/ 2123/ 2474/ 2650/ 2825mm)
LL	for in-line connection intermediate luminaire (lengths: 1755/ 1931/ 2106/ 2457/ 2633/ 2808mm)
*note - for L and LL models joint kit and 1LIN option included (5TB option for lengths up to 800mm)	
OP LT80	Opal diffuser with high light transmittance
PRZ	Micro-linear prismatic diffuser
LO1	Light output level 1
LO2	Light output level 2
LO3	Light output level 3
SB	Support brackets for installation into a plasterboard ceiling
*note - SB option included	
RAL	RAL colour
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available options:

EAIR	Integrated smart sensor and driver with wireless communication and grouping possibilities for lighting control
ACT+	Integrated self-learning sensor and driver for lighting control
TW	Integrated light source and driver for Tunable white control 2700-6500 K
TW	Integrated light source and driver for Tunable white control 2700-6500 K
*note - Please ask for special models with options EAIR, ACT+ and TW	
*note - For options EAIR and ACT+ luminaire housing is 65mm longer	
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
*note - EM options applicable for models longer than 1000mm	
1G	Strain relief for power supply cable
2G	Strain relief for power supply cable, 2pcs
IP44	IP44 protection degree (not applicable for L and LL type luminaires)
*note - IP44 option not applicable for L and LL models	

Applications:

SERPENS P LED

Product Group: Aluminum Profile Luminaires

Description:

A recessed LED luminaire with double parabolic reflector for a glare-free lighting effect
 Louvre: double parabolic, UGR<19 glare protection
 Diffuser: translucent polycarbonate film, UV stabilized
 Body: extruded aluminium profile, white (RAL 9010) finish with sandpaper texture

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/ L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation:

Suitable for plasterboard or similar types of ceiling, requires a cut-out. Supplied with supports brackets (SB). Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment:

Indoor

Application:

Office, education, hotel, corridor, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

TECHNICAL DATA SHEET

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
PULL	Pull switch device, on/off
<i>*note - For PULL option luminaire housing is 50mm longer</i>	
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
<i>*note - EM options applicable for models longer than 1000mm</i>	
5TB	5-pole terminal block in middle of luminaire for easy through wiring
1LIN	Through wiring 3x1.5 mm ² with two push-in terminal blocks
3LIN	Through wiring 5x1.5 mm ² with two push-in terminal blocks
<i>*note - LIN options applicable for models longer than 800mm, for shorter models 5TB option</i>	
1G	Strain relief for power supply cable
2G	Strain relief for power supply cable, 2pcs
CBF3-2.0m spiral	Spiral cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, white
CBF3-2.0m	Cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, white
CBF3-2.0m clear	Cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, transparent
SUS	Suspended version
<i>*note - for suspended luminaires it is recommended to use one of CBF3 option for easier mounting</i>	
L	for in-line connection end/first luminaire (lengths: 568/ 848/1128/ 1408/1688/ 1968mm)
LL	for in-line connection intermediate luminaire (lengths: 561/ 841/ 1121/ 1401/ 1681/ 1961mm)
<i>*note - for L and LL models 3LIN option included, 5TB option for lengths up to 800mm</i>	
RAL	RAL colour
OP LT80	Opal diffuser with high light transmittance

Product: CAP spiral cable 3x0.75 2.0m white
Description: Spiral cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white
- 

Product: CAP cable 3x0.75 2.0m white
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white
- 

Product: CAP cable 3x0.75 2.0m clear
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, transparent
- 

Product: CAP cable clip D6,3mm SET, clear
Description: Cable and suspension wire clip set, 4pcs. For cable diameter up to 6,3mm and wire diameter 1mm

DECOR LED

Product Group: Aluminum Profile Luminaires

Images for the product family and options:

Description:

A surface or suspended LED luminaire with opal or micro-linear prismatic difuser for in-line connection without gaps
 Diffuser: opal (OP LT80) or micro-linear prismatic (PRZ) polycarbonate, UV stabilized
 Body: extruded aluminium profile, light grey (RAL 9006) finish with sandpaper texture

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/ L90B50
 Operating temperature range, °C: ta -15...+35
 Protection class IEC: I
 Ingress protection code: IP40 (IP44 optional)
 Mechanical impact resistance: IK05
 Glow wire test, °C: 650
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Wire suspension set and plastic cap are available on request.
 Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment:

Indoor

Application:

Office, education, household, hotel, corridor, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

High flexibility to meet specific project requirements, as luminaire is available in three standard colours: light grey RAL 9006, white RAL 9010 and black RAL 9005, or can be painted to any other RAL code colour on request. For more information see the option list

Pull switch version (to switch on/off) available on request. For more information see the option list

TECHNICAL DATA SHEET

Fitting can be produced with closed profile from one or both ends according to meet specific customer design. For more information see the option list

Brackets WALL MTG KIT- Decor LED RAL9006S for DECOR LED series mounting directly to the wall with up or down lighting

Decor LED fittings have been designed for connection in modern lighting systems with a wide choice of join accessories. Thanks to interesting design and wide choice of optics, they comply with the highest lighting standards and act as an interesting element of interior design

ENEC - Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
5TB	5-pole terminal block in middle of luminaire for easy through wiring
1LIN	Through wiring 3x1.5 mm ² with two push-in terminal blocks
3LIN	Through wiring 5x1.5 mm ² with two push-in terminal blocks
*note - LIN options applicable for models longer than 800mm, for shorter models 5TB option	
L	for in-line connection end/first luminaire (lengths: 592/ 885/ 1177/ 1411/ 1645/ 1762/ 1938/ 2113/ 2464/ 2640/ 2815mm)
LL	for in-line connection intermediate luminaire (lengths: 585/ 878/ 1170/ 1404/ 1638/ 1755/ 1931/ 2106/ 2457/ 2633/ 2808mm)
*note - for L and LL models joint kit and 1LIN option included (5TB option for lengths up to 800mm)	
I-join L	Luminaire designed to in-line connection with join element - end/first luminaire (joint element not included)
I-join LL	Luminaire designed to in-line connection with join element - intermediate luminaire (joint element not included)
*note - for I-join L and I-join LL models joint kit not included, 1LIN option included (5TB option for lengths up to 800mm)	
1G	Strain relief for power supply cable
*note - 1G option included for models marked with ENEC	
OP LT80	Opal diffuser with high light transmittance
PRZ	Micro-linear prismatic diffuser
LO1	Light output level 1
LO2	Light output level 2
LO3	Light output level 3
SUS	Suspended version
RAL9003S	RAL 9003S colour
RAL9005S	RAL 9005S colour
RAL	RAL colour
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available options:

EAIR	Integrated smart sensor and driver with wireless communication and grouping possibilities for lighting control
ACT+	Integrated self-learning sensor and driver for lighting control
*note - For options EAIR and ACT+ luminaire housing is 65mm longer	
TW	Integrated light source and driver for Tunable white control 2700-6500 K
*note - Please ask for special models with options EAIR, ACT+ and TW	
PULL	Pull switch device, on/off
*note - For PULL option luminaire housing is 50mm longer	
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
*note - EM options applicable for models longer than 1000mm	
1G	Strain relief for power supply cable
2G	Strain relief for power supply cable, 2pcs
CBF3-2.0m spiral	Spiral cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, white
CBF3-2.0m	Cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, white
CBF3-2.0m clear	Cable 3x0.75mm ² for suspended luminaire up to 2.0 meters, transparent
SUS	Suspended version
*note - for suspended luminaires it is recommended to use one of CBF3 option for easier mounting	
IP44	IP44 protection degree (not applicable for L and LL type luminaires)
*note - IP44 option not applicable for L and LL models	

Available accessories:

Applications:

DECOR L LED

Product Group: Aluminum Profile Luminaires

Description:

A suspended LED luminaire with opal or micro-linear prismatic difuser and direct/indirect lighting distribution
 Diffuser: opal (OP LT80) or micro-linear prismatic (PRZ) polycarbonate, UV stabilized
 Body: extruded aluminium profile, light grey (RAL 9006) finish with sandpaper texture

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct/indirect, LG3
 LED lifetime, h: 50000/ L90B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 Glow wire test, °C: 650
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Wire suspension set and plastic cap are available on request.
 Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment:

Indoor

Application:

Office, education, household, hotel, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

LG3 – Luminaire fits to LG3 requirements with 30-40% light distribution to the ceiling and 70-60% to the floor. For more information see the option list

DECOR P LED

Product Group: Aluminum Profile Luminaires

Images for the product family and options:

Description: A surface or suspended LED luminaire with with double parabolic reflector for glare-free lighting effect
 Louver: double parabolic, UGR<19 glare protection
 Diffuser: translucent polycarbonate film, UV stabilized
 Body: extruded aluminium profile, light grey (RAL 9006) finish with sandpaper texture

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Surface luminaire designed to be fixed to ceiling of any type or suspended. Wire suspension set and plastic cap are available on request. Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

Pull switch version (to switch on/off) available on request. For more information see the option list

High flexibility to meet specific project requirements, as luminaire can be painted to any RAL code colour on request. For more information see the option list

TECHNICAL DATA SHEET

Fitting can be produced with closed profile from one or both ends according to meet specific customer design. For more information see the option list

Decor LED fittings have been designed for connection in modern lighting systems with a wide choice of join accessories. Thanks to interesting design and wide choice of optics, they comply with the highest lighting standards and act as an interesting element of interior design

 Light source included: Yes
 Light distribution type: Direct/indirect, LG3
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP40
 Mechanical impact resistance: IK05
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Wire suspension set and plastic cap are available on request. Luminaire with an option L or LL is designed for in-line connection. Push-in terminal, 5x2x2.5mm2

Environment:

Indoor

Application:

Office, education, household, hotel, retail, public place

Sensors ensure lighting is only on when and where it is needed. The sensors can bring huge benefits in terms of energy management as they enable sunlight harvesting, automatic dimming, and sensing the presence of people. The lighting is only on when actually required so cost savings are considerable. Energy saving - typically between 30% and 50%. Application: are ideal for all office areas including work spaces, conference rooms, corridors, break-out rooms, administrative areas, stairwells and similar applications in schools and hospitals. For more information see the option list and energy saving solutions

Pull switch version (to switch on/off) available on request. For more information see the option list

LG3 – Luminaire fits to LG3 requirements with 30-40% light distribution to the ceiling and 70-60% to the floor. For more information see the option list

Applications:

CONTINUOUS LINE AND BATTEN LUMINAIRES

www.northcliffe.org

SHOP LSW LED

Product Group: Continuous Line and Batten Luminaire

Images for the product family and options:

Description: A continuous line LED luminaire with various optics, quick and tool-free mounting to cut installation cost to the minimum
 Optics: 30x90°, 60x100°, 90x100°, asymmetric and double asymmetric light beam
 Body and end caps: steel sheet, white finish
 Luminaire with an option L or LL is designed for in-line connection

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50 (low power versions 100000/L80B50)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Suspended (suspension brackets are included). Through wired, 5x1.5mm², two connectors, 5-pole plug(1601/VC) and socket(1602/VC), STUCHHI

Environment: Indoor

Application: Retail, hall, public place

SHOP LSW LED fittings have been designed for connection in modern lighting systems with a wide choice of join accessories. Thanks to interesting design and wide choice of optics, they comply with the highest lighting standards and act as an interesting element of interior design

SHOP LSW I-JOIN- "I" join element with LED light source

SHOP LSW T-JOIN- "T" join element with LED light source

SHOP LSW L-JOIN- "L" join element with LED light source

SHOP LSW X-JOIN- "X" join element with LED light source

Through wired 5x1.5mm² with 5-pole plug(1601/VC) and socket(1602/VC) on both sides. Quick installation features save project time and money. For more information check the option list

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

LS30x90 Optics with 30x90° beam angle

TECHNICAL DATA SHEET

LS60x100	Optics with 60x100° beam angle
LS90x100	Optics with 90x100° beam angle
LS1A18-L	Optics with asymmetric beam, light direction - left
LS1A18-R	Optics with asymmetric beam, light direction - right
<i>*note - please, for LSA18 optics specify direction</i>	
LS2A40	Optics with double asymmetric beam
LO1	Light output level 1
LO2	Light output level 2
LO3	Light output level 3
SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
L1	Driver connected to L1 line
L2	Driver connected to L2 line
L3	Driver connected to L3 line
<i>* note - please always specify one of L1, L2, L3 options before placing an order</i>	
L	for in-line connection end/first luminaire (lengths: 1153/ 1440/ 2873mm)
LL	for in-line connection intermediate luminaire (lengths: 1151/ 1438/ 2871mm)
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available accessories:

Product: Power supply socket 1602/VCB-M-5 5x1.5-2.5mm2
Description: 5-pole socket (Stucchi - 1602/VCB-M-5) for power supply, 1pcs
**note - please use power supply socket for first in-line luminaire connection to power source*

Product: I-JOIN PLATE Shop LSW LED
Description: I-Join element for connecting luminaires in-line, 1pcs (extra)

Product: BLANK Shop LSW LED L1151mm
Description: Blank part kit for connecting luminaires in-line 1151mm long, 1pcs

Product: BLANK Shop LSW LED L1438mm
Description: Blank part kit for connecting luminaires in-line 1438mm long, 1pcs

Product: END CAP Shop LSW LED
Description: End cap kit for Shop LSW LED luminaires, 1pcs (extra)

Applications:

BLADE LSZ LED

Product Group: Continuous Line and Batten Luminaire

Images for the product family and options:

Description: An industrial LED luminaire, IP23 rated, with corrosion resistant galvanized steel body and various optics for precise light control
 Optics: 30x90°, 60x100°, 90x100°, asymmetric and double asymmetric light beam
 Body and endcaps: galvanized steel sheet, corrosion-proof, light grey colour

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct/Indirect
 LED lifetime, h: 75000/L80B50 (low power versions 100000/L80B50)
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: I
 Ingress protection code: IP23
 Mechanical impact resistance: IK07
 EEC: A++

Installation: Surface luminaire is designed to be fixed to ceiling of any type or suspended. Two cable entries are accessible from the rear though Ø19mm holes located in the middle of the body or by side entries via Ø19mm holes at either end. Push-in terminal, 5x2x2.5mm² (for in and out going cable)

Environment: Indoor

Application: Retail, industry, warehouse, hall, public place

Supplied with a hinged reflector unit, which can be opened for easy installation and access to terminal block. Just open reflector by removing lock screw, connect cable to the terminal block and close it

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

LS30x90	Optics with 30x90° beam angle
LS60x100	Optics with 60x100° beam angle
LS90x100	Optics with 90x100° beam angle
LS1A18	Optics with asymmetric beam
LS2A40	Optics with double asymmetric beam
SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
HBEAIR	Integrated smart sensor for high ceiling (up to 16m) and driver with wireless communication and grouping possibilities for lighting control
COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min)
COR30min	Driver with Corridor function 30min (switch off after 30 min)
HBPIR7m	Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
HBPIR12m	Integrated PIR sensor for high ceiling (up to 12 meters) with on-off control
HBPIR15m	Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control
EMG	Emergency version 1 hour
EMGB	Emergency version 1 hour (best available technology)
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
5TB	5-pole terminal block in middle of luminaire for easy through wiring

* note - 5TB option is included as standard

L1	Driver connected to L1 line
L2	Driver connected to L2 line
L3	Driver connected to L3 line
1G	Strain relief for power supply cable
2G	Strain relief for power supply cable, 2pcs
WIE3	3-pole "Wieland - gesis classic" type or compatible connector
WIE5	5-pole "Wieland - gesis classic" type or compatible connector
WIE5D	5-pole DALI "Wieland - gesis classic" type or compatible connector
2WIE3	Two 3-pole "Wieland - gesis classic" type or compatible connectors. Through wired, 3x1.5mm2.
2WIE5	Two 5-pole "Wieland - gesis classic" type or compatible connectors. Through wired, 5x1.5mm2
2WIE5D	Two 5-pole DALI "Wieland - gesis classic" type or compatible connectors. Through wired, 3x1.5mm2 + 2x0.5mm2 (DALI).

* note - please specify one of L1, L2, L3 option for WIE5 and 2WIE5 options

T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Applications:

BLADE LSW LED

Product Group: Continuous Line and Batten Luminaire

Images for the product family and options:

Description: An industrial LED luminaire, IP23 rated, with white powder coated steel body and various optics for precise light control
Optics: 30x90°, 60x100°, 90x100°, asymmetric and double asymmetric light beam
Body and endcaps: steel sheet, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct/Indirect
LED lifetime, h: 75000/L80B50 (low power versions 100000/L80B50)
Operating temperature range, °C: ta 0...+40
Protection class IEC: I
Ingress protection code: IP23
Mechanical impact resistance: IK07
EEC: A++

Installation: Surface luminaire is designed to be fixed to ceiling of any type or suspended. Two cable entries are accessible from the rear though Ø19mm holes located in the middle of the body or by side entries via Ø19mm holes at either end. Push-in terminal, 5x2x2.5mm² (for in and out going cable)

Environment: Indoor

Application: Retail, industry, warehouse, hall, public place

Supplied with a hinged reflector unit, which can be opened for easy installation and access to terminal block. Just open reflector by removing lock screw, connect cable to the terminal block and close it

White painted steel cross blades for a better glare protection. For more information check option list

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- LS30x90 Optics with 30x90° beam angle
- LS60x100 Optics with 60x100° beam angle
- LS90x100 Optics with 90x100° beam angle
- LS1A18 Optics with asymmetric beam
- LS2A40 Optics with double asymmetric beam
- WRF Reflector with white steel cross blades for a better glare protection
- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- HBEAIR Integrated smart sensor for high ceiling (up to 16m) and driver with wireless communication and grouping possibilities for lighting control
- COR Driver with Corridor function (never off)
- COR1min Driver with Corridor function 1min (switch off after 1 min)
- COR30min Driver with Corridor function 30min (switch off after 30 min)
- HBPIR7m Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
- HBPIR12m Integrated PIR sensor for high ceiling (up to 12 meters) with on-off control
- HBPIR15m Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control
- EMG Emergency version 1 hour
- EMGB Emergency version 1 hour (best available technology)
- EM3 Emergency version 3 hours
- EM3B Emergency version 3 hours (best available technology)
- EM3A Emergency version equipped with an autonomous testing system, 3 hours
- EM3D Emergency version 3 hours with DALI interface
- 5TB 5-pole terminal block in middle of luminaire for easy through wiring
- * note - 5TB option is included as standard
- L1 Driver connected to L1 line
- L2 Driver connected to L2 line
- L3 Driver connected to L3 line
- 1G Strain relief for power supply cable
- 2G Strain relief for power supply cable, 2pcs
- WIE3 3-pole "Wieland - gesis classic" type or compatible connector
- WIE5 5-pole "Wieland - gesis classic" type or compatible connector
- WIE5D 5-pole DALI "Wieland - gesis classic" type or compatible connector
- 2WIE3 Two 3-pole "Wieland - gesis classic" type or compatible connectors. Through wired, 3x1.5mm2.
- 2WIE5 Two 5-pole "Wieland - gesis classic" type or compatible connectors. Through wired, 5x1.5mm2
- 2WIE5D Two 5-pole DALI "Wieland - gesis classic" type or compatible connectors. Through wired, 3x1.5mm2 + 2x0.5mm2 (DALI).
- * note - please specify one of L1, L2, L3 option for WIE5 and 2WIE5 options
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

TECHNICAL DATA SHEET

Available accessories:

Product: WRF GRID KIT Blade LSW LED 1.2m RAL9003S

Description: Reflector with white steel cross blades for a better glare protection

Product: WRF GRID KIT Blade LSW LED 1.5m RAL9003S

Short description: Reflector with white steel cross blades for a better glare protection

**note - check RAL colour to match luminaire*

Applications:

ATRIA LED

Product Group: Continuous Line and Batten Luminaire

Images for the product family and options:

Description:	A wall or suspended-mounted LED batten luminaire with asymmetric optic for blackboard or display illumination Optics: asymmetric light beam Body and end caps: steel sheet, white finish
General data:	Mains voltage: 220-240V, 0/50-60Hz Power factor: >0,95 Light source: LED Light source included: Yes Light distribution type: Direct LED lifetime, h: 100000/L80B50 Operating temperature range, °C: ta 0...+35 Protection class IEC: I Ingress protection code: IP40 Mechanical impact resistance: IK05 EEC: A++
Installation:	Suspended (suspension brackets are included). Through wired, 5x1.5mm ² , two connectors, 5-pole plug(1601/VC) and socket(1602/VC), STUCHHI
Environment:	Indoor
Application:	Education

TECHNICAL DATA SHEET

Available accessories:

Product: Suspension MTG KIT SUSI
Description: Suspension wire set "I" type, 1.5m adjustable, 1pcs
**note - 2pcs MTG SUSI KIT for 1 luminaire required*

Product: Suspension rope 0.001x5m
Description: Suspension rope 0.001x5m, 1pcs

Product: WALL MTG KIT - Atria LED
Description: Support bracket for luminaire installation onto wall. Atria LED, 2pcs

Product: I-JOIN MTG KIT - Atria LED
Description: "I" type join kit for connecting luminaires in-line, 1pcs

Product: CAP1 WHITE
Description: Plastic cap for hiding cable inlet into ceilings, white

Product: CAP1 CLEAR
Description: Plastic cap for hiding cable inlet into ceilings, clear

Product: CAP2 WHITE
Description: Plastic cap for hiding cable inlet into ceilings, white

Product: CAP2 CLEAR
Description: Plastic cap for hiding cable inlet into ceilings, clear

Product: CAP spiral cable 3x0.75 2.0m white
Description: Spiral cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m white
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, white

Product: CAP cable 3x0.75 2.0m clear
Description: Cable 3x0.75mm² for suspended luminaire up to 2.0 meters, transparent

Product: CAP cable clip D6,3mm SET, clear
Description: Cable and suspension wire clip set, 4pcs. For cable diameter up to 6,3mm and wire diameter 1mm

**note - please always choose right mounting accessories before placing an order*

Applications:

DIFFUSER AND WALL LUMINAIRES

www.northcliffe.org

PUPIS P LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description: A surface-mounted LED luminaire with oval profile and high impact resistance
Diffuser: opal polycarbonate, high impact resistance
Body: white polycarbonate

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,55
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 40000/L70B50
Operating temperature range, °C: ta -15...+35
Protection class IEC: II
Ingress protection code: IP65
Mechanical impact resistance: IK08
EEC: A+

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Screw terminal, 2x1.5mm2

Environment: Indoor

Application: Office, education, household, corridor, staircase, healthcare, bathroom, public place

PAVO P LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description: A surface IP44 LED luminaire with opal diffuser and rounded profile
Diffuser: opal PMMA, UV stable, with quick fix lock
Body: steel sheet, white

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,90
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 40000/L80B50
Operating temperature range, °C: ta -15...+35 (from 0 °C with EM3)
Protection class IEC: I
Ingress protection code: IP44
Mechanical impact resistance: IK02
EEC: A+

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Screw terminal, 3x1.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, staircase, healthcare, bathroom, public place

- T840 Colour temperature 4000K, CRI 80+

Applications:

INDUS P LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description: A surface LED luminaire with rounded profile, good dust and weather resistance
 Diffuser: opal thermoplastic, UV stable, with sealing gasket and screws fixing
 Body: white thermoplastic, UV stable, high impact resistance
 Gear tray: steel sheet, white

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -15...+35 (from 0 °C with EM3)
 Protection class IEC: II
 Ingress protection code: IP65
 Mechanical impact resistance: IK08 (IK10 optional)
 EEC: A++

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Push-in terminal, 3x2x2.5mm2 (screw terminal, 2x1.5mm2 for E27 version)

Environment: Indoor/Outdoor

Application: Office, education, household, hotel, corridor, staircase, healthcare, bathroom, public place, parking area

Luminaire is available in UV stable dark grey thermoplastic body (DGREY). For more information see the option list

TECHNICAL DATA SHEET

Options available on request:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
DIM	Driver with 1-10V dimming
MW	Integrated microwave (MW) motion sensor with on-off control
MWRFM+	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, dimming control.
MWRFM+off	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, (no dimming control).
MWRFM	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transmitter. Sensor can serve as master. Functions: Staircase, Corridor, dimming control.
MWRFS+	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, dimming control.
MWRFS+off	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor (no dimming control).
MWRFS	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, (no dimming control).
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
1G	Strain relief for power supply cable
PC	Opal PC diffuser for IK10 impact resistance
LOUVER	Decorative louver
DGREY	Dark grey thermoplastic body
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

HEZE P LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description: A surface LED luminaire with rectangular profile, good dust and weather resistance
Diffuser: opal thermoplastic, UV stable, with sealing gasket and screws fixing
Body: white thermoplastic, UV stable, high impact resistance
Gear tray: steel sheet, white

General data: Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 50000/L80B50
Operating temperature range, °C: ta -15...+35 (from 0 °C with EM3)
Protection class IEC: II
Ingress protection code: IP65
Mechanical impact resistance: IK08
EEC: A++

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Push-in terminal, 3x2x2.5mm2 (screw terminal, 2x1.5mm2 for E27 version)

Environment: Indoor/Outdoor

Application: Office, education, household, hotel, corridor, staircase, healthcare, bathroom, public place, parking area

Luminaire is available in UV stable dark grey thermoplastic body (DGREY). For more information see the option list

CARINA P LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description: A surface IP44 LED luminaire with translucent micro-linear diffuser and screwed end caps for increased security
 Diffuser: translucent micro-linear polycarbonate, UV stabilized, impact-resistant
 Body: steel sheet, white
 End caps: white thermoplastic with security screws

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50 (100000/L80B50 low power versions)
 Operating temperature range, °C: ta -15...+35 (from 0 °C with EM3)
 Protection class IEC: I (II optional)
 Ingress protection code: IP54
 Mechanical impact resistance: IK05
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A++

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, staircase, healthcare, bathroom, public place

DOCTOR P LED

Product Group: Diffuser and wall luminaires

Description: A surface LED luminaire with modern profile, for use in humid locations, where industrial solutions are aesthetically not acceptable
 Diffuser: opal polycarbonate, UV stabilized, impact resistant
 Body: white polycarbonate, impact resistant

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -15...+35
 Protection class IEC: I
 Ingress protection code: IP54
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Office, education, corridor, staircase, healthcare, public place

CABINET LED

Product Group: Diffuser and wall luminaires

Images for the product family and options:

Description:	A surface LED batten luminaire with slim profile and opal diffuser for fast continuous mounting application Diffuser: opal polycarbonate, UV stabilized Body: white polycarbonate, with switch button
General data:	Mains voltage: 220-240V, 50-60Hz Power factor: >0,55 Light source: LED Light source included: Yes Light distribution type: Direct LED lifetime, h: 30000/L70B50 Operating temperature range, °C: ta 0...+35 Protection class IEC: II Ingress protection code: IP40 Mechanical impact resistance: IK04 EEC: A+
Installation:	Surface luminaire designed to be fixed to ceiling and walls of any type. Effective solution for interconnecting a number of battens, including start and link lead. Through wired, 2x0.75mm ² , build-in connectors, 2-pole plug and socket
Environment:	Indoor
Application:	Household, retail

Luminaires can be connected into one continuous line without gaps and light shadows

Supplied with 10 cm start lead, interconnecting part and wall/ceiling mounting kit for easy installation. Switch on/off button mounted on the side of the body. Optional: 15 cm flexible connector and 70 cm power cable with plug available on request

**Available accessories:**

Product: Cabinet LED flexible connector 15cm
Description: Flexible connector 15cm, white

Product: Cabinet LED power cable 70cm with plug
Description: Power cable 70cm with plug, white

MIRA LED

Product Group: Diffuser and wall luminaires

Description:

A surface LED front mirror luminaire with opal diffuser for use in bath and dressing rooms
Diffuser: opal polycarbonate, UV stabilized
Body: extruded aluminium body, with white thermoplastic endcaps and switch button

General data:

Mains voltage: 220-240V, 50-60Hz
Power factor: >0,55
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 30000/L70B50
Operating temperature range, °C: ta 0...+35
Protection class IEC: II (I with build-in socket)
Ingress protection code: IP44
Mechanical impact resistance: IK04
EEC: A+

Installation:

Surface luminaire designed to be fixed to walls of any type. Cable entry is accessible from the rear though a waterproof cover located in the centre of the body. Screw terminal, 2x1.5mm² (3x1.5mm² with build-in socket)

Environment:

Indoor

Application:

Household, hotel, bathroom, healthcare

A built-in Schuko type socket outlet with hinged IP44 cover is available as an option (SOCS44). For more information see the option list

Supplied with a wall mounting kit for easy installation. A switch on/off button is installed at the end of the body

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

CS44 Built-in schuko socket outlet with hinged cover (IP44)
T830 Colour temperature 3000K, CRI 80+

LUPI LED

Product Group: Diffuser and wall luminaires

Description: A wall mounted LED luminaire with opal diffuser and direct/indirect lighting effect
Diffuser: opal polycarbonate, UV stabilized
Body: extruded aluminium body, light grey (RAL 9006) finish

General data: Mains voltage: 220-240V, 50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct/indirect
LED lifetime, h: 75000/L80B50
Operating temperature range, °C: ta -15...+35
Protection class IEC: I
Ingress protection code: IP44
Mechanical impact resistance: IK05
EEC: A+/A++

Installation: Surface luminaire designed to be fixed to walls of any type. Push-in terminal, 5x2x2.5mm2

Environment: Indoor

Application: Household, hotel, bathroom

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- 1G Strain relief for power supply cable
- OP- Opal diffuser with high light transmittance
- RAL RAL colour
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

WATERPROOF AND CLEANROOM LUMINAIRES

www.northcliffe.org

BARAT LED

Product Group: Waterproof and Cleanroom Luminaires

Images for the product family and options:

Description: A waterproof IP66 LED luminaire with opal diffuser and high impact resistance
 Diffuser: opal polycarbonate (PC), UV stabilized, high impact resistance
 Body: light grey polycarbonate, UV stabilized, high impact resistance
 Gear tray: sheet steel, white finish
 Diffuser retaining clips and sealing washers from the end of the body for easy maintenance

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50 (100000/L80B50 low power versions)
 Operating temperature range, °C: ta -20...+35
 Protection class IEC: I (II optional)
 Ingress protection code: IP66
 Mechanical impact resistance: IK10
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A++

Installation: Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 5x2x2.5mm2

Environment: Indoor/outdoor with roof

Application: Industry, warehouse, hall, sports, public place, parking area, transport terminal, parking area

Supplied with two fixing brackets for easy installation, sealing washer and accessories for chain or wire suspension

Diffuser retaining clips made of stainless steel available on request. For more information see the option list: IC- Stainless steel clips

Suspension mounting kit for Barat, Proof and Nord LED luminaires with two 1.5 or 3.0 meter rope is available on request. For more information see the accessories list.

TECHNICAL DATA SHEET

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min)
COR30min	Driver with Corridor function 30min (switch off after 30 min)
MW	Integrated microwave (MW) motion sensor with on-off control
MWRFM+	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, dimming control.
MWRFM+off	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, (no dimming control).
MWRFM	Integrated microwave (MW) motion sensor with integrated RF (radio wave) transmitter. Sensor can serve as master. Functions: Staircase, Corridor, dimming control.
MWRFS+	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, dimming control.
MWRFS+off	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor (no dimming control).
MWRFS	Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, (no dimming control).
HBPIR7m	Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
<i>*note - Luminaire with integrated HBPIR7m sensor protection degree is IP65</i>	
EMG	Emergency version 1 hour
EMGB	Emergency version 1 hour (best available technology)
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
<i>*note - EM options not applicable for models: D557, G020</i>	
5TB	5-pole terminal block in middle of luminaire for easy through wiring
<i>*note - 5TB terminal block included as standard</i>	
1LIN	Through wiring 3x1.5 mm ² with two push-in terminal blocks
3LIN	Through wiring 5x1.5 mm ² with two push-in terminal blocks
1LIN2.5	Through wiring 3x2.5 mm ² with two push-in terminal blocks
3LIN2.5	Through wiring 5x2.5 mm ² with two push-in terminal blocks
<i>*note - LIN options applicable for models longer than 800mm, for shorter models 5TB option</i>	
1G	Strain relief for power supply cable
2G	Strain relief for power supply cable, 2pcs
II	Electric shock protection class II
IC	Stainless steel clips
OP LT80	Opal diffuser with high light transmittance
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available accessories:

Product: Suspension MTG KIT - Barat/Proof/Nord LED 1.5m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 1.5 meter, 2pcs

Product: Suspension MTG KIT - Barat/Proof/Nord LED 3.0m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 3.0 meter, 2pcs

Applications:

NORD LED

Product Group: Waterproof and Cleanroom Luminaires

Images for the product family and options:

Description:

A waterproof IP66 LED luminaire for use in extreme temperatures -40 to +50°C environments
 Diffuser: opal polycarbonate, UV stabilized, high impact resistance
 Body: light grey polycarbonate, UV stabilized, high impact resistance, with stainless steel clips
 Gear tray: sheet steel, white finish
 Diffuser retaining clips and sealing washers from the end of the body for easy maintenance

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,97
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50 (75000/L80B50 E780, E784 and E785 models)
 Operating temperature range, °C: ta -40...+50
 Protection class IEC: I
 Ingress protection code: IP66
 Mechanical impact resistance: IK10
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 5x2x2.5mm²

Environment:

Indoor/outdoor with roof

Application:

Industry, cold store, bakery, heating plant, glass factory

Supplied with two fixing brackets for easy installation, sealing washer and accessories for chain or wire suspension

Product: Suspension MTG KIT - Barat/Proof/Nord LED 1.5m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 1.5 meter, 2pcs

Product: Suspension MTG KIT - Barat/Proof/Nord LED 3.0m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 3.0 meter, 2pcs

Applications:

PROOF LED

Product Group: Waterproof and Cleanroom Luminaires

Images for the product family and options:

Description:

A waterproof IP66 LED luminaire with acrylic opal diffuser for use in food industry and aggressive environments where specialized cleaning agents are used
 Diffuser: opal acrylic, UV stabilized, for exposure to severe atmospheric conditions
 Body: light grey thermoplastic, UV stabilized, with stainless steel clips and good chemical resistance
 Gear tray: sheet steel, white finish
 Diffuser retaining clips and sealing washers from the end of the body for easy maintenance

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50 (75000/L80B50 E787, E789, E793, E794, E798 and E799 models)
 Operating temperature range, °C: ta -20...+35
 Protection class IEC: I (II optional)
 Ingress protection code: IP66
 Mechanical impact resistance: IK06
 Protection symbol: D
 Glow wire test, °C: 650
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 5x2x2.5mm²

Environment:

Indoor

Application:

Industry, food processing area, warehouse, hall, agriculture. Suits well in aggressive atmospheres with cleaning agents, salts, acids and mineral oils

Supplied with two fixing brackets for easy installation, sealing washer and accessories for chain or wire suspension

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
 - DALI Driver with DALI interface
 - COR Driver with Corridor function (never off)
 - COR1min Driver with Corridor function 1min (switch off after 1 min)
 - COR30min Driver with Corridor function 30min (switch off after 30 min)
 - MW Integrated microwave (MW) motion sensor with on-off control
 - MWRFM+ Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, dimming control
 - MWRFM+off Integrated microwave (MW) motion sensor with integrated RF (radio wave) transceiver. Sensor can serve as both master and slave. Functions: Staircase, Corridor, (no dimming control)
 - MWRFM Integrated microwave (MW) motion sensor with integrated RF (radio wave) transmitter. Sensor can serve as master. Functions: Staircase, Corridor, dimming control
 - MWRFS+ Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, dimming control
 - MWRFS+off Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor (no dimming control)
 - MWRFS Integrated microwave (MW) motion sensor with integrated RF (radio wave) receiver. Sensor can serve as slave. Functions: Staircase, Corridor, (no dimming control)
 - EMG Emergency version 1 hour
 - EMGB Emergency version 1 hour (best available technology)
 - EM3 Emergency version 3 hours
 - EM3B Emergency version 3 hours (best available technology)
 - EM3A Emergency version equipped with an autonomous testing system, 3 hours
 - EM3D Emergency version 3 hours with DALI interface
- *note - EM options not applicable for models: D557, G020*
- 5TB 5-pole terminal block in middle of luminaire for easy through wiring
- *note - 5TB terminal block included as standard*
- 1LIN Through wiring 3x1.5 mm² with two push-in terminal blocks
 - 3LIN Through wiring 5x1.5 mm² with two push-in terminal blocks
 - 1LIN2.5 Through wiring 3x2.5 mm² with two push-in terminal blocks
 - 3LIN2.5 Through wiring 5x2.5 mm² with two push-in terminal blocks
- *note - LIN options applicable for models longer than 800mm, for shorter models 5TB option*
- 1G Strain relief for power supply cable
 - 2G Strain relief for power supply cable, 2pcs
 - II Electric shock protection class II
 - IC Stainless steel clips
 - OP LT80 Opal diffuser with high light transmittance
 - T830 Colour temperature 3000K, CRI 80+
 - T840 Colour temperature 4000K, CRI 80+

Available accessories:

Product: Suspension MTG KIT - Barat/Proof/Nord LED 1.5m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 1.5 meter, 2pcs

Product: Suspension MTG KIT - Barat/Proof/Nord LED 3.0m
Description: Suspension kit for Barat/Proof/Nord LED luminaires, 3.0 meter, 2pcs

HERCULES LED

Product Group: Waterproof and Cleanroom Luminaires

Description: A waterproof IP66 LED luminaire with aluminium body and tempered glass diffuser. Suits well in aggressive atmospheres with cleaning agents, salts, acids and mineral oils
 Diffuser: tempered safety glass, impact resistant, with stainless steel clips and safety clips
 Optics: 30x90°, 60x100°, 90x100°, asymmetric and double asymmetric light beam
 Body: extruded aluminium, light grey finish
 Brass cable gland and polyurethane sealing to provide reliable IP protection

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50 (75000/L80B50 D921 and D924, 50000/L80B50 D922 and D925 models)
 Operating temperature range, °C: ta -25...+35/40
 Protection class IEC: I
 Ingress protection code: IP66
 Mechanical impact resistance: IK10
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A++

Installation: Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 3x2x2.5mm²

Environment: Indoor/outdoor with roof

Application: Industry, food processing area, warehouse, hall, agriculture

CUJAM LED

Product Group: Waterproof and Cleanroom Luminaires

Description: A budget waterproof IP65 LED luminaire with opal polycarbonate diffuser and high impact resistance
 Diffuser: opal polycarbonate, high impact resistance
 Body: white polycarbonate

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 30000/L70B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: II
 Ingress protection code: IP65
 Mechanical impact resistance: IK07
 EEC: A+

Installation: Surface luminaire designed to be fixed to ceiling of any type or suspended. Cable, 0.25m, 2x0.75mm2

Environment: Indoor

Application: Industry, warehouse, public place, parking area

ARCTIC R LED

Product Group: Waterproof and Cleanroom Luminaires

Description: A recessed IP65 LED cleanroom luminaire with double parabolic reflector provides an ideal solution for pharmaceutical, medical or other sterile areas
 Louver: double parabolic, UGR<19 glare protection
 Diffuser: clear acrylic, UV stable, chemically resistant
 Body: steel sheet, white finish
 The frame is fitted into the body with four stainless steel screws to provide reliable IP protection

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta -10...+35 (0...+35°C emergency version)
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Fits 15-24mm exposed T-Bar and/or plasterboard ceiling. When the luminaire is fitted into a plasterboard ceiling, it is recommended to use support brackets (to be ordered separately). Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Healthcare, laboratory, industry

- DALI Driver with DALI interface
- EM3 Emergency version 3 hours
- EM3B Emergency version 3 hours (best available technology)
- EM3A Emergency version equipped with an autonomous testing system, 3 hours
- EM3D Emergency version 3 hours with DALI interface
- 5TB 5-pole terminal block in middle of luminaire for easy through wiring
- 1G Strain relief for power supply cable
- SB Support brackets for installation into a plasterboard ceiling
- W625 Designed for the German market to fit 625x625 suspended ceiling (subject to minimum quantity)
- WID Wide beam reflector
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

ARCTIC S LED

Product Group: Waterproof and Cleanroom Luminaires

Description: A surface IP65 LED cleanroom luminaire with double parabolic reflector provides an ideal solution for pharmaceutical, medical or other sterile areas
 Louver: double parabolic, UGR<19 glare protection
 Diffuser: clear acrylic, UV stable, chemically resistant
 Body: steel sheet, white finish
 The frame is fitted into the body with four stainless steel screws to provide reliable IP protection

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta -10...+35 (0...+35°C emergency version)
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Luminaire is designed to be fixed to ceiling of any type. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Healthcare, laboratory, industry

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
5TB	5-pole terminal block in middle of luminaire for easy through wiring
1G	Strain relief for power supply cable
SB	Support brackets for installation into a plasterboard ceiling
W625	Designed for the German market to fit 625x625 suspended ceiling (subject to minimum quantity)
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

HERMETIC SD LED

Product Group: Waterproof and Cleanroom Luminaires

Description: A surface IP65 LED cleanroom luminaire with opal acrylic diffuser provides an ideal solution for pharmaceutical, medical or other sterile areas
 Diffuser: opal acrylic, UV stable, chemically resistant
 Body: steel sheet, white finish
 The frame is fitted into the body with four stainless steel screws to provide reliable IP protection

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -10...+35 (0...+35°C emergency version)
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK05
 EEC: A++

Installation: Luminaire is designed to be fixed to ceiling of any type. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Healthcare, laboratory, industry

EXPLOSION-PROOF LUMINAIRES

www.northcliffe.org

BARAT LED Ex

Product Group: Explosion-Proof Luminaires

Description:

An explosion proof IP66 LED luminaire designed for illumination of hazardous areas where an explosive atmosphere persists for a short period. Hazardous zones: 2, 22. Suitable for industrial areas and facilities with a danger of flammable gas, dust and vapour explosion. Marking of explosion-protection: II 3G Ex nA IIC T6 Gc; II 3D Ex tD IIIC T85°C IP66 Dc
 Diffuser: opal polycarbonate (PC), UV stabilized, high impact resistance
 Body: light grey polycarbonate, UV stabilized, high impact resistance. Stainless steel diffuser retaining clips
 Gear tray: sheet steel, white finish
 Explosion group: Gas: IIC, IIB, IIA Dust: IIIC, IIIB, IIIA
 ATEX cable gland: 2xM20, 1xblanking plug
 Cable diameter: \varnothing 7-13mm

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50 (100000/L80B50 low power versions)
 Operating temperature range, °C: ta -25...+40 (ta +5...+40 with EM3)
 Protection class IEC: I
 Ingress protection code: IP66
 Mechanical impact resistance: IK08
 EEC: A++

Installation:

Surface luminaire is designed to be fixed to ceiling of any type or suspended. Supplied with two fixing brackets for easy installation, sealing washer and accessories for chain and wire suspension. Installed luminaires have to be protected from mechanical damage. Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

ANTI-VANDAL LUMINAIRES

www.northcliffe.org

CAELUM R LED

Product Group: Anti-vandal Luminaires

Description:

A recessed IP65 LED luminaire designed to withstand extreme vandalism in public areas
 Diffuser: opal polycarbonate, 4mm, UV stabilized, vandal resistant
 Body: zinc-plated sheet steel, white polyester powder finish, vandal resistant
 The frame is fitted into the body with stainless steel security screws

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50 (75000/L80B50 E853 and E856 models)
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK10+
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A+/A++

Installation:

Recessed luminaire designed to be fixed into ceiling or wall, requires a cut-out. Push-in terminal, 3x2x2.5mm2

Environment:

Indoor/outdoor

Application:

Public place, tunnel, transport terminal, parking area, metro, prison, psychiatric hospital

CAELUM A LED

Product Group: Anti-vandal Luminaires

Description:

A surface corner-mounted IP65 LED luminaire designed to withstand extreme vandalism in public areas
 Diffuser: opal polycarbonate, 4mm, UV stabilized, vandal resistant
 Body: zinc-plated sheet steel, white polyester powder finish, vandal resistant
 The frame is fitted into the body with stainless steel security screws

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L80B50 (75000/L80B50 E875 and E878 models)
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK10+
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A+/A++

Installation:

Corner-mounted luminaire. Push-in terminal, 3x2x2.5mm²

Environment:

Indoor/outdoor

Application:

Public place, tunnel, transport terminal, parking area, metro, prison, psychiatric hospital

MARS LED

Product Group: Anti-vandal Luminaires

Images for the product family and options:

Description: A surface IP65 LED luminaire with opal diffuser and designed to withstand vandalism in public areas
 Diffuser: opal polycarbonate, UV stabilized, vandal resistant
 Body: die-cast aluminium, raw or dark grey polyester powder finish, vandal resistant
 The frame is fitted into the body with stainless steel screws

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,85
 Light source: E27/LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK10+
 Protection symbol: D
 Glow wire test, °C: 850
 EEC: A

Installation: Designed to be fixed onto ceiling or walls of any type, including flammable surfaces. Security screws are available on request. Push-in terminal, 3x2x2.5mm2

Environment: Outdoor

Application: Public place, facade illumination, tunnel, transport terminal, parking area, metro, public space

EMERGENCY LIGHTING

www.northcliffe.org

EMS MINI- EMERGENCY MONITORING SYSTEM

Product Group: Emergency Lighting

Description:

The EMS MINI system is a modern, compact solution designed for the monitoring of emergency luminaires with unique addresses installed in small-size buildings and facilities. The system offers the possibility to supervise up to 500 emergency luminaires equipped with EMS-type power supply sources.

The main advantages of the EMS MINI control unit are its compact size and the possibility to mount it on a DIN-3 standard rail (TH35). The system is simplified but not deprived of the most important functionalities from the user's point of view. Each control unit is equipped with an RS485 connection for the communication bus, an RJ45 connector, four LEDs indicating the current status of the system, three function keys which can be programmed in the control unit, a reset button and a service pin to assign a unique IP address to the unit. Additionally, the control unit has two potential-free input contacts and two outputs. Communication with EMS emergency luminaires is provided by means of an RS485 standard communication bus. A single bus may not exceed 1200 m when linear topology is used. The communication with luminaires is continuous.

Features:

- Monitoring of up to 500 emergency luminaires
- Maximum length of each single bus line 1200m
- System status indicators
- TH35 (DIN-3) rail mounted
- Three programmable function keys
- Two potential-free inputs (current loops)
- Two outputs (to control external relays)
- Internal memory to store emergency lighting system reports, compliant with EN 50172
- Mains mode, configured from the control unit
- Testing of individual luminaires or groups of luminaires
- Internal battery for uninterruptible operation
- RJ45 connector for direct communication with any computer via Ethernet
- Individually programmable IP address
- System status preview using any web browser
- Continuous communication with luminaires installed in the system
- System management and visualization by using dedicated EMS smart software

**for safety reasons, the control unit communicates with luminaires continuously and has a built-in powers supply source. All EMS systems are manufactured in compliance with applicable European standards*

Lighting fittings working under the system have unique addresses and are connected to Emergency system control unit with a communication cable. The fittings communicate with the central unit reporting any abnormalities which are signaled on the central unit display with LED diodes placed on the central unit panel. Each fitting connected to the system may have an individual description in the control unit. When abnormalities, related to the operation of a fitting, occur, information about the type of abnormality and the location of the fitting appears on the display of the control unit. The system allows manual testing of a single fitting. Central unit's software allows dividing the fittings into groups which enables one to run tests only chosen groups of fittings. Apart from manual tests, the following auto-tests are carried out:

TEST A – a short test, recommended every 30 days (LST-EN 50172) – checks the following parameters:

- Enforcing emergency operation of the fitting for 5 minutes
- Control of battery power discharge
- Control of minimum voltage of battery

TEST B – a long test recommended every 360 days (LST-EN 50172) – checks the following parameters:

- Enforcing emergency operation of the fitting for the time programmed for each fitting (1, 2, 3 h)
- Control of battery power discharge
- Control of minimum voltage of battery
- Control of the condition of battery

The frequency of running tests A and B may be programmed according to the needs of the user. There is a possibility of programming the tests with exact dates, when they should be carried out. Long tests B should be run when the premises are not used within 24 hours after finishing the test. This time is needed for the recharging of the batteries discharged during the long test. Test results are stored in the memory of the central unit.

System components:

EMS address module

Features:

- Compatible with LED light sources
- Switching to emergency mode
- LiFePO₄ battery
- Battery charge indicator
- Luminaire status indicator

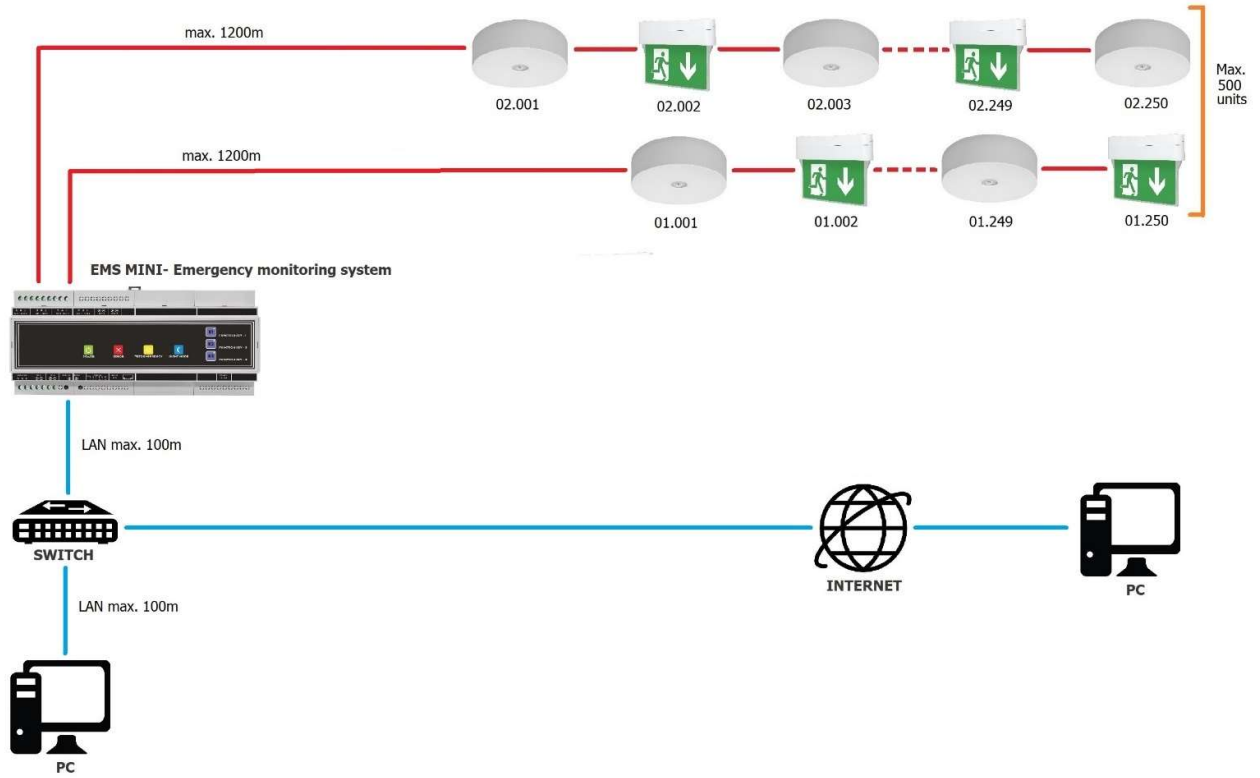

EMS smart platform

Features:

- System status monitoring
- System programming
- Event log viewing
- Test function
- Possibility to upload floor plans of the building/facility

System topology:

EMS- EMERGENCY MONITORING SYSTEM

Product Group: Emergency Lighting

Description:

The EMS system is the latest and the most advanced monitoring system designed to control independent luminaires of emergency and escape route lighting systems. It is designed to be used in medium-to-large facilities and buildings. Each control unit can handle up to 4,000 luminaires using MP-250 power submodules. The submodules communicate with the EMS control unit via LAN. The use of LAN also enables communication between individual submodules. The EMS system is equipped with a touch panel and an intuitive graphic menu to enable quick and easy system configuration without the need for using EMS smart platform. Thanks to introduced technical solutions polarity does not need to be observed any more while connecting a communication bus to the following system components:

- EMS control unit
- MP-250 power submodules
- EMS address modules

Each EMS address module is assigned an individual number/address. The addresses are factory-assigned, so an addressing unit is not required for installation, setting up or maintenance work. Communication with EMS emergency luminaires is provided by means of an RS485 standard communication bus. A single bus may not exceed 1200 m when linear topology is used. The communication with luminaires is continuous.

Features:

- Touch screen control unit
- Unique addresses of luminaires
- Factory-assigned module addresses
- No need for an addressing unit
- Intuitive graphical user interface
- No need to keep the polarity of communication cables connection
- Inbuilt four potential-free inputs and outputs
- Remote access via web browser
- Monitoring of up to 750 luminaires per control unit (3 logical buses: 01, 02 and 03 - each one with 2 physical channels)
- Possibility to expand the control system up to 4,000 luminaires by using additional external submodules
- System status indication
- Compatibility LED light sources
- Internal battery for uninterruptible operation
- Automatic performance of tests
- Event log
- Possibility to divide the luminaires for logic groups
- Mains mode for selected luminaires/groups
- System management and visualization using of dedicated EMS smart software
- BACnet standard, enabling compatibility of the EMS with Building Management Systems (BMS)

**for safety reasons, the control unit communicates with luminaires continuously and has a built-in powers supply source. All EMS systems are manufactured in compliance with applicable European standards*

Lighting fittings working under the system have unique addresses and are connected to Emergency system control unit with a communication cable. The fittings communicate with the central unit reporting any abnormalities which are signaled on the central unit display with LED diodes placed on the central unit panel. Each fitting connected to the system may have an individual description in the control unit. When abnormalities, related to the operation of a fitting, occur, information about the type of abnormality and the location of the fitting appears on the display of the control unit. The system allows manual testing of a single fitting. Central unit's software allows dividing the fittings into groups which enables one to run tests only chosen groups of fittings. Apart from manual tests, the following auto-tests are carried out:

TEST A – a short test, recommended every 30 days (LST-EN 50172) – checks the following parameters:

- Enforcing emergency operation of the fitting for 5 minutes
- Control of battery power discharge
- Control of minimum voltage of battery

TEST B – a long test recommended every 360 days (LST-EN 50172) – checks the following parameters:

- Enforcing emergency operation of the fitting for the time programmed for each fitting (1, 2, 3h)
- Control of battery power discharge
- Control of minimum voltage of battery
- Control of the condition of battery

The frequency of running tests A and B may be programmed according to the needs of the user. There is a possibility of programming the tests with exact dates, when they should be carried out. Long tests B should be run when the premises are not used within 24 hours after finishing the test. This time is needed for the recharging of the batteries discharged during the long test. Test results are stored in the memory of the central unit.

System components:

MP-250 Power module

Features:

- Submodules mounted on a DIN-3 rail (TH35)
- Monitoring of up to 250 luminaires
- Ethernet connection for LAN communication
- Service pin and Reset button
- Freely programmable IP address
- Built-in uninterruptible power supply unit
- LED indicator of battery charging

TECHNICAL DATA SHEET

CEBLV- CENTRAL BATTERY LOW VOTAGE SYSTEM

Product Group: Emergency Lighting

Description:

Central battery system CEBLV is a high-tech device created to power and monitor emergency lighting in buildings of small and medium size and in closed fire zones. The system can work with up to 80 LED luminaires supplied by SELV 24V (Safety Extra-Low Voltage) and was designed in Smart technology.

The application of the SELV voltage ensures high level of safety of servicing of the system and its elements compliant with the currently valid regulations. Small dimensions of the central unit enable the installation of the system in places where one cannot fit a large-size central battery system. The CEBLV central unit is equipped with a big touch panel enabling both the current reading of the status of the system, circuits and fittings and the introduction of all settings and parameters of the system with the use of the user interface. Statuses are displayed in both graphic and text form. Using the central unit one can assign a name to the fitting that will clearly help to identify the fittings installed in the system. Using the central unit one can program and freely configure the emergency fittings in constant, non-constant, switching and switching-dimming modes as well as night work mode. The system has its own IP address and RJ45 slot which is used for direct connection to Ethernet. With a built-in WEB module, you can directly access the system from any computer and print the event log by using any web browser. Additionally, the system has an input and an SD card that allows to record and upload system settings (back-up) and the record reports of the Event Log in accordance with EN 50172.

Features:

- Power supply and monitoring up to 80 individual LED fittings in CEBLV smart technology
- Safe supply SELV 24V
- Smart technology – any mode of a fitting
- Easy to read, big LCD touch screen
- Easy and intuitive menu with simple icons
- Automatic or manual activation of short or long tests of the whole system
- Automatic detection and adding of the fittings to the system
- Built-in WEB module
- Built-in clock and calendar with DST adjustment and synchronization with a time server
- Programming and configuration of the fittings directly from the system
- Assigning names to luminaires
- Assigning design addresses to luminaires
- Communication with luminaires through the power supply cable
- SD slot and SD card for recording, transmission and printing emergency lighting reports from any PC, in accordance with EN 50172
- Possibility to store the system settings (back – up) on SD card
- Contained security light mode (night operation)
- Possibility to control fittings and some functions of the system via terminals 24V and 230V
- Testing of each fitting separately as well as group of fittings
- Internal rechargeable battery with a designed life of 10 years
- RJ45 slot for direct connection to Ethernet
- Individual IP address
- Preview of the system via any web browser
- Works with any BMS (Building Management System) by using the module of potential-free contacts or a CAN-bus
- Unlimited grouping of systems and joint supervision by smart touch screen controller
- Control menu with language selection
- Management and visualization of the system using a dedicated CEBLV smart platform

**for safety reasons, the control unit communicates with luminaires continuously and has a built-in powers supply source. All EMS systems are manufactured in compliance with applicable European standards*

An CEBLV unit can be supplied from a 230V AC or a 216V DC power source. As a result, the unit can be connected to a central battery system as a substation without installing internal batteries. This functionality enables the system to be used in facilities where a central battery system is required, but a safe voltage must also be ensured in areas where there is a risk of electric shock.

CEBLV topology:

**national regulations apply*

Decentralized system:

- Main station failure
- Cable failure: main station – substation
- Damaged insulation of the branch circuit

- No central system
- Each system is independent; the failure is limited to one fire zone
- Negligible fire hazard (SELV)

SMART- switching method and revision technology

A conventional installation requires that the operating mode of each circuit is specified at the design stage. Subsequent modifications or errors may cause extra costs. In order to eliminate such drawbacks, NORTHCLIFFE has introduced a new technology with automatic monitoring and individual control of each luminaire in a system.

Switching

Method

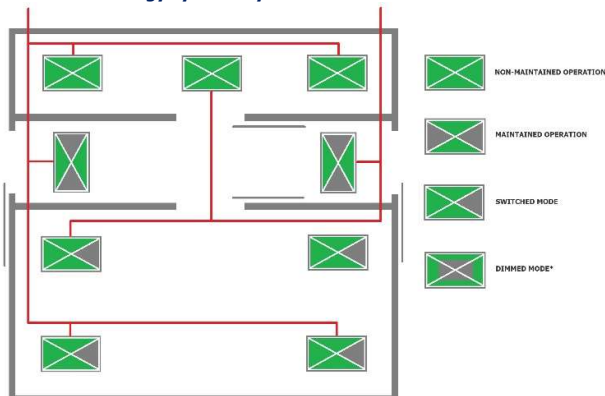

And

Revision

Technology

or SMART for short. This technology enables installation of luminaires- in a common circuit- operating in four modes: continuous, intermittent, switched and dimmed. Programming and monitoring of the luminaires are provided via power supply cables. The applied technology does not require the use of special communication cables. It can be implemented if appropriate address modules are installed in the luminaires. The modules are fitted as standard in all luminaires designed to work within an CEBLV central battery system. Each address module is assigned a unique address which enables its accurate identification in the system.

A SMART technology system layout:

** CEBLV systems only*

SMART advantages:

- Luminaires operating in different modes can be installed within a single circuit
- Less cable is required
- Smaller number of circuits
- Lower installation costs
- Operating modes of the luminaires can be changed at any time

TECHNICAL DATA SHEET

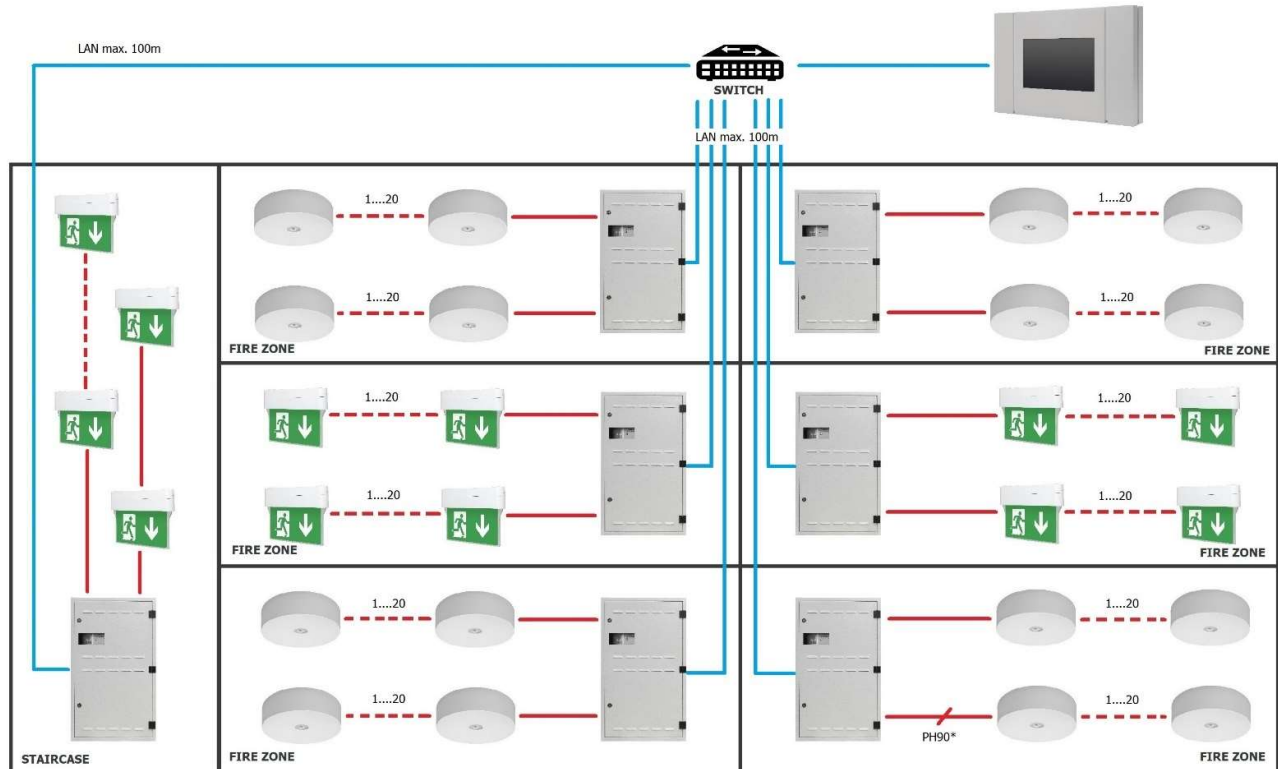

SMART touch controller

The SMART touch controller enables remote control and monitoring of any number of units from a single location. The controller provides remote monitoring, configuration and reading of events for each connected CEBLV unit.

Features:

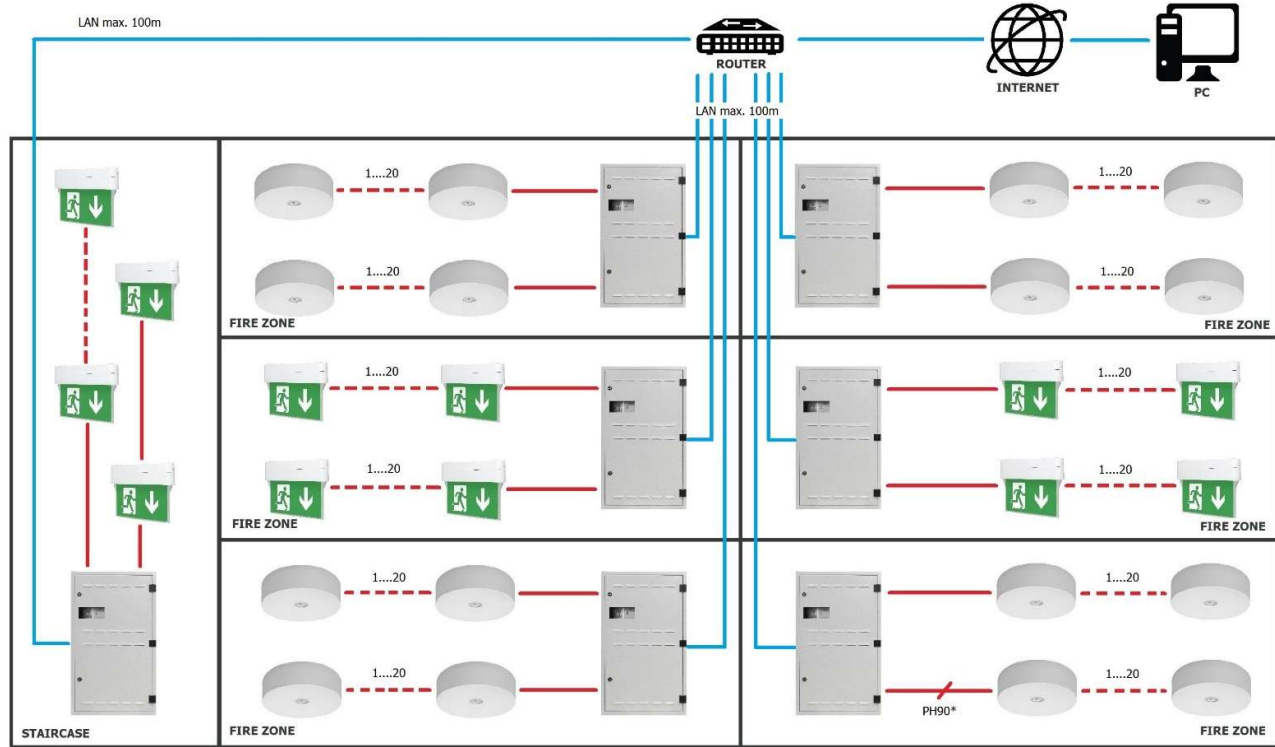

- Functional test/Battery test activation for each device
- Global system locking/unlocking
- Password-protected access to the controller
- Checking the status of individual systems
- Full remote configuration of all systems
- Active list of systems enabling quick status checks
- Four globally configured inputs and outputs
- Standard fitted Ethernet interface to enable remote control and visualization of the system via a web browser

CEBLV with SMART touch controller topology:

The CEBLV system is equipped with an Ethernet port as standard. The connection enables remote checking of the status and setting up of the system via FIRE ZONE a dedicated website. This solution provides the user with the ability to control and monitor the system from a computer with a web browser installed. To check the system status using a computer, the user only needs to log in to the structural network of the facility or building where the CEBLV is installed. Each unit, circuit and luminaire can be monitored via the Internet. The access to the dedicated website is password protected.

CEBLV remote control topology:

ARA R LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A recessed LED emergency escape luminaire with latest optics designed to illuminate escape routes or open areas
 Optics: LER- escape route, LOA- open areas
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Electronic gear and battery package installed in a separate box
 Deep discharge protection
 The extremely effective optics reflected in the very large mounting distances between the luminaires:
 up to 38m along the escape routes;
 up to 26m in the open areas;
 that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP20 or IP65/20
 Mechanical impact resistance: IK08

Installation:

Suitable for plasterboard or similar type of ceiling, requires a cut-out Ø83mm and under-ceiling height >150mm. Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

ARA S LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A surface LED emergency escape luminaire with latest optics designed to illuminate escape routes or open areas. An additional option is to adapt the fitting to work in the low temperatures: up to -25°C
 Optics: LER- escape route, LOA- open areas
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO4 optional: AUT)
 Deep discharge protection
 The extremely effective optics reflected in the very large mounting distances between the luminaires:
 up to 37m along the escape routes;
 up to 26,5m in the open areas;
 that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40 (ta -25...+40 optional)
 Protection class IEC: II
 Ingress protection code: IP42 or IP65
 Mechanical impact resistance: IK08

Installation:

Designed to be fixed onto ceiling or walls of any type. Push-in terminal, 3x2x2.5mm2

Environment:

Indoor

Application:

Emergency lighting

Note: M-maintained (with an option of connecting as non-maintained), NM- non-maintained, power and output indicates data in emergency mode, tolerance range for optical and electrical data: ±10%, values apply to an ambient temperature of 25°C

TECHNICAL DATA SHEET

Available options:

- TEST Manual test button
- AUT Autonomous testing system
- CEB Fitting to central battery system
- CLV Fitting to low voltage central battery system CEBLV
- EMS Fitting to emergency monitoring system
- IP65 IP65 ingress protection for surface version
- tmin-25 Suitable for low temperatures with ta -25...+40°C
- LGREY Light grey thermoplastic body
- BLACK Black thermoplastic body
- LER Optic for escape route
- LOA Optic for open areas
- LOU Optic for mixed areas/universal
- LOS Optic with asymmetric beam

Photometry of LOA/LER

L1- distance from the wall to the first fixture
L2- distance between fixtures
H- height of the ceiling

CORRIDOR R LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A recessed LED emergency escape luminaire with latest optics designed to illuminate escape routes or open areas
 Optics: LER- escape route, LOA- open areas
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Electronic gear and battery package installed in a separate box
 Deep discharge protection
 The extremely effective optics reflected in the very large assembling distances between the luminaires:
 up to 28m along the escape routes;
 up to 19,5m in the open areas;
 that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP20
 Mechanical impact resistance: IK08

Installation:

Suitable for plasterboard or similar type of ceiling, requires a cut-out Ø83mm and under-ceiling height >150mm. Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

CORRIDOR S LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A surface LED emergency escape luminaire with latest optics designed to illuminate escape routes or open areas
 Optics: LER- escape route, LOA- open areas
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Deep discharge protection
 The extremely effective optics reflected in the very large assembling distances between the luminaires:
 up to 29m along the escape routes;
 up to 20m in the open areas;
 that effects significantly on reduction of the number of needed emergency luminaires and, consequently, the costs of installation and subsequent maintenance

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP41
 Mechanical impact resistance: IK08

Installation:

Designed to be fixed onto ceiling or walls of any type. Screw terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

APOLLO HIGH LED

Product Group: Emergency Lighting

Description: A surface LED emergency escape luminaire with IP65 degree of protection and extremely robust housing for high mounting applications. An additional option is to adapt the fitting to work in the low temperatures: up to -25 °C
 Diffuser: clear polycarbonate, impact resistant
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Deep discharge protection

General data: Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40 (ta -25...+40 optional)
 Protection class IEC: II
 Ingress protection code: IP65
 Mechanical impact resistance: IK08

Installation: Designed to be fixed onto ceiling of any type. Suggested mounting height from 8 to 14 meters. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Emergency lighting

CAPELLA LED

Product Group: Emergency Lighting

Description:

A recessed double-sided LED emergency exit sign with steel body for both mains and emergency operations
 Diffuser: clear PMMA
 Body: steel sheet, light grey finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Recognition distance: 30 meters
 Deep discharge protection

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Omnidirectional
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK02

Installation:

Suitable for plasterboard or similar types of ceiling, requires a cut-out: 330x65mm and under-ceiling height >110mm. Supplied with legend kit ("Exit", "Left" and "Right"). Push-in terminal, 3x2x2.5mm2

Environment:

Indoor

Application:

Emergency lighting

Supplied with legend kit ("Exit", "Left" and "Right")

HELM LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A surface LED emergency exit sign with IP65 degree of protection and extremely robust housing, ensures long life even under the toughest conditions. An additional option is to adapt the fitting to work in the low temperatures: up to -25°C
 Diffuser: clear polycarbonate, impact resistant
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Recognition distance: 25 meters
 Deep discharge protection

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40 (ta -25...+40 optional)
 Protection class IEC: II
 Ingress protection code: IP65
 Mechanical impact resistance: IK08

Installation:

Designed to be fixed onto ceiling or walls of any type. Accessory for two-sided emergency exit sign and for recessed mounting available on request, requires a cut-out: 260x125mm (208x107mm HELM S LED). Supplied with legend kit ("Exit", "Left" and "Right"). Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

Supplied with legend kit ("Exit", "Left" and "Right")

NASHI R LED

Product Group: Emergency Lighting

Description: A recessed double-sided LED emergency exit sign with IP44 degree of protection for both mains and emergency operations
 Diffuser: acrylic glass, clear
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Time of operation in emergency mode: 1 or 3 hours
 Battery: high-temperature nickel-cadmium (lithium iron phosphate optional: AUT)
 Recognition distance: 25 meters
 Deep discharge protection

General data: Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Omnidirectional
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK02

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: 328x62x206(300x45). Supplied with legend kit ("Exit", "Left" and "Right"). Screw terminal, 3x2x2.5mm²

Environment: Indoor

Application: Emergency lighting

LEPORIS U LED

Product Group: Emergency Lighting

Images for the product family and options:

Description:

A suspended double-sided LED emergency exit sign with modern design for both mains and emergency operations
 Diffuser: clear PMMA
 Body: polycarbonate, white finish, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Recognition distance: 30 meters
 Deep discharge protection

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP40
 Mechanical impact resistance: IK02

Installation:

Designed to be fixed onto ceilings of any type. Suspension rope length can be adjusted from 0 to 1000mm. Supplied with legend kit ("Exit", "Left" and "Right"). Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

SEASON LED

Product Group: Emergency Lighting

Description:

A surface four-sided LED emergency exit sign for both mains and emergency operations
 Body: opal PMMA, with LED status indicator
 Battery charging time: 24 hours (12 hours optional: AUT)
 Battery: NiCd (LiFePO₄ optional: AUT)
 Recognition distance: 48 meters
 Deep discharge protection

General data:

Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: II
 Ingress protection code: IP41
 Mechanical impact resistance: IK05

Installation:

Designed to be fixed onto ceilings of any type. Pictograms have to be chosen and ordered as a separate item. Push-in terminal, 3x2x2.5mm²

Environment:

Indoor

Application:

Emergency lighting

LIBRA LED

Product Group: Emergency Lighting

Images for the product family and options:

Description: A surface LED emergency exit sign with IP65 degree of protection and extremely robust housing for both mains and emergency operations in escape routes and open areas
 Diffuser: opal or clear polycarbonate, impact resistant
 Body: polycarbonate, white finish, with LED status indicator and test button
 Battery charging time: 24 hours
 Battery: NiCd
 Recognition distance: 20 meters

General data: Mains voltage: 220-240V, 50-60Hz
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L70B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08

Installation: Designed to be fixed onto walls of any type, including flammable surfaces. Supplied with legend kit ("Exit", "Left" and "Right"). Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Emergency lighting

Supplied with legend kit ("Exit", "Left" and "Right")

SPOTLIGHTS

www.northcliffe.org

PEGASUS H LED

Product Group: Spotlights

Images for the product family and options:

Description:

A recessed LED spot light adjustable in all directions, providing unique interior design solutions. Ideal for areas requiring good colour rendering and high lighting levels
 Reflector: faceted aluminum, 40° (standard), 24° beam angles, tilting ±30°, rotatable 355°
 Diffuser: clear, PMMA
 Body: die-cast aluminium, white finish

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50 (75000/L80B50 low power versions)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP20
 Mechanical impact resistance: IK02
 EEC: A++

Installation:

Suitable for plasterboard or similar types of ceiling, requires a cut-out (165x165 or 340x165mm). Push-in terminal, 2x1.5mm2

Environment:

Indoor

Application:

Retail, showroom, museum, exhibition, public place

Description: A cylindrical LED track light with symmetrical faceted reflector designed for the accent lighting
 Reflector: faceted aluminum, 36° (standard), 24° and 15° beam angles
 Diffuser: clear, PMMA
 Body: aluminum, white finish, with adaptor

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50 (75000/L80B50 low power versions)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK02
 EEC: A++

Installation: Surface luminaire is designed to be fixed into 4/6-conductors surface/recessed tracks. Track adaptor (3-phase + N) with phase selector

Environment: Indoor

Application: Retail, showroom, museum, exhibition, public place

KALI LED

Product Group: Spotlights

Images for the product family and options:

Description: A rectangular LED track light with symmetrical faceted reflector designed for the accent lighting
 Reflector: faceted aluminum, 60° beam angle
 Diffuser: clear, tempered glass
 Body: die-cast aluminum, white finish, adjustable direction, with adaptor

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50 (75000/L80B50 low power versions)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK02
 EEC: A++

Installation: Surface luminaire is designed to be fixed into 4/6-conductors surface/recessed tracks. Track adaptor (3-phase + N) with phase selector

Environment: Indoor

Application: Retail, showroom, exhibition, public place

A spotlight ensures flexibility by adjusting luminaire according to your requirements

SHARQI LED

Product Group: Spotlights

Images for the product family and options:

Description: A recessed LED spot light with symmetrical faceted reflector designed for the accent lighting
 Reflector: faceted aluminum, 40° (standard), 24° and 60° beam angles
 Diffuser: clear, PMMA
 Body: aluminium, white finish, adjustable direction

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50 (75000/L80B50 low power versions)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP20
 Mechanical impact resistance: IK02
 EEC: A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out (91x91mm). Push-in terminal, 2x1.5mm²

Environment: Indoor

Application: Retail, showroom, museum, exhibition, public place

 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP40
 Mechanical impact resistance: IK02
 EEC: A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out (d170mm). Push-in terminal, 2x1.5mm2

Environment: Indoor

Application: Retail, showroom, exhibition, public place

A spotlight ensures flexibility by adjusting luminaire according to your requirements

TRACK SYSTEM AND PARTS

www.northcliffe.org

ONETRACK

Product Group: Track System and Parts

Onetrack® is the new product range for track lighting based on EUROSTANDARD PLUS® platform. This new state-of-the-art platform is for use in lighting projects employing controllable and fixed output systems. As the platform makes upgrading possible at any moment, non-controllable installations are future proof. The system flexible communication lines ensure its use in future Human Centric Lighting systems.

The Eurostandard plus® 6 conductors track connection diagram:

TECHNICAL DATA SHEET

Onetrack® features:

- universal system based on EUROSTANDARD PLUS® platform
- compatibility with all the existing systems
- easy to mount and change position
- circuits can be controlled individually
- modular solution, easy to extend/adapt
- suitable for department stores and shops
- recessed version also available

Mechanical keys:

There is a mechanical key on the outline of the track to guarantee the right connection of the multiple pieces of the track. Also end-feeds and connection joints have a mechanical key (screw presence as per picture below) that must be taken into account in order to choose the right component. In the catalogue sketches of this articles the position of the key is highlighted with a red line

With the choice of colours and its minimal and elegant design, ONETRACK® system becomes almost invisible in lighting installation, leaving the focus on what is being illuminated. ONETRACK® tracks can be provided with a curved shape (minimum radius is 1.5m)

Surface track: three-circuit surface track with two additional conductors intended to manage a general data signal (DALI, DMX, LON, EIB and others)

Body: Extruded aluminium
Colour: white (W) RAL 9010, black (B) RAL 9005
Conductor: cooper, isolated in PVC profile

Technical data:

Rated current and voltage: L1/L2/L3/N/ground 16A/440V + D+/D- 2x1A/50V FELV AC (DALI)
Frequency: 0/50-60Hz
Phase/phases power: 3,6kVA/ 10,8kVA
Lengths: 1000, 2000, 3000, 4000mm

Recessed track: three-circuit recessed track with two additional conductors intended to manage a general data signal (DALI, DMX, LON, EIB and others)

Body: Extruded aluminium
Colour: white (W) RAL 9010 or black (B) RAL 9005
Conductor: cooper, isolated in PVC profile

Technical data:

Rated current and voltage: L1/L2/L3/N/ground 16A/440V + D+/D- 2x1A/50V FELV AC (DALI)
Frequency: 0/50-60Hz
Phase/phases power: 3,6kVA/ 10,8kVA
Lengths: 1000, 2000, 3000, 4000mm

CRATER

Product Group: Downlights

Images for the product family and options:

Description:	A square recessed LED spotlight with symmetric or asymmetric light distribution Reflector: symmetric or asymmetric Body: die-cast aluminium, white finish
General data:	Mains voltage: 220-240V, 50-60Hz Light source: GU10 Light source included: No Light distribution type: Direct Operating temperature range, °C: ta 0...+35 Protection class IEC: I Ingress protection code: IP20 Mechanical impact resistance: IK04
Installation:	Suitable for plasterboard or similar types of ceiling, requires a cut-out (75x75mm).
Environment:	Indoor
Application:	Office, education, household, hotel, corridor, showroom, exhibition, public place

Suitable for use with GU10 LED bulbs. Bulbs are ordered separately.

Product	Length, mm	Width, mm	Height, mm	Luminaire output*, lm	System power*, W	System efficacy*, lm/W	CRI	CCT*, K	Weight, kg

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

L30	Optics with 30° beam angle
L90	Optics with 90° beam angle
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

AIN LED

Product Group: Downlights

Images for the product family and options:

Description: A budget recessed LED spotlight with adjustable tilt angle and middle beam optics
 Optics: 40° light beam, tilting angle ±30°
 Body: white polycarbonate

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,50
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 30000/L70B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK05
 EEC: A+

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out (Ø68mm). Push-in terminal, 2x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, showroom, exhibition, public place

A luminaire is supplied with an electrical junction enclosure and push-in terminal 2x2x2.5 mm2 (for in and out going cable), also known as "quick connector". It offers installers a quick, easy tool free installation- simply strip the cable, plug it directly into the push-in terminal and close the junction enclosure to secure the cables. The remote junction enclosure gives an easy access to a push-in terminal and fast connection

Available options:

TDIM Driver with trailing-edge and leading-edge dimming
 T830 Colour temperature 3000K, CRI 80+

AURIGA LED

Product Group: Downlights

Images for the product family and options:

Description: A traditional recessed LED downlight with clear diffuser and faceted reflector for a better glare control
 Diffuser: clear glass
 Reflector: faceted aluminum, 60° light beam, UGR<19
 Body: die-cast aluminum, white finish, tool free spring clip installation, with remote driver

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK05
 EEC: A+/A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø195(165). Push-in terminal, 2x1.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, retail, showroom, exhibition, public place

T840	Colour temperature 4000K, CRI 80+

AURIGA C LED

Product Group: Downlights

Description:	A traditional recessed LED downlight with clear diffuser and deepened faceted reflector for a better glare control Diffuser: clear glass Reflector: faceted aluminum, 60° light beam, UGR<19 Body: die-cast aluminum, white finish, tool free spring clip installation, with remote driver
General data:	Mains voltage: 220-240V, 0/50-60Hz Power factor: >0,95 Light source: LED Light source included: Yes Light distribution type: Direct LED lifetime, h: 75000/L80B50 Operating temperature range, °C: ta 0...+35 Protection class IEC: II Ingress protection code: IP44 Mechanical impact resistance: IK05 EEC: A+/A++
Installation:	Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø195(176). Push-in terminal, 2x1.5mm ²
Environment:	Indoor
Application:	Office, education, household, hotel, corridor, bathroom, retail, showroom, exhibition, public place

CRUX LED

Product Group: Downlights

Description: A recessed LED downlight with deepened opal diffuser and attractive look
 Diffuser: opal polycarbonate, UV stable, with white coated ring
 Body: aluminium, white finish, tool free spring clip installation

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK04
 EEC: A+/A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø200(185), Ø235(220). Screw terminal, 2x1.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, retail, showroom, public place

TETRA A LED

Product Group: Downlights

Description: A square LED downlight with translucent micro-prismatic diffuser and attractive look
 Diffuser: translucent micro-prismatic PMMA, UV stable
 Body: steel sheet, white finish, tool free spring clip installation

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK05
 EEC: A+/A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: 260x260(245x240). Screw terminal, 2x1.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, retail, showroom, public place

ANDROMEDA LED

Product Group: Downlights

Description: A budget recessed LED downlight with deepened opal diffuser for direct replacement for traditional compact fluorescent downlights
 Diffuser: opal polycarbonate, UV stable
 Body: aluminium, white finish, tool free spring clip installation

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,60/0,80
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 36000/L70B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP40
 Mechanical impact resistance: IK02
 EEC: A+

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø125(100), Ø150(125), Ø181(165), Ø227(210). Screw terminal, 2x1.5mm²

Environment: Indoor

Application: Office, education, household, hotel, corridor, retail, showroom, public place

ROUND LED

Product Group: Downlights

Description: A low height LED downlight with opal diffuser to allow installation into low and restricted ceiling voids
 Diffuser: opal, UV stable
 Body: die-cast aluminum, white finish, free spring clip installation

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,60
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 36000/L70B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP44
 Mechanical impact resistance: IK04
 EEC: A+

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø120(110), Ø150(135), Ø170(160), Ø190(180), Ø225(210), Ø240(225). Cable, 0.3m, 2x0.75mm²

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, retail, showroom, public place

Description: A surface LED downlight with deepened faceted reflector and cylindrical shape and attractive look
 Reflector: faceted aluminum, 40° light beam, UGR<16
 Body: die-cast aluminum, white finish
 Body: aluminum, white finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK02
 EEC: A+/A++

Installation: Suitable for surface mounting on ceiling. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Office, hotel, retail, showroom, exhibition, public place

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- 1G Strain relief for power supply cable
- SUS Suspended version
- RAL RAL colour
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

Available accessories:

Product: Suspension MTG KIT SUSI
 Description: Suspension wire set "I" type, 1.5m adjustable, 1pcs
 *note - 1pcs MTG KIT SUSI for one fitting required

ANTLIA C LED

Product Group: Downlights

Description: A surface LED downlight with deepened opal diffuser and cylindrical shape
 Diffuser: opal, UV stable
 Body: aluminum, white finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50 (75000/L80B50 low power versions)
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: I
 Ingress protection code: IP44
 Mechanical impact resistance: IK04
 EEC: A++

Installation: Suitable for surface mounting on ceiling. Push-in terminal, 3x2x2.5mm2

Environment: Indoor

Application: Office, education, household, hotel, corridor, bathroom, retail, showroom, exhibition, public place

PERSEUS C LED

Product Group: Downlights

Images for the product family and options:

Description: A recessed LED downlight with faceted reflector ideal for environments subject to humidity and excessive dust
 Diffuser: tempered glass, silicon gasket
 Reflector: faceted aluminum, 50° light beam, UGR<19
 Body: die-cast aluminum, white finish, tool free spring clip installation, with remote IP65 driver

General data:
 Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/75000/L80B50
 Operating temperature range, °C: ta 0...+35
 Protection class IEC: II
 Ingress protection code: IP65
 Mechanical impact resistance: IK05
 EEC: A+/A++

Installation: Suitable for plasterboard or similar types of ceiling, requires a cut-out: Ø225(205). Cable, 0.3m, 2x0.75mm2

Environment: Indoor/outdoor with roof

Application: Office, hotel, bathroom, retail, showroom, exhibition, public place

MONTBLANC LED

Product Group: High-bays

Description: A suspended LED low-bay luminaire with industrial design for high mounting applications
 Reflector: aluminium, silver finish
 Diffuser: tempered glass, frosted
 Body: aluminium, silver finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: I
 Ingress protection code: IP20
 Mechanical impact resistance: IK04
 EEC: A+

Installation: Suspended. Supplied with suspension kit and out-going cable for easy mounting. Push-in terminal, 3x2x2.5mm²

Environment: Indoor

Application: Retail, showroom, hall, exhibition, public place

A lighting fixture is supplied with suspension chain, decorative cap and out-going cable for easy installation

PRIZMA LED

Product Group: High-bays

Images for the product family and options:

Description: A suspended LED low-bay luminaire with transparent prismatic reflector for high mounting applications
 Reflector: transparent polycarbonate, prismatic, UV stable
 Body: die-cast aluminium, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta 0...+40
 Protection class IEC: I
 Ingress protection code: IP23
 Mechanical impact resistance: IK02
 EEC: A++

Installation: Suspended. Supplied with suspension hook for easy mounting. Screw terminal, 3x2.5mm²

Environment: Indoor

Application: Retail, showroom, hall, exhibition, public place

Protective cover for glare control available on request. For more information see the option list

Applications:

NORTE L LED

Product Group: High-bays

Images for the product family and options:

Description:

An industrial LED high-bay luminaire with a modern construction and high impact resistance
Optics: 40°, 60°, 90°, 30x70° light beam, silicone rubber sealing, impact resistance
Body: aluminium, white finish

General data:

Mains voltage: 220-240V, 0/50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 75000/L80B50 (100000/L80B50 low power versions)
Operating temperature range, °C: ta -20...+35 (ta 0...+35 with EM3 option)
Protection class IEC: I
Ingress protection code: IP65
Mechanical impact resistance: IK08 (IK10 with protection grid)
EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 3x2x2.5mm2

Environment:

Indoor

Application:

Industry, warehouse, hall, sports, transport terminal

A white protection grid accessory GRID MTG KIT Norte L LED can be used to increase impact resistance of the luminaire to IK10. This version is designed for sports halls, gyms and other spaces where light fittings are in danger of being hit by a ball. For more information see the accessory list

Fixture mounted HBPIR sensors provide fast installation and immediate energy savings by automatically activating lighting only during periods of occupancy. Reliable passive infrared (PIR) technology detects occupancy, and the variable time delay - up to 30 minutes - is user accessible without power, tools or disassembly, and allows the ideal setting based on application needs. Included with the sensor are lenses for high-bay, low-bay and aisle mounting, allowing one unit to cover a variety of applications. The innovative Autocal feature performs an automatic daylight level calibration. Once calibrated, the sensor requires no further adjustment and immediately enters daylight harvesting mode, actively switching the connected fixture load ON and OFF in response to occupancy and available natural light maximizing energy savings through efficient light harvesting.

Fixture mounted HBEAIR sensors ensure lighting is only on when and where it is needed. The sensors in combination with can bring huge benefits in terms of energy management as they provide occupancy detection and daylight sensing for heights up to 16 meters. Energy saving - typically between 30% and 50%. HBEAIR can be easily programmed via a smartphone, that offers immense flexibility to commission luminaires into groups and further divided in zones wirelessly. The HBEAIR offers intelligent wireless lighting control, for warehouse (and similar) applications. Advantages: 5m-16m mounting height, simple grouping via NFC and IR with the Apps, zoning and occupancy sharing (zone with motion goes to full task level while sub-zones are maintained at background light level).

Corridor option automatic switching is based on presence/motion with the time delay set on site to suit the customer's requirements, where no presence is detected the light level will fade from 100% down to 10% saving up to 60% of the energy usage. The COR function does not abruptly switch off the lighting but dims it to a 10% level. Depending on the profile selected the device remains at this light level ("never off" profile) or switches off completely after the appropriate delay ("Switch off" profile). This arrangement provides efficient energy savings in 24-hour applications where light is needed round the clock for safety reasons, for example in stairwells and corridors in public buildings, and in large apartment complexes, car parks, pedestrian underpasses, warehouses and underground railway stations.

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
HBEAIR	Integrated smart sensor for high ceiling (up to 16m) and driver with wireless communication and grouping possibilities for lighting control
COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min.)
COR30min	Driver with Corridor function 30min (switch off after 30 min.)
HBPIR7m	Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
HBPIR12m	Integrated PIR sensor for high ceiling (up to 12 meters) with on-off control
<i>*note - Luminaire with integrated HBPIR12m sensor protection degree is IP54</i>	
HBPIR15m	Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control
EMG	Emergency version 1 hour
EMGB	Emergency version 1 hour (best available technology)
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
1G	Strain relief for power supply cable
L30x70	Optics with 30x70° beam angle
L40	Optics with 40x40° beam angle
L60	Optics with 60x60° beam angle
L90	Optics with 90x90° beam angle
L120	Optics with 120x120° beam angle
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80+

Available accessories:

Product: GRID MTG KIT Norte L LED - 468x340mm RAL9003
 Description: Protective gride for Norte L LED luminaires up to size 468x340, white
 Product: GRID MTG KIT Norte L LED - 675x340mm RAL9003
 Description: Protective gride for Norte L LED luminaires up to size 675x340, white
 Product: GRID MTG KIT Norte L LED - 975x340mm RAL9003
 Description: Protective gride for Norte L LED luminaires up to size 975x340, white

Applications:

SKY A LED

Product Group: High-bays

Images for the product family and options:

Description:

An industrial LED high-bay luminaire for high mounting applications in open areas and between shelves
 Reflector: specular aluminum, MIRO®, optional narrow (NAR) or middle (MID) beam pattern
 Diffuser: frosted polycarbonate (PC), de-glaring performance, impact resistance
 Body: steel sheet, white finish. Protective grid (SPORT) available on request

General data:

Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,97
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta -20...+40 (ta 0...+35 with EM3 option)
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08 (IK10 with protection grid)
 EEC: A++

Installation:

Surface luminaire designed to be fixed to ceiling of any type or suspended. Push-in terminal, 3x2x2.5mm2

Environment:

Indoor

Application:

Industry, warehouse, hall, sports

Surface mounted SHBPIR Occupancy Sensor is designed simply to automatically turn lights ON or OFF. The sensor utilizes Passive Infrared Technology (PIR) combined with lenses to determine when an area is occupied. This is determined when a heat source is detected and moves from one facet in the lens to another. The sensor recognizes this as a motion and provides power to the light fixture. Simultaneously a timer is started and restarts with each motion, once expired, the lights will turn OFF. The SHBPIR sensor maximizes energy savings, incorporating false detection algorithms to eliminate false ONs by nuisance tripping or background environmental conditions. The sensor also optimizes energy savings and safety concerns during power loss scenarios by assuming a return to last known state of operation.

PIR

MW

DEFINITIONS:

- Passive Infrared (PIR): A line of sight beam that reacts to heated motion across a field of view. It is a type of sensor technology, where no energy is emitted from the sensor.
- Microwave (MW): It is a type of sensor technology, which sends out microwave pulses (active) and measures the reflection of a moving object. Similar to a police radar gun.

Fixture mounted HBPIR and HBPIR&LIGHT sensors provide fast installation and immediate energy savings by automatically activating lighting only during periods of occupancy. Reliable passive infrared (PIR) technology detects occupancy, and the variable time delay - up to 30 minutes - is user accessible without power, tools or disassembly, and allows the ideal setting based on application needs. Included with the sensor are lenses for high-bay, low-bay and aisle mounting, allowing one unit to cover a variety of applications. The innovative Autocal feature performs an automatic daylight level calibration. Once calibrated, the sensor requires no further adjustment and immediately enters daylight harvesting mode, actively switching the connected fixture load ON and OFF in response to occupancy and available natural light maximizing energy savings through efficient light harvesting.

TECHNICAL DATA SHEET

FIELD OF VIEW:

FAST AND SIMPLE SETTING: The HBPIR does not require power to set the time delay saving valuable time during installation.

- Load = 30s - 30m

FAST AND SIMPLE TESTING: The HBPIR will "instant on" within 5 seconds. Upon initial power, relay is closed enabling labor savings testing in seconds.

POWER INTERRUPTION STATE: For energy savings and safety, if power is lost to device, device will return to last known state.

RANGE AND COVERAGE:

- The 360° *high-bay PIR lens* provides a 2:1 spacing to mounting height coverage under 7,6 meters mounting and a 1.5:1 for heights up to 12,2 meters mounting.
- The 360° *low-bay lens* provides 2:1 spacing to mounting height coverage for 2,4 to 6,1 meters mounting.
- The *aisle lens* is designed to provide detection of 18,2 meters long by 6 meters wide for heights up to 12,2 meters mounting.

LED: Super bright green LED indicates occupancy detection and can be seen at 12,2 meters.

FALSE DETECTION PROTECTION: Energy saving technology is designed into the HBPIR to assure your lights are ON only when needed.

HBPIR&LIGHT SENSOR:

ROTATING LIGHT SENSOR: Optimal for the best performance in locating light measurements (up, down and side lighting).

AUTO CALIBRATION: Set to auto-calibration, light sensor measures lowest light level of facility with all lights ON for 24 hours to determine the Daylighting Set Point.

MANUAL CALIBRATION: Optimize energy savings and operation by manually configuring the Daylighting Set Point.

PERFORMANCE DAYLIGHTING: Enhanced design algorithms to assure lights will not cycle during cloud cover, or varying light levels. (No more daylight = load turn OFF in +/- 5 minutes, Daylight returns = load will turn ON in +/- 1 minute).

CORRIDOR OPTION:

Automatic switching is based on presence/motion with the time delay set on site to suit the customer's requirements, where no presence is detected the light level will fade from 100% down to 10% saving up to 60% of the energy usage.

The COR function does not abruptly switch off the lighting but dims it to a 10% level. Depending on the profile selected the device remains at this light level ("never off" profile) or switches off completely after the appropriate delay ("Switch off" profile).

This arrangement provides efficient energy savings in 24-hour applications where light is needed round the clock for safety reasons, for example in stairwells and corridors in public buildings, and in large apartment complexes, car parks, pedestrian underpasses, warehouses and underground railway stations.

COR option:

Standard profile "Never OFF" (A...100 %, B...10 %, Fade time 32 s, never OFF).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached.

This corresponds to the default parameters.

COR1min option:

Profile 2 "Switch off" (A...100 %, B...10 %, Fade time 32 s, switch off after 1 minute).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached and if presence is not detected in the next minute the ballast switches off completely.

COR30min option:

Profile 3 "Switch off" (A...100 %, B...10 %, Fade time 32 s, switch off after 30 minutes).

If presence/motion is not detected, from this time onwards the ballast dims until the absence light value is reached and if presence is not detected in the next 30 minutes the ballast switches off completely.

Fixture mounted HBEAIR sensors ensure lighting is only on when and where it is needed. The sensors in combination with can bring huge benefits in terms of energy management as they provide occupancy detection and daylight sensing for heights up to 16 meters. Energy saving - typically between 30% and 50%. HBEAIR can be easily programmed via a smartphone, that offers immense flexibility to commission luminaires into groups and further divided in zones wirelessly.

The HBEAIR offers intelligent wireless lighting control, for warehouse (and similar) applications. Advantages: 5m-16m mounting height, simple grouping via NFC and IR with the Apps, zoning and occupancy sharing (zone with motion goes to full task level while sub-zones are maintained at background light level).

A white protection grid (SPORT version) can be used to increase impact resistance of the luminaire to IK10. This version is designed for sports halls, gyms and other spaces where light fittings are in danger of being hit by a ball. For more information see the product list

TECHNICAL DATA SHEET

Available options:

SDIM	Driver with switch-control dimming
DALI	Driver with DALI interface
HBEAIR	Integrated smart sensor for high ceiling (up to 16m) and driver with wireless communication and grouping possibilities for lighting control
COR	Driver with Corridor function (never off)
COR1min	Driver with Corridor function 1min (switch off after 1 min)
COR30min	Driver with Corridor function 30min (switch off after 30 min)
HBPIR7m	Integrated PIR sensor for high ceiling (up to 7 meters) with on-off control
HBPIR12m	Integrated PIR sensor for high ceiling (up to 12 meters) with on-off control
<i>*note - Luminaire with integrated HBPIR12m sensor protection degree is IP54</i>	
HBPIR15m	Integrated PIR sensor for high ceiling (up to 15 meters) with on-off control
EMG	Emergency version 1 hour
EMGB	Emergency version 1 hour (best available technology)
EM3	Emergency version 3 hours
EM3B	Emergency version 3 hours (best available technology)
EM3A	Emergency version equipped with an autonomous testing system, 3 hours
EM3D	Emergency version 3 hours with DALI interface
5TB	5 way terminal block with two holes (for in and out going cable)
1G	Strain relief for power supply cable
MID	Middle beam reflector
NAR	Narrow beam reflector
SPORT-	White powder coated protective grid (IK10)
FROST-	Frosted polycarbonate diffuser
T830	Colour temperature 3000K, CRI 80+
T840	Colour temperature 4000K, CRI 80

NAR FROST

MID FROST

Applications:

BRUBU M LED

Product Group: High-bays

Description: A recessed LED low-bay luminaire with precise light control for use in petrol stations
 Optics: 60°, 90°, 120° and asymmetric light beam
 Diffuser: tempered glass, impact resistant, silicone rubber sealing
 Body: sheet steel, white finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,97
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Recessed luminaire is designed to be fixed to ceiling of any type. Push-in terminal, 3x2x2.5mm2

Environment: Indoor/outdoor with roof

Application: Fuel station

Surface installation box available on request. For more information see the accessory list.

Applications:

SATURN LED

Product Group: High-bays

Images for the product family and options:

Description: A high-efficacy LED high-bay luminaire with 90° degrees optic for high mounting applications
 Optics: 90° light beam, silicone rubber sealing, impact resistance
 Body: die-cast aluminum, dark grey finish

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,97
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 75000/L80B50
 Operating temperature range, °C: ta -30...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Suspended. Supplied with suspension hook and out-going cable for easy mounting. Cable, 0.3m, 3x0.75mm2

Environment: Indoor/outdoor with roof

Application: Industry, warehouse, hall, sports, transport terminal

Waterproof cable in-line connector is recommended to use when installing our LED high-bays and floodlights. Push-in terminal 3x1.5mm2, 400V/16A. IP66/IP68- dust and waterproof. For more information see the accessory list.

EVEREST LED

Product Group: High-bays

Images for the product family and options:

Description:

A suspended LED high-bay luminaire for high mounting applications and one-for-one replacement of 150W, 250W and 400W HID luminaires. With exceptional rated lifetimes, zero restrike time and significantly reduced lamp change maintenance cost
 Reflector: anodized aluminium, glossy
 Diffuser: tempered glass, low glare surface
 Body: die-cast aluminium, dark grey finish

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK06
 EEC: A+/A++

Installation:

Suspended. Supplied with suspension hook for easy mounting. Screw terminal, 3x2.5mm²

Environment:

Indoor

Application:

Retail, showroom, industry, warehouse, hall, exhibition, public place

High flexibility to meet specific project requirements, as luminaires can be painted to all RAL code colour on request. For more information see the option list

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:
T840 Colour temperature 4000K, CRI 80+

Available accessories:

Product: Power supply connector - IP66/IP68, 3x1.5mm²
Description: Quick and easy to connect power supply and luminaire cables connector - IP66/IP68, 3x1.5mm², 400V/16A, 1pcs

Product: Suspension MTG KIT - Saturn LED 1.5m
Description: Suspension kit for Saturn LED high-bay, 1.5 meter
Product: Suspension MTG KIT - Saturn LED 3.0m
Description: Suspension kit for Saturn LED high-bay, 3.0 meter
Product: Suspension MTG KIT - Saturn LED 5.0m
Description: Suspension kit for Saturn LED high-bay, 5.0 meter

FLOODLIGHTS

www.northcliffe.org

BOREAS M LED

Product Group: Floodlights

Images for the product family and options:

Description:

An architectural LED floodlight with choice of optics and IP65 water and dust protection for use in adverse conditions
 Optics: 12°, 30°, 45°, 60°, 90°, asymmetric and street light beam
 Diffuser: tempered glass, clear, impact resistant
 Body: die-cast aluminum, dark grey finish

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -30...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A++

Installation:

Suitable for any horizontal and/or vertical surfaces. Push-in terminal, 3x2x2.5mm2

Environment:

Outdoor

Application:

Industry, sports, facade illumination, parking area, park, public space, street

Waterproof cable in-line connector is recommended to use when installing our LED high-bays and floodlights. Push-in terminal 3x1.5mm2, 400V/16A. IP66/IP68- dust and waterproof. For more information see the accessory list.

TECHNICAL DATA SHEET

Available options:

- DALI Driver with DALI interface
- CDIM Driver dimming with the help of a control line
- ADIM Driver with autonomous two-level dimming
- *note - for power above 160W use two DALI, CDIM, ADIM option price*
- LS12 Optics with 12x12° beam angle
- LS30 Optics with 30x30° beam angle
- LS45 Optics with 45x45° beam angle
- LS60 Optics with 60x60° beam angle
- LS90 Optics with 90x90° beam angle
- LSA1 Optic with asymmetric beam LSA1
- LSA2 Optic with asymmetric beam LSA2
- LSM1 Optic with asymmetric beam LSM1
- RAL RAL colour
- T730 Colour temperature 3000K, CRI 70+
- T740 Colour temperature 4000K, CRI 70+
- T750 Colour temperature 5000K, CRI 70+

Available accessories:

Product: Power supply connector - IP66/IP68, 3x1.5mm2
Description: Quick and easy to connect power supply and luminaire cables connector - IP66/IP68, 3x1.5mm2, 400V/16A, 1pcs

Product: Power supply socket - IP66/IP68, 5x1.5mm2
Description: Quick and easy to connect power supply cable socket - IP66/IP68, 5x1.5mm2, 400V/16A, 1pcs

Product: Power supply plug - IP66/IP68, 5x1.5mm2
Description: Quick and easy to connect power supply cable plug - IP66/IP68, 5x1.5mm2, 400V/16A, 1pcs

Applications:

BOREAS C LED

Product Group: Floodlights

Images for the product family and options:

Description: An architectural LED floodlight with high output and IP65 water and dust protection to use in adverse conditions
 Reflector: anodized aluminium, symmetric
 Diffuser: tempered glass, clear, impact resistant
 Body: die-cast aluminum, dark grey finish, with aluminium clips

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Suitable for any horizontal and/or vertical surfaces. Tool-free design for easy instalation and maintenance. Push-in terminal, 3x2x2.5mm2

Environment: Outdoor

Application: Facade illumination, parking area, park, public space

T850	Colour temperature 5000K, CRI 80+

BOREAS E LED

Product Group: Floodlights

Images for the product family and options:

Description:

A budget LED floodlights with symmetric reflector and IP65 water and dust protection to use in adverse conditions
 Reflector: white thermoplastic, symmetric
 Diffuser: tempered glass, clear, impact resistant
 Body: die-cast aluminum, dark grey finish

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 30000/L70B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A+

Installation:

Suitable for any horizontal and/or vertical surfaces. Supplied with out-going cable for easy mounting. Cable, 0.3m, 3x0.75mm2

Environment:

Outdoor

Application:

Facade illumination, parking area, park, public space

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:
 T740 Colour temperature 4000K, CRI 70+

Available accessories:

Product: Power supply connector - IP66/IP68, 3x1.5mm2
 Description: Quick and easy to connect power supply and luminaire cables connector - IP66/IP68, 3x1.5mm2, 400V/16A, 1pcs

TAKU LED

Product Group: Floodlights

Images for the product family and options:

Description:

A high-power LED floodlight with choice of symmetric or asymmetric optics for sport and high mast area lighting
 Reflector: symmetric 10°, 25°, 40° and asymmetric A1 light beams
 Diffuser: tempered glass, extra-clear, impact resistant
 Body: die-cast aluminum, dark grey finish with special anticorrosive and anti-ultraviolet powder, with protractor scale for precise aiming of the floodlight

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -35...+40
 Protection class IEC: I
 Ingress protection code: IP66
 Mechanical impact resistance: IK08
 EEC: A++

Installation:

Suitable for any horizontal and/or vertical surfaces. Push-in terminal, 3x2x2.5mm2

Environment:

Outdoor

Application:

Sports, transport terminal, parking area, airport

Waterproof cable in-line connector is recommended to use when installing our LED high-bays and floodlights. Push-in terminal 3x1.5mm2, 400V/16A. IP66/IP68- dust and waterproof. For more information see the accessory list.

Description: Grus M LED louver for better glare control

Product: Grus B LED Louver D310
Description: Grus B LED louver for better glare control

Applications:

CAVER LED

Product Group: Outdoor accent lighting

Images for the product family and options:

Description: A dust and moisture proof LED floodlight for outdoor lighting applications
 Optics: symmetric 30°, 45°, 60°, 90° and asymmetric LSA1, LSA2, LSM1 light beam
 Diffuser: clear polycarbonate, UV resistant, impact resistant
 Body: extruded aluminum, light grey finish, silicone rubber sealing and brass cable gland provides reliable protection

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP66
 Mechanical impact resistance: IK09
 EEC: A++

Installation: Surface mounted luminaire is designed to be fixed to walls of any type. Cable, 1.0m, 3x0.75mm2

Environment: Outdoor

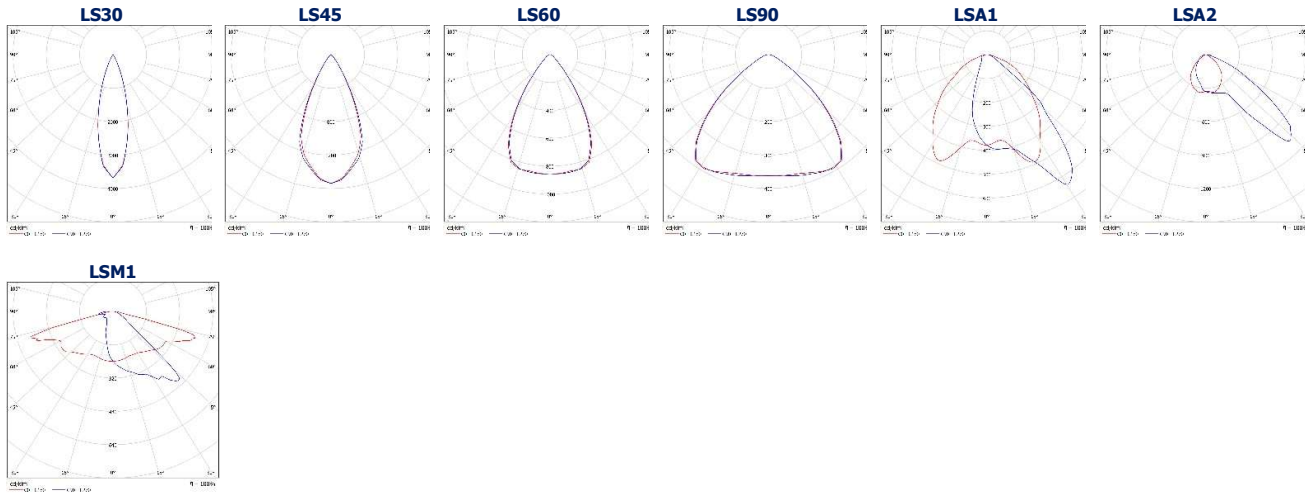

Application: Facade illumination, parking area, public space

 T740 Colour temperature 4000K, CRI 70+

Applications:

TUBE M LED

Product Group: Outdoor accent lighting

Images for the product family and options:

Description: An architectural LED wall washer with up and down light distribution. IP65 water and dust protection for use in adverse conditions
 Optics: 1x30°, 1x45°, 1x60°, 2x30°, 2x45°, 2x60° light beam
 Diffuser: tempered glass, impact resistant
 Body: die-cast aluminum, dark grey finish

General data:
 Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L70B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A+/A++

Installation: Surface mounted luminaire is designed to be fixed to walls or ceilings of any type. Screw terminal, 3x1.5mm2

Environment: Outdoor

Application: Facade illumination

TUBE S LED

Product Group: Outdoor accent lighting

Description: An architectural LED wall-mounted luminaire with pleasing up and down light distribution
 Optics: 30°, 90° light beam
 Diffuser: tempered glass, impact resistant
 Body: die-cast aluminum, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: $\geq 0,50$
 Light source: 1xGU10/2xGU10/LED
 Light source included: No/Yes
 Light distribution type: Direct/indirect
 LED lifetime, h: 30000/L70B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP54
 Mechanical impact resistance: IK08
 EEC: A

Installation: Surface mounted luminaire is designed to be fixed to walls of any type. Screw terminal, 3x1.5mm2

Environment: Outdoor

Application: Facade illumination

ARCTURUS LED

Product Group: Outdoor accent lighting

Description: A vandal resistant LED bulkhead for outdoor wall applications. Designed to spread light sideways and sealed to IP65
 Diffuser: opal polycarbonate, impact resistant
 Body: die-cast aluminum, black finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A+

Installation: Surface mounted luminaire is designed to be fixed to walls of any type. Push-in terminal, 3x2x2.5mm²

Environment: Outdoor

Application: Facade illumination, transport terminal, parking area, fuel station, public space

- T840 Colour temperature 4000K, CRI 80+

DUBHE LED

Product Group: Outdoor accent lighting

Images for the product family and options:

Description: A surface IP54 LED luminaire with opal diffuser for outdoor wall applications
Diffuser: opal polycarbonate, UV stable, impact resistant
Body: die-cast aluminum, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
Power factor: >0,50/0,80
Light source: 1xE27/LED
Light source included: No/yes
Light distribution type: Direct
LED lifetime, h: 50000/L80B50
Operating temperature range, °C: ta -25...+40
Protection class IEC: I
Ingress protection code: IP54
Mechanical impact resistance: IK08
EEC: A/A+

Installation: Surface mounted luminaire is designed to be fixed to walls or ceiling of any type. Push-in terminal, 3x2x2.5mm2

Environment: Outdoor

Application: Facade illumination, parking area, public space

ATLAS M LED

Product Group: Outdoor accent lighting

Images for the product family and options:

Description: A ground recessed LED floodlight with a choice of round or square stainless-steel frame. IP67 - water and dust protection for use in adverse conditions
 Diffuser: tempered glass, clear, impact resistant
 Ring: stainless-steel, grade 316
 Body: die-cast aluminum, dark grey finish, with anti-ageing silicone gasket

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP67
 Mechanical impact resistance: IK10
 EEC: A+/A++

Installation: Suitable for recessed mounting in any horizontal surface. Gravel must be used to ensure efficient drainage, 300 mm in depth and around. Supplied with thermoplastic recessed installation housing. Cable, 1.0m, 3x1.5mm²

Environment: Outdoor

Application: Facade illumination, public space

* tolerance range for optical and electrical data: $\pm 10\%$. Values apply to an ambient temperature of 25°C

Available options:

- DALI Driver with DALI interface
- SQUARE Square stainless steel frame
- L30 Optics with 30x30° beam angle
- L45 Optics with 45x45° beam angle
- L60 Optics with 60x60° beam angle
- LA1 Optics with asymmetric beam SA1
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

Applications:

ATLAS S LED

Product Group: Outdoor accent lighting

Images for the product family and options:

Description: A ground recessed LED floodlight with a choice of round or square stainless-steel frame. IP67 - water and dust protection for use in adverse conditions
 Diffuser: tempered glass, clear, impact resistant
 Ring: Stainless-steel, grade 316/304
 Body: die-cast aluminum, dark grey finish, with anti-ageing silicone gasket

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,50
 Light source: 1xGU10/LED
 Light source included: No/yes
 Light distribution type: Direct
 LED lifetime, h: 30000/L70B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP67
 Mechanical impact resistance: IK10
 EEC: A

Installation: Suitable for recessed mounting in any horizontal surface. Gravel must be used to ensure efficient drainage, 200 mm in depth and around. Supplied with thermoplastic recessed installation housing. Cable, 0.3m, 3x0.75mm²

Environment: Outdoor

Application: Facade illumination, park, public space

Recessed housing is used for easy access and service of floodlight during all life time

Series with single, twin and twelve window covers are available on request. They are supplied with special glass to increase light efficiency and to prevent collection of the dirt. See the option list for more information

PARK AND STREET LUMINAIRES

www.northcliffe.org

NIGEA LED

Product Group: Park and Street Luminaires

Description: A circular LED bollard emphasizing simple design and high vandal resistance
 Diffuser: clear polycarbonate, impact resistance
 Reflector: matt aluminum, de-glaring performance
 Body: extruded aluminum, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L80B50
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I
 Ingress protection code: IP54
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Flange mounting plate. Screw terminal, 3x1.5mm2

Environment: Outdoor

Application: Household, park, public space

Product	Length, mm	Width, mm	Height, mm	Luminaire output*, lm	System power*, W	System efficacy*, lm/W	CRI	CCT*, K	Weight, kg

* tolerance range for optical and electrical data: ±10%. Values apply to an ambient temperature of 25°C

Available options:

- SDIM Driver with switch-control dimming
- DALI Driver with DALI interface
- RAL RAL colour
- T830 Colour temperature 3000K, CRI 80+
- T840 Colour temperature 4000K, CRI 80+

SIGNUS LED

Product Group: Park and Street Luminaires

Description: A decorative LED park light with frosted diffuser and round canopy
Diffuser: frosted polycarbonate, UV stabilized, good impact resistance
Body: die-cast aluminum, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 50000/L90B50
Operating temperature range, °C: ta -25...+40
Protection class IEC: I (II optional)
Ingress protection code: IP65
Mechanical impact resistance: IK08
EEC: A++

Installation: Post top installation with three screws on poles Ø60mm. Suggested mounting height from 3 to 5 meters. Cable, 3.0m, 3x0.75mm2

Environment: Outdoor

Application: Household, park, public space

Photocell PCA switches lighting fixtures ON or OFF, at the same time it can be mounted into IP protected light fitting serving as a standalone solution. The built-in photo-sensor records the brightness of the surroundings and switches the connected lighting fixtures on at dusk and of again at dawn. Technical data: IP65- dust and waterproof, 35 lux, 1:05 ratio. For more information see the option list

Applications:

SPHERE LED

Product Group: Park and Street Luminaires

Description: A non-corrosive sphere-shaped LED park light with opal polycarbonate diffuser
 Diffuser: opal polycarbonate, UV stabilized, good impact resistance
 Body: polycarbonate, black finish, with quick lock system

General data: Mains voltage: 220-240V, 0/50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 50000/L70B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I (II optional)
 Ingress protection code: IP54
 Mechanical impact resistance: IK08
 EEC: A+

Installation: Post top installation with three screws on poles Ø60mm. Suggested mounting height from 3 to 5 meters. Push-in terminal, 3x2x2.5mm2

Environment: Outdoor

Application: Parking area, park, public space

SEGIN LED

Product Group: Park and Street Luminaires

Description: A traditional four-sided LED park light for lighting historical environments, traditional towns and villages
 Optics: 140x140° and asymmetric light beam
 Diffuser: tempered glass, extra clear, impact resistant
 Body: die-cast aluminum, black finish, super resistance to corrosion

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -25...+40
 Protection class IEC: I (II optional)
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A++

Installation: Post top installation with three screws on poles Ø60mm. Suggested mounting height from 3 to 6 meters. Push-in terminal, 3x2x2.5mm²

Environment: Outdoor

Application: Parking area, park, public space, street

ALGOL M LED

Product Group: Park and Street Luminaires

Description:

A high efficiency LED street lighting luminaire with excellent heat dissipation and low maintenance cost
Optics: LSM1, LSPR, LSPL, for streets and pedestrian-crossing
Diffuser: tempered glass, with stainless steel clips, silicone rubber sealing
Body: die-cast aluminum, light grey finish

General data:

Mains voltage: 220-240V, 50-60Hz
Power factor: >0,95
Light source: LED
Light source included: Yes
Light distribution type: Direct
LED lifetime, h: 100000/L90B10
Operating temperature range, °C: ta -25/-30...+40
Protection class IEC: I, II optional
Ingress protection code: IP66
Mechanical impact resistance: IK08
EEC: A++

Installation:

Side entry or post top installation with two screws on poles Ø60mm. Suggested mounting height from 6 to 12 meters. Screw terminal, 3x1.5mm²

Environment:

Outdoor

Application:

Parking area, public space, street

Photocell PCA switches lighting fixtures ON or OFF, at the same time it can be mounted into IP protected light fitting serving as a standalone solution. The built-in photo-sensor records the brightness of the surroundings and switches the connected lighting fixtures on at dusk and of again at dawn. T750	Colour temperature 5000K, CRI 70+

ALGOL L LED

Product Group: Park and Street Luminaires

Images for the product family and options:

Description: A vandal and vibration proof LED street light designed to match the highest required standards for outdoor lighting
 Optics: LSM1, LSPR, LSPL, for streets and pedestrian-crossing
 Diffuser: tempered glass, extra-clear, impact resistant, with stainless steel screws and silicone rubber sealing
 Body: die-cast aluminum, dark grey finish
 Easy clean design including flat glass optical cover and optimally sized smooth heat dissipation cover

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -25...+40 (ta -35...+40 optional)
 Protection class IEC: I (II optional)
 Ingress protection code: IP66
 Mechanical impact resistance: IK09
 EEC: A++

Installation: Side entry or post top installation with two screws on poles Ø60mm. Suggested mounting height from 6 to 12 meters. Adjustable installation angles: for side entry: 0, 10, 15 degrees and for post entry 0, 5, 15 degrees. Push-in terminal, 3x2x2.5mm2

Environment: Outdoor

Application: Parking area, public space, street

Adjustable installation angles:
 -for side entry: 0, 10, 15 degrees;
 -for post entry 0, 5, 15 degrees.

AUVA LED

Product Group: Park and Street Luminaires

Description:

A high-performance LED street lighting luminaire brings comfort and safety to any road or street
 Optics: LSM1, LSPR, LSPL, for streets and pedestrian-crossing
 Diffuser: tempered glass, extra-clear, impact resistant, with stainless steel screws and silicone rubber sealing
 Body: die-cast aluminum, light grey finish, tool-less top opening for easy and safe maintenance operations
 Easy clean design including flat glass optical cover and optimally sized smooth heat dissipation cover

General data:

Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,95
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 100000/L90B10
 Operating temperature range, °C: ta -25...+40 (ta -35...+40 optional)
 Protection class IEC: I (II optional)
 Ingress protection code: IP66
 Mechanical impact resistance: IK09
 EEC: A++

Installation:

Side entry or post top installation with two screws on poles Ø60mm. Suggested mounting height from 6 to 12 meters. Adjustable installation angles: for side entry: +/-15 degrees and for post entry +/-15 degrees. Screw terminal, 3x2.5mm2

Environment:

Outdoor

Application:

Parking area, public space, street

Photocell PCA switches lighting fixtures ON or OFF, at the same time it can be mounted into IP protected light fitting serving as a standalone solution. The built-in photo-sensor records the brightness of the surroundings and switches the connected lighting fixtures on at dusk and of again at dawn. Technical data: IP65- dust and waterproof, 35 lux, 1:05 ratio. For more information see the option list

STAR LED

Product Group: Park and Street Luminaires

Description: A budget LED street lighting luminaire with good heat dissipation and low maintenance cost
 Diffuser: frosted polycarbonate, impact resistant
 Body: die-cast aluminum, dark grey finish

General data: Mains voltage: 220-240V, 50-60Hz
 Power factor: >0,90
 Light source: LED
 Light source included: Yes
 Light distribution type: Direct
 LED lifetime, h: 35000/L70B50
 Operating temperature range, °C: ta -20...+40
 Protection class IEC: I
 Ingress protection code: IP65
 Mechanical impact resistance: IK08
 EEC: A+

Installation: Side entry installation with two screws on poles Ø 60mm (50-100W) and Ø42 30W versions. Supplied with out-going cable for easy mounting. Cable, 0.3m, 3x1.00mm²

Environment: Outdoor

Application: Parking area, public space

INFORMATION

www.northcliffe.org

LIGHT TERMINOLOGY

Luminous flux Φ (lm)

The luminous flux describes the quantity of light emitted by a LED light source or luminaire. The luminous efficiency is the ratio of the luminous flux to the electrical power consumed (lm/W). It is a measure of a LED light source's economic efficacy.

where:
 Φ - luminous flux
lm- Lumen

Illuminance L (lx)

Illuminance describes the amount of luminous flux falling on a surface. Relevant standards specify the required illuminance according to location and activity (EN 12464-1 "Lighting of indoor workplaces", EN 12464-2 "Lighting of outdoor workplaces", EN 12193 "Sports facility lighting")

$$E = \Phi / A \quad lx = lm/m^2$$

where:
E- illuminance
 Φ - luminous flux
A- area, m²
lx- lux

Typical recommended levels of maintained illuminance

Location/Task	Typical recommended level of maintained illuminance, lx	UGR	Uo	Ra
Offices

<i>School sports</i>	750	-	-	60

where:
UGR- Unified glare rating serves to define the psychological glare (visual discomfort) of lighting installations in indoor spaces
Uo- Uniformity is the ratio of minimum illuminance to average illuminance on a surface
Ra- Colour rendering index

TECHNICAL DATA SHEET

Luminous intensity I (cd)

The luminous intensity describes the quantity of light emitted in a particular direction per unit solid angle. This is a useful measurement for directive lighting elements such as reflectors. It is represented by the luminous intensity distribution curve.

$$I = \Phi / \Omega \quad \text{cd} = \text{lm} / \text{sr}$$

where:

I- luminous intensity

Φ - luminous flux, lm

Ω - solid angle into which luminous flux is emitted, sr

cd- Candela

sr- Steradian

Luminance (cd/m²)

The intensity and brilliance of light emitted from an item in a given direction. Luminance is often used to characterize emission or reflection from flat, diffuse surfaces. The luminance indicates how much luminous power will be detected by an eye looking at the surface from a particular angle of view. Luminance is thus an indicator of how bright the surface will appear.

$$L = I / (A * \cos \epsilon) \quad L = (E * \rho) / \pi$$

where:

Ω - solid angle into which luminous flux is emitted, sr

A- area hit by luminous flux, m²

*A*cosε*- visible area from direction ϵ

ρ - reflectance of area (for diffuse surface areas)

π - 3.14

Beam angle (degree, °)

The Beam Angle is the angle between the two directions opposed to each other over the beam axis for which the luminous intensity is half that of the maximum luminous intensity.

Power consumption (W)

The electrical power used by a luminaire or light source. Usually expressed in watt-hours (power consumed per hour).

Energy efficacy (lm/W)

The figure gained by dividing the total luminous flux by the power consumed. Used to express the luminous flux (amount of light) gained per watt, the higher the figure the more efficient is the luminaire.

LED lifetime (h)

The lifetime of a LED luminaire illustrates the target life expectancy (for example 50 000 hour life expectancy) which is a combination of light output degradation (L80 when the light output has reduced to 80% of its initial level) and source performance expectation (B10 when 10% of the LEDs lumen outputs falls below 80% of the nominal initial value) under specific conditions.

L- Lumen maintenance. L value tells that how many percent of luminous output is still left from the original.

B- Failure fraction. The value B10 means that minimum 90 % of the LED modules will meet the declared L-value and only 10% will have a lower flux level.

TECHNICAL DATA SHEET

Colour temperature (K)

Used to numerically express the colour of light sources, the redder the colour the lower the number and the bluer the colour the higher the number
where: K- Kelvin

2700K- extra warm white
3000K- warm white
4000K- natural white
5000K- cool white
6500K- daylight

Colour rendering index (CRI)

Colour rendering describes how a light source makes the colour of an object appear to human eyes and how well subtle variations in colour shades are revealed. The Colour Rendering Index (CRI) is a scale from 0 to 100 percent indicating how accurate a "given" light source is at rendering colour when compared to a "reference" light source. A minimum of 80 CRI is recommended for working areas.

Light sources are divided up into colour rendering levels:
CRI > 90 very good colour rendering
CRI > 80 good colour rendering

Unified Glare Rating (UGR)

UGR is a method of calculating glare from luminaires. The UGR value is calculated using a complex equation that includes the luminance value of the luminaire, the value of background luminance, the solid angle of the luminaire as seen by the viewer and several other values. Within an office setting, for the luminaire to be classified as "low glare" it must have a UGR below 19 at desk level. Anything above this may cause discomfort – this further enforces the need for high quality interior lighting that is rated UGR<19.

$$UGR = 8 \log \left[\frac{0.25}{L_b} \sum \left(\frac{L_l \omega}{p^2} \right) \right]$$

UGR limits (UGRL) that must not be exceeded:

- ≤ 16 Technical drawing
- ≤ 19 Reading, writing, training, meetings, computer-based work
- ≤ 22 Craft and light industries
- ≤ 25 Heavy industry
- ≤ 28 Railway platforms, foyers

Recognition distance (m)

Signs placed at all emergency exits along escape routes should be so illuminated as to indicate the direction to a place of safety in an unambiguous manner (EN1838 Lighting applications. Emergency lighting). Exit and direction signs should be clearly visible from anywhere along the escape route. All signs indicating emergency exits and escape routes should be in the same colour and format, whereas their minimum illuminance should be 2 cd/m².

As people in the building may not be familiar with its layout, internally illuminated, permanently powered safety signs are recommended.

Note that internally illuminated safety signs are visible from a greater distance than the same size signs illuminated from the outside.

$$d = s * p$$

where:

d- viewing distance (maximum distance at which a sign is visible and recognizable), m

p- height of sign, m

s- constant value: 100 for externally illuminated signs and 200 for internally illuminated signs

DEGREES OF IP PROTECTION

IP is an acronym "Ingress Protection". It is a measurement of the protection an item will have against solid objects (dust, sand, dirt, etc.) and liquids. An IP rating is comprised of 2 numbers. The first number refers to the protection against solid objects (dust, etc.) and the second number refers to protection against liquids.

What is an IP Rating?

Each IP rating has two numbers, both of which give you information about the protection level. A higher number means greater protection against solids and liquids.

- The first number (0-6) refers to the level of protection against solid objects and moving parts, such as dust, debris, or other solid matter.
- The second number (0-8) references the level of liquid and moisture protection.

Take a look at the chart below to better understand the protection offered with each number.

IP rating chart

IP ratings are represented by combining the first and second digits of the following columns.

1 st DIGIT - SOLID Degree of protection against solid objects		2 nd DIGIT- WATER Degree of protection against water	
0	No protection	0	No protection
1	Protected against a solid object greater than 50mm, such as a hand	1	Protected against water drops
2	Protected against a solid object greater than 12.5mm, such as a finger	2	Protected against water drops at a 15-degree angle
3	Protected against a solid object greater than 2.5mm, such as a small tool	3	Protected against water spray at a 60-degree angle
4	Protected against a solid object greater than 1.0mm, such as a wire	4	Protected against water splashing from any angle
5	Dust protected. Prevents ingress of dust sufficient to cause harm	5	Protected against water jets from any angle
6	Dust tight. No ingress of dust	6	Protected against powerful jets from and temporary flooding
		7	Protected against the effects of temporary submersion in water (30 minutes at 0.15 to 1 meter)
		8	Protected against the effects of permanent submersion in water (up to 3 meters). Depth specified by manufacturer

DEGREES OF IK PROTECTION

The IK rating is an international code which measures the degree of protection against mechanical wear and tear as well as the amount of impact a specific fixture can take. Essentially it is a measure of a fixtures robustness and durability.

So why is a fixtures IK rating important and when do they become relevant when choosing a fixture?

If you are choosing a fixture which will be fitted within a high traffic area such as street, highway or other commercial environments, then it's important to choose a fixture with an appropriate IK rating.

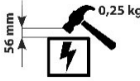

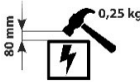

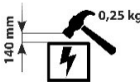

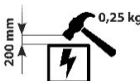

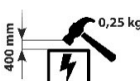

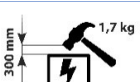

If a fixture was to become damaged, it could result in the fixture failing to work efficiently, or worse still, failing completely.

You don't need a fixture which is highly resistant if there is little or no risk of impact. So, analyzing your risk of impact is the first step in deciding if you need a fixture with a high IK rating. It's not just high traffic areas which need IK rated fixtures, but if the area is prone to vandalism it's a good idea too.

For areas of low risk an IK rating of IK07 and below is ideal. IK08 is great for areas which provide a reasonable risk of impact, whereas for maximum protection in places such as parks, schools, prisons and subways IK10 is essential.

IK rating chart

The degree of mechanical protection is identified by a code that consists of the letters IK followed by two digits:

IK number	Energy		Equivalent impact
00	Non-protected		No protection
01	Protected against 0.14 joules impact		Equivalent to impact of 0.25 kg mass dropped from 56 mm above impacted surface
02	Protected against 0.2 joules impact		Equivalent to impact of 0.25 kg mass dropped from 80 mm above impacted surface
03	Protected against 0.35 joules impact		Equivalent to impact of 0.25 kg mass dropped from 140 mm above impacted surface
04	Protected against 0.5 joules impact		Equivalent to impact of 0.25 kg mass dropped from 200 mm above impacted surface
05	Protected against 0.7 joules impact		Equivalent to impact of 0.25 kg mass dropped from 280 mm above impacted surface
06	Protected against 1 joules impact		Equivalent to impact of 0.25 kg mass dropped from 400 mm above impacted surface
07	Protected against 2 joules impact		Equivalent to impact of 0.5 kg mass dropped from 400 mm above impacted surface
08	Protected against 5 joules impact		Equivalent to impact of 1.7 kg mass dropped from 300 mm above impacted surface
09	Protected against 10 joules impact		Equivalent to impact of 5 kg mass dropped from 200 mm above impacted surface
10	Protected against 20 joules impact		Equivalent to impact of 5 kg mass dropped from 400 mm above impacted surface

CHEMICAL RESISTANCE OF PROOF LED

Chemical resistance table of Proof LED series:

Environment	Max. concentration	Proof LED diffuser resistance			Proof LED body resistance		
		yes	partially	no	yes	partially	no
Aceton (ketones)				no			no
Aniline							
Ammonia	5%	yes			yes		
Benzene and Benzaldehyde				no			no
Diethylether(ethers)			partially				no
Potassium nitrate		yes					
Ethanol(alcohols)	50%		partially			partially	
Ethylacetate(esters)				no			no
Ethyl alcohol			partially		yes		
Phenol				no			no
Glycerine		yes	partially				
Heptane							no
Ammonium hydroxide	25%					partially	
Sodium hydroxide-base	60%	yes			yes		
Sodium chloride-salt solution	15%	yes			yes		
Sulphur chloride and calcium chloride		yes					
Carbon tetrachloride and Chloric ether				no			no
Iron dichloride		yes					
Arsenic acid and Oleic acid		yes			yes		
Citric acid	20%	yes			yes		
Nitric acid	20%		partially			partially	
Nitric acid	50%			no			no
Hydrochloride acid	5%	yes			yes		
Hydrochloride acid	35%			no			no
Chromic acid	40%		partially			partially	
Formic acid	30%		partially				
Acetic acid	10%	yes				partially	
Sulphuric acid	30%	yes				partially	
Methanol				no			no
Fuel oil			partially		yes		
Mineral oil		yes			yes		
Vegetable oil		yes			yes		
Rape oil		yes				partially	
Lamp oil			partially			partially	
Hydrogen peroxide	30%			no		partially	
Ammonium sulphate	15%	yes			yes		
Toluene				no			no
Turpentine oil				no	yes		no
Trichlorethylene				no			no
Sodium carbonate	20%	yes					
Aliphatic hydrocarbons		yes				partially	
Aromatic hydrocarbons				no			no
Alkali		yes			yes
